

Global Commodities

The Week in Commodities

This is a summary note that consolidates the latest views of our global commodity strategists published over the week; to read detailed reports, refer to the hyperlinks. It also contains hyperlinks to other related research/podcasts on the global commodities market.

[Commodities Podcast: Day 31 and beyond](#)

Crude and natural gas markets have been volatile this week, driven by headlines of cease-fire talks and Saudi Arabian exports. However, most discussions revolved around the possibility of a US export ban on diesel. All told, a 30-day ban may work surprisingly well, at least initially. Then comes Day 31.

[Oil Markets Weekly: Day 31 and beyond](#)

Russia and China have both restricted refined fuel exports this year to protect domestic markets, and the US may now face a similar choice amid record-high diesel prices and historically low September inventories. The US consumes about 3.6 mbd of diesel while exporting 1.3-1.6 mbd, so temporarily retaining some exports could quickly rebuild stocks and pressure diesel prices lower. The main challenge is logistics: most exports come from the Gulf Coast, where diesel output far exceeds what existing pipelines can redirect to the import-dependent East Coast. A Jones Act waiver has helped ease this bottleneck by allowing more Gulf-to-East Coast waterborne shipments, meaning a temporary export ban could initially work well. After redirecting barrels to the East Coast and Midwest, around 1.1 mbd would still need storage, but that could rebuild inventories to the five-year average within two weeks and add about 30 million barrels over a 30-day ban. This would likely push Gulf Coast diesel prices and cracks sharply lower, with weakness spreading to the East Coast. Once inventories normalize, the economics around a ban become far more challenging.

[Metals Weekly: El Niño and diesel refocus attention on supply risks; Copper faces a triple threat](#)

While El Niño-driven supply disruption in nickel is grabbing headlines, our focus remains primarily fixed on copper, which is facing a triple threat of risks on the supply side: Diesel availability in South America, El Niño weather risks, and Chilean strike potential. The US supplies over 70% of Chile's diesel demand and roughly 50–60% of Peru's, so a US export ban would pose significant risk. Immediate mine curtailments are unlikely given inventory buffers and operational mitigations, but sustained diesel shortages in Latin America would weigh on copper output in the quarters ahead, adding another drag on mine supply amid already extreme concentrate market tightness. On weather, the sharpest El Niño risks are drier conditions in South East Asia and Zambia and wetter conditions in Chile and Peru, with the ~100 kt/y Ok Tedi mine in Papua New Guinea exposed to disrupted river operations and July storms in Chile (~65 kt of lost supply) previewing what may follow. Labor votes at Centinela and Escondida—together about 5% of global output and 1.3 million tonnes of annualized production—land before month-end, adding near-term disruption risk. These remain risks rather than realised losses, but against a strained supply-demand backdrop, copper prices could show significant bullish convexity to further disruption, skewing risk toward an overshoot above \$15,000/mt into year-end.

QatarEnergy's CEO confirmed LNG output remains "very minute," consistent with our estimates of around 20% utilization through August and September. While he suggested normal operations could resume "within a few weeks," this is best interpreted as the start of ramp-up rather than a return to full capacity, which is still expected to take 2-3 months. Operationally, Qatar remains constrained near 20% LNG utilization, with Kuwait still the key outlet, though some September vessel movements suggest attempts to diversify exports. Vessel availability remains a major bottleneck, with only a few ballast LNG carriers identified in the Strait. Qatar's crude and products exports have recovered more strongly, running at 50-60% of pre-war levels, while LNG and product flows remain much weaker due to physical, logistical, and insurance constraints. We think this divergence is largely driven by physical and logistical factors. Crude is easier to ship and tranship, whereas LNG requires specialized, high-value vessels with potentially limited insurance availability, making Qatar more cautious about moving its fleet through the Strait of Hormuz.

[China Metals Activity Tracker: China Copper destocking weak vs historical trends while Aluminum destocking pace remains strong](#)

In the past week, China drawdown trends continued across industrial metals, although strength in drawdown in Copper continues to be weaker vs seasonal norm. China copper saw a destocking of 3kt last week vs a 5-year seasonal average of ~17kt de-stocking. However, with LME Copper retreating closer to ~\$14,000/t in the past week, China's onshore Copper buying activity picked up again, with purchase premium increasing significantly to back above \$120/t. In contrast, Aluminum's strong, above-trend destocking continued (-63kt last week), with total inventory now reduced back to historical normal levels (~800kt). What is of note in Aluminum this week is that monthly output figures from China NBS showed Aluminum production at 4MT for August and 31MT for first 8 months, with YTD figure annualized to ~46.5 MT, higher than the 45MT cap. Higher than expected supply could weigh on near-term Aluminum pricing.

[European Natural Gas: Demand & Storage Tracker: Warm weather helps... for now](#)

For the week of September 14–20, total natural gas demand in NWE+UK averaged 312 Mcm/day, down 4% WoW and 5% YoY, mainly due to a 7% weekly drop in non-residential demand. Residential demand and power generation were broadly unchanged, while slightly warmer weather contributed to softer consumption. MTD September demand is averaging 310 Mcm/day, also 5% lower YoY, largely because this month has been much warmer than last September, with an estimated 70 heating degree days versus 130 last year and a 10-year normal of 109. Storage injections rose 10% on the week to 156 Mcm/day, well above the 80 Mcm/day seen during the same period last year, supported by lower demand and higher Norwegian supply as maintenance eased. LNG sendouts increased 9% week on week to 181 Mcm/day but remain below last year's 210 Mcm/day and the September forecast of 240 Mcm/day, with MTD sendouts averaging 176 Mcm/day, down 15% YoY. As of September 21, NWE+UK storage was 62.6% full, or 31 Bcm, well below 75% last year and the 2022–25 average of 88%, with NWE at 63% and total EU storage at 70%.

[Commodity Market Positioning & Flows: OI and positioning hover near record highs](#)

The estimated value of open interest (OI) across tracked commodity markets remained broadly flat WoW at \$2.1 trillion, still hovering around record highs. Across all trader types, contract-based outflows totalled \$8 billion WoW, mainly from crude oil, copper and sugar. On the macro front, our economists highlight that central banks are moving toward a synchronized tightening cycle as persistent inflation and resilient growth make policy look less restrictive than thought, and markets are already pricing much of it ([Global Data Watch: For whom the bell tolls](#), Kasman et al, 18 September 2026).

Disclosures

History of Investment Recommendations:

A history of J.P. Morgan investment recommendations disseminated during the preceding 12 months can be accessed on the Research & Commentary page of <http://www.jpmorganmarkets.com> where you can also search by analyst name, sector or financial instrument.

Analysts' Compensation: The research analysts responsible for the preparation of this report receive compensation based upon various factors, including the quality and accuracy of research, client feedback, competitive factors, and overall firm revenues.

Company-Specific Disclosures: Important disclosures, including price charts and credit opinion history tables (if applicable), are available for compendium reports and all J.P. Morgan–covered companies, and certain non-covered companies, by visiting <https://www.jpmm.com/research/disclosures>, calling 1-800-477-0406, or e-mailing research.disclosure.inquiries@jpmorgan.com with your request.

Other Disclosures

J.P. Morgan is a marketing name for investment banking businesses of JPMorgan Chase & Co. and its subsidiaries and affiliates worldwide.

UK MIFID FICC research unbundling exemption: UK clients should refer to [UK MIFID Research Unbundling exemption](#) for details of J.P. Morgan's implementation of the FICC research exemption and guidance on relevant FICC research categorisation.

J.P. Morgan Research may, from time to time, write on issuers or securities targeted by economic or financial sanctions imposed or administered by the governmental authorities of the U.S., EU, UK or other relevant jurisdictions (Sanctioned Securities). Nothing in this report is intended to be read or construed as encouraging, facilitating, promoting or otherwise approving investment or dealing in such Sanctioned Securities. Clients should be aware of their own legal and compliance obligations when making investment decisions.

Digital assets, which may also be referred to as virtual or crypto assets or crypto currencies (e.g. bitcoin), discussed in this research report are subject to a rapidly changing regulatory landscape. The application of relevant laws in respect of such assets may be unsettled, and the legality of any digital asset investment may be unclear. Prior to making any investment decision regarding any digital asset, investors should seek their own legal advice and be aware of any legal considerations regarding the purchase, holding or selling of such an investment. For relevant regulatory advisories on digital assets, including bitcoin and ethereum, please see <https://www.jpmorgan.com/disclosures/cryptoasset-disclosure>.

The author(s) of this research report may not be licensed to carry on regulated activities in your jurisdiction and, if not licensed, do not hold themselves out as being able to do so.

Exchange-Traded Funds (ETFs): J.P. Morgan Securities LLC ("JPMS") acts as authorized participant for substantially all U.S.-listed ETFs. To the extent that any ETFs are mentioned in this report, JPMS may earn commissions and transaction-based compensation in connection with the distribution of those ETF shares and may earn fees for performing other trade-related services, such as securities lending to short sellers of the ETF shares. JPMS may also perform services for the ETFs themselves, including acting as a broker or dealer to the ETFs. In addition, affiliates of JPMS may perform services for the ETFs, including trust, custodial, administration, lending, index calculation and/or maintenance and other services.

Options and Futures related research: If the information contained herein regards options- or futures-related research, such information is available only to persons who have received the proper options or futures risk disclosure documents. Please contact your J.P. Morgan Representative or visit <https://www.theocc.com/components/docs/riskstoc.pdf> for a copy of the Option Clearing Corporation's Characteristics and Risks of Standardized Options or https://www.finra.org/sites/default/files/2020-08/Security_Futures_Risk_Disclosure_Statement_2020.pdf for a copy of the Security Futures Risk Disclosure Statement.

Changes to Interbank Offered Rates (IBORs) and other benchmark rates: Certain interest rate benchmarks are, or may in the future become, subject to ongoing international, national and other regulatory guidance, reform and proposals for reform. For more information, please consult: https://www.jpmorgan.com/global/disclosures/interbank_offered_rates

Private Bank Clients: Where you are receiving research as a client of the private banking businesses offered by JPMorgan Chase & Co. and its subsidiaries ("J.P. Morgan Private Bank"), research is provided to you by J.P. Morgan Private Bank and not by any other division of J.P. Morgan, including, but not limited to, the J.P. Morgan Corporate and Investment Bank and its Global Research division.

Legal entity responsible for the production and distribution of research: The legal entity identified below the name of the Reg AC Research Analyst who authored this material is the legal entity responsible for the production of this research. Where multiple Reg AC Research Analysts authored this material with different legal entities identified below their names, these legal entities are jointly responsible for the production of this research. Where more than one legal entity is listed under an analyst's name, the first legal entity is responsible for the production unless stated otherwise. Research Analysts from various J.P. Morgan affiliates may have contributed to the production of this material but may not be licensed to carry out regulated activities in your jurisdiction (and do not hold themselves out as being able to do so). Unless otherwise stated below in the legal entity disclosures, this material has been distributed by the legal entity responsible for production, or where more than one

legal entity is listed under the analyst's name, the first legal entity will be responsible for distribution. If you have any queries, please contact the relevant Research Analyst in your jurisdiction or the entity in your jurisdiction that has distributed this research material.

Any investment or investment activity to which this material relates is only available to UK relevant persons and will be engaged in only with UK relevant persons. A description of J.P. Morgan EMEA's policy for prevention and avoidance of conflicts of interest related to the production of Research can be found at the following link: [J.P. Morgan EMEA - Research Independence Policy](#).

U.S.: J.P. Morgan Securities LLC ("JPMS") is a member of the NYSE, FINRA, SIPC, and the NFA. JPMorgan Chase Bank, N.A. is a member of the FDIC. Material published by non-U.S. affiliates is distributed in the U.S. by JPMS who accepts responsibility for its content.

General: Additional information is available upon request. The information in this material has been obtained from sources believed to be reliable. While all reasonable care has been taken to ensure that the facts stated in this material are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) make no representations or warranties whatsoever to the completeness or accuracy of the material provided, except with respect to any disclosures relative to J.P. Morgan and the Research Analyst's involvement with the issuer that is the subject of the material. Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. There may be certain discrepancies with data and/or limited content in this material as a result of calculations, adjustments, translations to different languages, and/or local regulatory restrictions, as applicable. These discrepancies should not impact the overall investment analysis, views and/or recommendations of the subject company(ies) that may be discussed in the material. Artificial intelligence tools may have been used in the preparation of this material, including assisting in data analysis, pattern recognition, and content drafting for research material. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan's current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.

Confidentiality and Security Notice: This transmission may contain information that is privileged, confidential, legally privileged, and/or exempt from disclosure under applicable law. If you are not the intended recipient, you are hereby notified that any disclosure, copying, distribution, or use of the information contained herein (including any reliance thereon) is STRICTLY PROHIBITED. Although this transmission and any attachments are believed to be free of any virus or other defect that might affect any computer system into which it is received and opened, it is the responsibility of the recipient to ensure that it is virus free and no responsibility is accepted by JPMorgan Chase & Co., its subsidiaries and affiliates, as applicable, for any loss or damage arising in any way from its use. If you received this transmission in error, please immediately contact the sender and destroy the material in its entirety, whether in electronic or hard copy format.
