Dollar Drift

Our thoughts on USD, JPY, CNY, GBP, CHF, CEE FX, SEK, NJA FX, and KZT & NGN

- **USD: Delivering stability.** We think FX should remain in a low volatility regime under a range of likely economic scenarios. On the one hand, the Dollar should be supported by solid US economic performance and bright prospective investment returns, and it is on the right side of the energy and carry themes that we think are key to the current backdrop. On the other hand, negative Dollar impulses have come mostly on the policy side. We think this back-and-forth can continue. This week's FOMC communication was more hawkish than we had expected, which, together with the shifts in commodity prices and risk sentiment, allowed the Dollar to recover off the low end of the recent trading range. And the Fed's decision to hike with a hawkish delivery should ease some market concerns about a captive Committee that have at times weighed on the Dollar. That said, our economists do not expect the FOMC to shift their approach to try to substantially tighten financial conditions in a way that would be clearly more supportive for the Dollar, and we expect that an under-delivery relative to market pricing would weigh on the currency again, as it did at times over the summer. In addition, China's continued firm currency management should help contain broad Dollar moves, as it did to some extent this week (see CNY bullet).
- **JPY: The downside of high expectations.** Growing speculation of a bigger policy shift in Japan, including faster BoJ rate hikes, fueled the Yen's appreciation over the past couple months. However, the dissents against the rate hike from PM Takaichi's BoJ Board nominees, Sato and Asada, raise fresh doubts for investors about a broader policy shift from the administration to support the currency. Moreover, Ueda's comments in the press conference emphasized that the Bank does not feel behind the curve, suggesting a high bar for an October hike. That, combined with the global backdrop remaining a source of downward pressure on JPY—which should persist if the Fed hikes again in October as our economists expect—further reduces the case to be short USD/JPY tactically. We still see clearer long-term asymmetry in USD/JPY downside, which has been reinforced by the latest rally, for three reasons. First, elevated risk of intervention remains with a reported rate check by Japan in the hours following the BoJ press conference. Second, even faster BoJ hikes could still come if the data warrant it, though our economists' baseline is a bit slower than what is currently priced.

Third, there remain higher odds of shifting portfolio flows over time. In the near-term, though, we continue to prefer being long JPY vs EUR rather than outright USD/JPY, for a few reasons: the reduced sense of urgency at the September BoJ meeting, the likelihood that any meaningful reallocation towards domestic assets by Japanese investors who buy foreign assets largely unhedged will be a slower-moving process, and our baseline for consecutive hikes from the Fed. There are also no clear catalysts for nearer-term JPY strength without intervention or more news pointing to some portfolio shift, whether it be the International Transactions in Securities data next month (unlikely) or more signs of it being under discussion. The scope for longer-term catalysts to develop faster than expected, however, still argues in our view for holding some long JPY exposure—and at least being more neutral than bearish. Our risk-reversal-based positioning metric reflects a similar conclusion (Exhibit 1).

Exhibit 1: Clear downside asymmetry in USD/JPY still priced in the pair for the months ahead

Source: Goldman Sachs Global Investment Research, Bloomberg

- **CNY: Faster pace into the summit.** Last month we rolled our CNY forecasts stronger and argued that a flatter pace of CNY fixes could accelerate in the run-up to the Trump-Xi summit in line with recent history. That has proved to be the case, with the USD/CNY fix moving sharply lower so far in September, creating greater room for offshore spot to strengthen further. As far as the summit itself is concerned, there are few expectations of any major policy breakthrough, although the fact that the summit is occurring should help in maintaining a stable trading relationship. Coupled with growing trade surpluses—the August monthly trade surplus increased to nearly ~\$120 bn—and ongoing FX inflows, that more stable trading relationship means that policymakers in China should continue to feel comfortable allowing sustained but gradual currency appreciation. By contrast, domestic demand has continued to be weak in recent months, and while some observers have commented that this may reduce the appetite for further appreciation, we have argued that moving China's

bifurcated economy closer to both external and internal balance would require two policy instruments—currency appreciation and fiscal support for the domestic economy. We continue to forecast USD/CNY at 6.40 in 12m and recommend staying short SGD/CNH.

- **GBP: Summer's fading tailwinds.** The BoE's dovish delivery at this week's September meeting has extended the EUR/GBP-positive trend in front-end rate differentials, and we see room for that trend to continue in the months ahead. While our economists expect the Bank to hike rates in November, the bar to out-hawk broader market pricing appears to us to be particularly high, with our economists' forecasts implying the clearest dovish risks to market pricing through to end-2027 across G10 central banks. An under-delivery of BoE hikes should apply steady upward pressure on EUR/GBP in the months ahead, and current levels in the cross are already well below those implied by rising rate differentials (Exhibit 2) or by broader cyclical fundamentals in our GSBEER model. We attribute Sterling's summer outperformance to a compression in risk premium on a relatively smooth transition to the Burnham government, a sharp pace of cross-border capital inflows (including from M&A), and the Euro's marginally higher exposure to energy pressures. We think these energy sensitivities have been key to cushioning EUR/GBP's typical beta to equities this year (Exhibit 3)—with that balance helping to provide a more stable period for the cross in recent weeks. That recent stability likely extends for the next few weeks, but further ahead, we think risks are skewed toward recent Sterling tailwinds petering out, and a shift to GBP . Low levels of risk premium could face renewed pressure around the upcoming Autumn budget, where there exist clear challenges to the fiscal agenda from the continued rise in energy prices and in borrowing costs. And any stabilisation in energy prices would likely create room for higher rate differentials and structural Sterling overvaluation to weigh on the currency over time.

- **CHF: Baby steps.** The Swiss Franc has been a consistent underperformer over the past few months. A firmly on-hold SNB, in contrast to other central banks that have moved toward more aggressive policy tightening, has been a key driver of that trend. Our economists continue to expect the SNB to remain on hold at next week's

meeting and for the foreseeable future. While SNB President Schlegel recently acknowledged that inflation in Switzerland had picked up, he emphasized that the increase has been smaller than other countries and that there has been little evidence of second-round effects so far. That said, there are some signs that the SNB is becoming incrementally more focused on upside risks to inflation and, in turn, less inclined to encourage CHF depreciation. In the same speech, President Schlegel omitted the usual language of an “increased willingness to intervene to counter CHF appreciation.” Whether this omission carried a deliberate message is less clear, we expect the SNB statement to make some changes to the FX language—specifically, the removal of the bias to “counter a rapid and excessive appreciation of the Swiss franc.” Our economists’ estimates suggest that the SNB may have already shifted to marginal foreign currency sales in recent months. But while a shift in messaging would be an important first signal of an adjustment in the SNB’s stance, it is unlikely to provide a path to Franc outperformance on its own, and we continue to think the current environment is a supportive one for CHF funding. We also think it is notable that the SNB has put more emphasis on the real exchange rate lately in the context of another wave of higher energy prices and a widening EA-CH inflation differential. At some point this could push the SNB to take policy steps to try to reverse the move higher in EUR/CHF, but we do not think the marginal changes to the FX language will be sufficient to accomplish this, or that a larger change in the currency policy is clearly warranted at this stage ([Exhibit 4](#)). But with CHF still a popular funding currency and positioning net short, there is some scope for unwinds to amplify Franc strength if the SNB ultimately adopts a more hawkish stance ([Exhibit 5](#)).

- **CEE FX: Cee-ing through the vol.** We recently took stock of CEE FX performance this year, which, apart from the large election-driven HUF appreciation, can be mostly explained by the impact of the Iran war on energy prices and European growth expectations. According to our model, the rise in oil and natural gas prices, together with the decline in EUR/USD (with some partial offset from improving broader risk sentiment), implies all currencies should be weaker versus the Euro relative to late February. In general, EUR/CZK has moved up by less than ‘predicted’

by this model, whereas EUR/PLN has risen by more than ‘predicted’, though overall residuals are relatively small, especially when compared with HUF. In Poland, PLN grew following the more hawkish FOMC meeting as had also been the case in June, demonstrating its sensitivity to a higher-for-longer global rates backdrop. While NBP guidance was more hawkish last week relative to July, it was dovish relative to market pricing, leaving risks of a monetary-policy-driven PLN re-rating as limited, in our view. Therefore, despite this recent , we think PLN remains an attractive funder from both a carry and spot asymmetry perspective. In Hungary, while HUF performance decoupled from global factors around the election, it has since returned to trading more closely in line with the predicted series of our model. And, looking at high-frequency betas to oil and natural gas prices, we find that HUF is the most sensitive to energy price shifts—and this beta is currently near its historical highs—followed by PLN and CZK (Exhibit 6). As we discussed last week, central bank communication has also played an important role in HUF performance around this energy-led trend; and we think this could again be the case next week. The MNB is widely expected to officially lower its inflation target next week and pause its cutting cycle. We think the lowering of the inflation target is a positive for HUF, as growing inflation differentials have been a key underlying driver of the upward trend in EUR/HUF spot and fair value. Apart from the target change, we will be focused on the Inflation Report and any changes to forward guidance—which states that the future path of rates will be dependent on the September Inflation Report—and what these may signal about the MNB’s sensitivity to FX developments since the last meeting. More broadly, we are entering a critical six-week period where local catalysts—including the inflation target revision, but also the Euro adoption plan, and the 2027 budget—will be in focus. We think these developments represent important tailwinds for the Forint’s performance. However, these will have to be balanced against the high energy price backdrop, and we think EUR/HUF is unlikely to be able to decouple as strongly from global developments as it did in April (when energy prices were also falling). We think a mix of negative global developments and positive local developments may leave EUR/HUF relatively range-bound. For this reason, we think pairing HUF longs with PLN shorts continues to make sense to insulate from shocks related to both energy prices and geopolitics.

Exhibit 6: HUF is the most sensitive to energy price shifts, followed by PLN and CZK

Betas estimated on a regression of daily FX returns on daily oil and European natural gas returns over rolling 120-day windows since 2018. Latest refers to the last 120 trading day window.

- SEK: Stretched.** This week's finely balanced Swedish election result has so far done little to clarify the path ahead for fiscal policy, but, on net, looks unlikely to materially shift the outlook for the Krona. Achieving broad-based support for some of the individual, less market-friendly policy platforms (such as wealth tax proposals) remains challenging, keeping political risks to the currency relatively narrow. And while a coalition-building period may keep political uncertainty elevated for a while longer, the broader fiscal policy mix—a current expansionary posture set against comparatively low total debt levels—is a positive one for the currency. Instead, we see energy pressures as the primary driver of the Krona's ongoing weakness. EUR/SEK's rise over the past few months has outstripped our simple benchmark of energy and equity price sensitivities ([Exhibit 7](#)). At the same time, some of this move likely reflects an unwind of the November-January sell-off in the cross, which was also well in excess of what our cyclical models had implied at the time. Clear risks to the Krona remain from its energy vulnerabilities, high exposure to European cyclical conditions, and from a Riksbank that has lagged the tightening response taken by most of its G10 peers. However, we are increasingly wary of the scale of SEK's relative to cyclical fundamentals, and see this as one reason for improving risk-reward in positioning for continued energy pressures via EUR/NOK downside rather than NOK/SEK topside expressions from here.

Exhibit 7: EUR/SEK's rally has overshoot the moves implied by equity and energy prices...

Source: Goldman Sachs Global Investment Research, Bloomberg

Exhibit 8: ...while EUR/NOK's sell-off has been closer to implied levels

Source: Goldman Sachs Global Investment Research, Bloomberg

- NJA FX: Energy and AI impulses favour long MYR/THB.** We assessed the impact of higher gas prices on regional current accounts using our Commodities team's updated gas forecasts and found that Malaysia stands to benefit the most, while Thailand is likely to be among the hardest hit given its heavy reliance on gas imports. Malaysia is also one of the best-positioned economies in the region to benefit from AI investment, after Taiwan and Korea, with the largest impulse from datacenter construction this year, and into 2027. Despite being on the right side of the terms-of-trade story throughout the year, the Malaysian Ringgit underperformed regional FX peers in July and August, which we believe was partly due to an increased political risk premium surrounding the Johor (July) and Negeri Sembilan (August) state elections. With those events now behind us, and BNM turning slightly more hawkish (we expect a 25bp hike in Q1 2027), we believe the conditions are in place for MYR to outperform and prefer to express this versus the Thai Baht. Thailand's current account moved into a deficit in Q2 (USD 575mn), the first deficit in eight quarters, driven by higher energy prices and capital goods imports. The main risk to a bearish THB stance remains gold prices. The BoT announced several measures in February this year to reduce the correlation between gold and THB, but the effectiveness of those measures has yet to be fully tested. Taken together, we recommend going long MYR/THB for a target of 8.60, and a stop-loss at 7.80. The trade is around flat carry.
- KZT & NGN: High energy carrying returns in EM Frontier.** Currencies of oil-exporting Frontier economies have benefited from a combination of higher-for-longer energy prices and particularly elevated carry-to-vol ratios relative to EM HY counterparts so far this year. In particular, we continue to like Kazakhstan Tenge (KZT) and Nigerian Naira (NGN) longs as both currencies are supported by elevated nominal and real local yields (NDFs for KZT, OMOs for NGN). Kazakhstan's NDF-implied yields are high relative to history, but KZT's year-to-date spot outperformance has pushed it in overvalued territory according to our GSDEER model and outside of the central bank's preferred range, leaving carry as the main driver of returns going forward. In Nigeria, however, we think that Naira carry returns can be amplified by a spot rate that has room to run. Even though it has traded somewhat in line with its year-to-date terms-of-trade improvement and has

strengthened recently, we had argued that the central bank was likely leaning against currency appreciation by remaining in reserve-accumulation mode, a policy choice that is proving increasingly costly ([Exhibit 9](#)). Given the tailwind from higher-for-longer oil prices on top of an already strong balance-of-payments outlook, we see risks as increasingly skewed towards more currency appreciation, and we have rolled our USD/NGN forecasts stronger this week, to 1,300/1,275 in 3/6 months (from 1,325/1,300 previously). Reflecting our overall constructive view, we have extended the target of our trade recommendation to be long TRY, NGN and KZT against the USD to 12% (from 10% previously, [Exhibit 10](#)).

Exhibit 9: The Naira has traded in line with Nigeria's terms-of-trade improvement year to date, but its appreciation has likely been limited by continued foreign reserve accumulation

Disclosure Appendix

Reg AC

We, Kamakshya Trivedi, Michael Cahill, Danny Suwanpruti, Teresa Alves, Karen Reichgott Fishman, Stuart Jenkins, Victor Engel and Lexi Kanter, hereby certify that all of the views expressed in this report accurately reflect our personal views, which have not been influenced by considerations of the firm's business or client relationships.

Unless otherwise stated, the individuals listed on the cover page of this report are analysts in Goldman Sachs' Global Investment Research division.

Contributing Authors: Kamakshya Trivedi Goldman Sachs International, Michael Cahill Goldman Sachs International, Danny Suwanpruti Goldman Sachs (Singapore) Pte, Teresa Alves Goldman Sachs International, Karen Reichgott Fishman Goldman Sachs & Co. LLC, Stuart Jenkins Goldman Sachs International, Victor Engel Goldman Sachs International, Lexi Kanter Goldman Sachs & Co. LLC.

Unless otherwise stated, the individuals listed in the Contributing Authors disclosure of this report are analysts in Goldman Sachs' Global Investment Research division.

Disclosures

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; registered market maker. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with a subject company, public appearances and trading in securities covered by the analysts.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of Global Investment Research of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Brazil:** Disclosure information in relation to CVM Resolution n. 20 is available at <https://www.gs.com/worldwide/brazil/area/gir/index.html>. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Resolution n. 20, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** This information is being provided to you for information purposes only and is not, and under no circumstances should be construed as, an advertisement, offering or solicitation by Goldman Sachs & Co. LLC for purchasers of securities in Canada to trade in any Canadian security. Goldman Sachs & Co. LLC is not registered as a dealer in any jurisdiction in Canada under applicable Canadian securities laws and generally is not permitted to trade in Canadian securities and may be prohibited from selling certain securities and products in certain jurisdictions in Canada. If you wish to trade in any Canadian securities or other products in Canada please contact Goldman Sachs Canada Inc., an affiliate of The Goldman Sachs Group Inc., or another registered Canadian dealer. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 10th Floor, Ascent-Worli, Sudam Kalu Ahire Marg, Worli, Mumbai-400 025, India, Corporate Identity Number 60634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. Registration granted by SEBI and certification from NISM in no way guarantee performance of the intermediary or provide any assurance of returns to investors. Goldman Sachs (India) Securities Private Limited compliance officer and investor grievance contact details, a copy of the annual compliance audit report and other relevant information and disclosures can be found at this link: <https://www.goldmansachs.com/worldwide/india/research-analyst>. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who

would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union and United Kingdom: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council (including as that Delegated Regulation is implemented into United Kingdom domestic law and regulation following the United Kingdom's departure from the European Union and the European Economic Area) with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at <https://www.gs.com/disclosures/europeanpolicy.html> which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan Type II Financial Instruments Firms Association, and Investment Management Association of Japan. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Global product; distributing entities

Goldman Sachs Global Investment Research produces and distributes research products for clients of Goldman Sachs on a global basis. Horário de funcionamento: segunda-feira à sexta-feira (exceto feriados), das 9h às 18h; in Canada by Goldman Sachs & Co. LLC; in Hong Kong by Goldman Sachs (Asia) L.L.C.; in India by Goldman Sachs (India) Securities Private Ltd.; in Japan by Goldman Sachs Japan Co., Ltd.; in the Republic of Korea by Goldman Sachs (Asia) L.L.C., Seoul Branch; in New Zealand by Goldman Sachs New Zealand Limited; in Russia by OOO Goldman Sachs; in Singapore by Goldman Sachs (Singapore) Pte. (Company Number: 198602165W); and in the United States of America by Goldman Sachs & Co. LLC. Goldman Sachs International has approved this research in connection with its distribution in the United Kingdom.

Goldman Sachs International ("GSI"), authorised by the Prudential Regulation Authority ("PRA") and regulated by the Financial Conduct Authority ("FCA") and the PRA, has approved this research in connection with its distribution in the United Kingdom.

European Economic Area: Goldman Sachs Bank Europe SE ("GSBE") is a credit institution incorporated in Germany and, within the Single Supervisory Mechanism, subject to direct prudential supervision by the European Central Bank and in other respects supervised by German Federal Financial Supervisory Authority (Bundesanstalt für tungsaufsicht, BaFin) and Deutsche Bundesbank and disseminates research within the European Economic Area.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, make a market or act as liquidity provider in, and buy or sell, any securities, derivatives, or other financial instruments referred to in this research (including any financial instruments issued by the companies referred to herein), unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is focused on investment themes across markets, industries and sectors. It does not attempt to distinguish between the prospects or performance of, or provide analysis of, individual companies within any industry or sector we describe.

Any trading recommendation in this research relating to an equity or credit security or securities within an industry or sector is reflective of the investment theme being discussed and is not a recommendation of any such security in isolation.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
