Global Fixed Income Technical Update

More consolidation in August, but the medium-term setup points to higher yields thereafter

Technical Strategy

Jason Hunter [AC]
(1-212) 270-0034
jason.x.hunter@jpmorgan.com
J.P. Morgan Securities LLC

- The 2-year note rebound from the 4.31-4.345% support layer stalled at 4.15-4.17% resistance. A break through that resistance could trigger a high-frequency trend-following buying flow, but we suspect such a move would fade near the 3.98-4.025% resistance band. The medium-term trend bias remains negative while cheaper than that key area.
- The 10-year note coils behind the 4.58-4.60% short-term resistance zone after the July yield rise tested the 4.715-4.805% medium-term support layer. The momentum divergence buy signals that were triggered in July favor more consolidation in August. We suspect a retracement to lower yields will likely be limited to the 4.48-4.53% confluence of resistance levels.
- The 30-year bond is bearishly trading cheaper than the 5.15-5.20% 2023-2026 range cheaps. We think the market could see more range consolidation over the near-term and potentially a deeper retracement of the July backup. However, the medium-term trend bias remains negative while cheaper than 5.00-5.05%. The setup leaves the market vulnerable to a further backup to support that sits at 5.30% and then longer-term levels that surround 5.50%.
- The 5s/30s curve steepening rebound from the 59-62bp support confluence pushed through the 78-82bp resistance zone. That opens the door for an extension to the 88bp Fibonacci retracement confluence and then a large cluster of levels at 93-95bp. We suspect the latter will cap the steepening trend. Tactical support rests at 75-76bp.
- 10-year TIPS breakevens continue to trade in a range below 230-233bp resistance and above 216-221bp support. We expect that range to persist into September, when bearish risky market seasonality could increase the risk for more substantial tightening pressure.
- The 10-year Bund is tracing out a corrective rebound from the 3.218% July yield high toward the 3.07% July 38.2% retracement. The broader trend bias remains negative as long as the market respects the resistance that begins at that retracement level and stretches to the 2.98-2.995% gap and retracement level. A re-acceleration to higher yields would seek the 3.305% Jan 2025 channel and other swing objectives in the 3.30s.

US

The Treasury market technical setup is currently shaped by near-term dynamics that favor further consolidation in August and perhaps some more retracement to lower yield levels following the bearish July trends. While the backup did not press indicators deep into oversold territory, the belly of the curve saw a handful of momentum divergence buy signals trigger as all points on the curve tested expected support levels. These near-term setups have developed in the context of intact bearish medium-term trend dynamics. Provided the market respects key resistance levels through August, the absence of a clear bullish reversal pattern or anything that looks like bearish trend exhaustion leaves us looking for Treasuries to come under renewed bearish pressure into the fall.

Figure 1: The 2-year note rebound from the 4.31-4.345% support layer stalled at 4.15-4.17% resistance. A break through that resistance could trigger a high-frequency trend-following buying flow, but we suspect such a move would fade near the 3.98-4.025% resistance band. The medium-term trend bias remains negative while cheaper than that key area.

2-year note yield, daily bars with momentum divergence signals

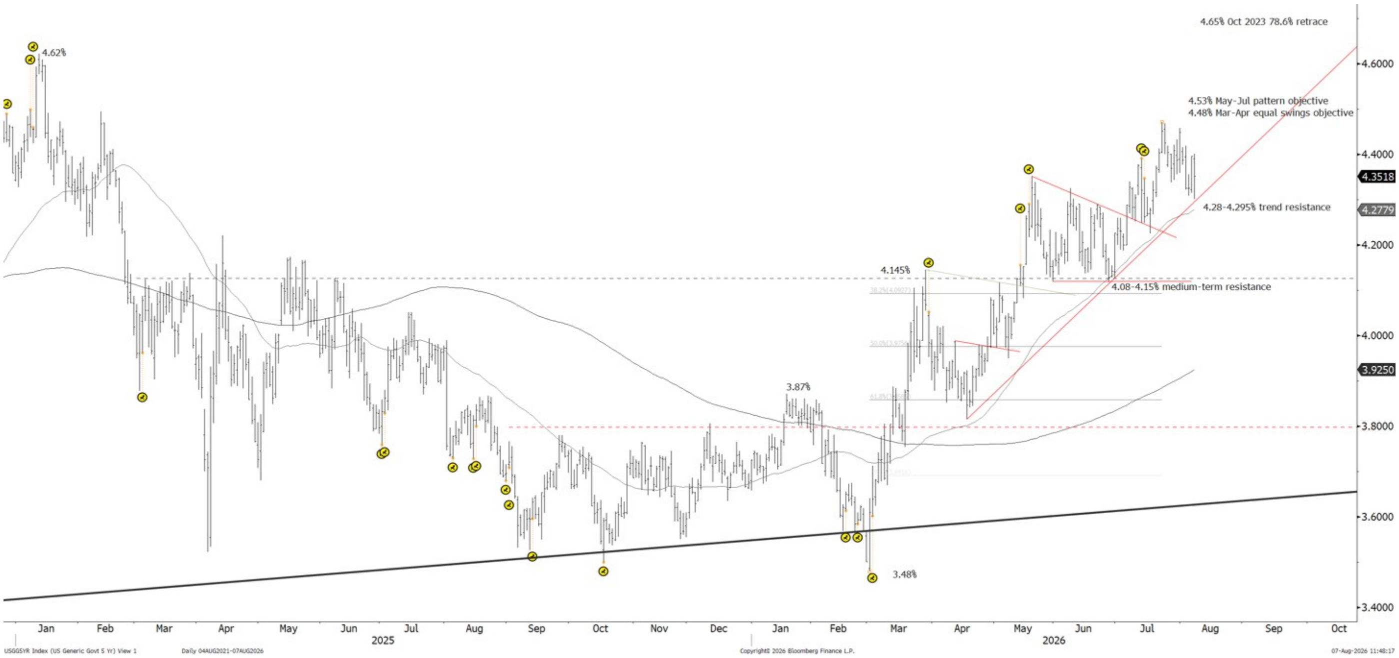
Source: J.P. Morgan. Bloomberg Finance L.P.

The 2-year note has staged a corrective and overlapping rally from the 4.315-4.345% support layer toward short-term trend line and moving average resistance at 4.15-4.17% (Figure 1). Fives have a very similar chart setup (Figure 2). A further rally through that initial resistance could trigger a wave of systematic trend-following short covering, but we suspect those moves would ultimately fade shy of the next zones of resistance near 4.00% and 4.15%, respectively. The broader bearish chart patterns remain intact as long as the front end and belly continue to trade cheaper than those two levels, as these zones mark the multi-month range support zones that the market broke down from during the spring. We will wait to see whether the market realizes a broader retracement to lower yields in August, or if it just churns sideways near current levels over that period before we look to establish a potential short trade later this month.

Jason Hunter [AC]
(1-212) 270-0034
jason.x.hunter@jpmorgan.com

Figure 2: The 5-year note rebound from the 4.48-4.53% support confluence stalled near the 4.28-4.295% April trend line and 50-day moving average. While a break richer could lead to a deeper retracement of the July backup, we do not see pattern or indicator-based evidence that would suggest the market is setting up a lasting bullish trend reversal at this point. Key medium-term resistance remains at the 4.08-4.15% spring breakdown zone.

5-year note yield, daily bars with momentum divergence signals



Source: J.P. Morgan. Bloomberg Finance L.P.

The 10-year note is trading in a tight range in front of the 4.715-4.805% support area and behind short-term resistance at 4.58-4.60% (Figure 3). High frequency indicators like our TY premium-weighted Put/Call ratio Z-score never achieved extreme oversold territory in July, but the decelerated nature of the way the market backed up into support triggered a cluster of our momentum divergence buy signals, which favor a period of consolidation and mean reversion to lower yields in August. A break through the 4.60% area would set the market up for a rally to next resistance at 4.48-4.53%, an area we think will likely keep a floor under yields into September. Persistent weakness behind that second zone also keeps the broader 2026 bear trend firmly intact.

Jason Hunter [AC]

The 30-year bond is bearishly trading cheaper than the 5.15-5.20% 2023-2026 yield highs and the recent price action doesn't look like the makings of a bullish reversal pattern, in our view. Even if the market sees further mean reversion to lower yields, the broader bear trend remains firmly in gear as long as the market continues to trade cheaper than the 5.00-5.05% resistance layer. A second zone sits at 4.80-4.85%, the area from which the market bearishly reversed in late-June. The July yield rise stalled just shy of the 5.30% Sep 2024-Oct 2025 .618 swing objective. The current setup points to an eventual retest of that area and potential extension to longer-term levels that surround 5.50%.

Figure 5: The 2s/5s curve retains a steepening trend bias within the broader 2025-2026 range. A sustained break above 15bp resistance would seek the 18.6bp Feb 61.8% retracement and then 22bp May high and June-July equal swings objective. Broader range resistance rests at 28-30bp.

2s/5s UST curve, daily bars with momentum divergence signals

Figure 9: The 10-year Gilt rebound from the 5.165-5.225% favored support area has achieved the cheaper end of the 4.845-4.90% short-term resistance zone. We are looking for a bearish trend reversal pattern to set up in that area. A second zone of resistance remains in the 4.60s.

10-year Gilt yield, daily bars with momentum divergence signals

Important Disclosures

Company-Specific Disclosures: J.P. Morgan does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. Important disclosures, including price charts and credit opinion history tables (if applicable), are available for compendium reports and all J.P. Morgan–covered companies, and certain non-covered companies, by visiting https://www.jpmm.com/research/disclosures, calling 1-800-477-0406, or e-mailing research.disclosure.inquiries@jpmorgan.com with your request.

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:
J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, https://www.jpmorganmarkets.com.

J.P. Morgan Equity Research Ratings Distribution, as of July 04, 2026

	Overweight (buy)	Neutral (hold)	Underweight (sell)
J.P. Morgan Global Equity Research Coverage*	53%	36%	12%
IB clients**	83%	80%	73%
JPMS Equity Research Coverage*	51%	37%	12%
IB clients**	95%	92%	87%

***Please note that the percentages may not add to 100% because of rounding.**
****Percentage of subject companies within each of the "buy," "hold" and "sell" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.**
For purposes of FINRA ratings distribution rules only, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. Please note that stocks with an NR designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.

Morgan Securities plc (“JPMS plc”) which is a member of the London Stock Exchange and is authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority or J.P. Morgan Markets Limited (“JPMML Ltd”) which is authorised and regulated by the Financial Conduct Authority. Unless specified to the contrary, this material is distributed in the UK by JPMS plc and is directed in the UK only to: (a) persons having professional experience in matters relating to investments falling within article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) (Order) 2005 (“the FPO”); (b) persons outlined in article 49 of the FPO (high net worth companies, unincorporated associations or partnerships, the trustees of high value trusts, etc.); or (c) any persons to whom this communication may otherwise lawfully be made; all such persons being referred to as "UK relevant persons". This material must not be acted on or relied on by persons who are not UK relevant persons. Any investment or investment activity to which this material relates is only available to UK relevant persons and will be engaged in only with UK relevant persons. A description of J.P. Morgan EMEA’s policy for prevention and avoidance of conflicts of interest related to the production of Research can be found at the following link: J.P. Morgan EMEA - Research Independence Policy.

U.S.: J.P. Morgan Securities LLC (“JPMS”) is a member of the NYSE, FINRA, SIPC, and the NFA. JPMorgan Chase Bank, N.A. is a member of the FDIC. Material published by non-U.S. affiliates is distributed in the U.S. by JPMS who accepts responsibility for its content.

General: Additional information is available upon request. The information in this material has been obtained from sources believed to be reliable. While all reasonable care has been taken to ensure that the facts stated in this material are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) make no representations or warranties whatsoever to the completeness or accuracy of the material provided, except with respect to any disclosures relative to J.P. Morgan and the Research Analyst's involvement with the issuer that is the subject of the material. Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. There may be certain discrepancies with data and/or limited content in this material as a result of calculations, adjustments, translations to different languages, and/or local regulatory restrictions, as applicable. These discrepancies should not impact the overall investment analysis, views and/or recommendations of the subject company(ies) that may be discussed in the material. Artificial intelligence tools may have been used in the preparation of this material, including assisting in data analysis, pattern recognition, and content drafting for research material. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and responsibilities that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan's current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.

Confidentiality and Security Notice: This transmission may contain information that is privileged, confidential, legally privileged, and/or exempt from disclosure under applicable law. If you are not the intended recipient, you are hereby notified that any disclosure, copying, distribution, or use of the information contained herein (including any reliance thereon) is STRICTLY PROHIBITED. Although this transmission and any attachments are believed to be free of any virus or other defect that might affect any computer system into which it is received and opened, it is the responsibility of the recipient to ensure that it is virus free and no responsibility is accepted by JPMorgan Chase & Co., its subsidiaries and affiliates, as applicable, for any loss or damage arising in any way from its use. If you received this transmission in error, please immediately contact the sender and destroy the material in its entirety, whether in electronic or hard copy format.
