

The J.P. Morgan View

Macro Holds, Technicals Bite: Pricing the For-Longer Regime

- The fundamental macro backdrop received further validation this week with [September flash PMIs](#) stronger than expected across economies and sectors. The US remains the clearest outperformer, with the composite PMI consistent with a GDP growth of 4%ar in 3Q.
- Energy price action was volatile. Brent briefly dipped below \$100/bbl before rebounding in the \$100–110/bbl range on Middle East headlines and a [potential export ban](#) on refined petroleum products by the US administration.
- Stronger growth, coupled with energy price pressures, pushed terminal-rate pricing higher across DM central banks, [with the Norges Bank joining the hiking club](#) this week and delivering its first hike of this cycle.
- What stands out is the shape of the repricing. Typically, higher terminal rates are associated with a flatter money-market curve; instead, the recent move was accompanied by a steeper money-market curve. During [Wednesday's selloff](#), the belly underperformed.
- This dynamic may reflect expectations of policy rates staying “higher-for-longer” but may also reflect liquidation of intermediate-term received positions from investors fading the feasibility and durability of this hiking cycle, with our [Client Survey](#) suggesting real money remains quite long in belly duration. Thus, investors should be cautious in reading firm medium-term policy expectations in current prices.
- The summit between President Xi and President Trump has not delivered breakthrough headlines and does not look like a game-changer in the current macro narrative. The extension of the truce on tariffs between the US and China goes in the right direction for possible de-escalation but the lack of details leaves us cautious.
- Cross Asset Views – Equity markets remain stuck in a vacuum ahead of the October earnings season, with fragility arising from macro and geopolitical headlines. We remain constructive on the fundamental backdrop with a preference for the tech/AI complex, offering convexity on pullbacks and driving the rally on strong earnings delivery.
- US equities remain our top country call as the cleanest expression of AI capex and Mag-7 earnings. Next, we like Korea and Taiwan as “picks-and-shovels” beta to Nasdaq, then Japan on AI deployment. We remain constructive on Europe but we rank it lower given lighter AI index weight, and a larger negative beta to energy.
- In rates, the impact of higher terminal policy rates does not fully explain the recent cheapening of long-end yields across DM markets. The structural pressure of higher real yields from the “crowding-out” effect and a higher real rate of return from AI investment is dominating near-term cyclical effects.
- Money-market curves are too steep vs. terminal rate levels, a dynamic mostly driven by the persistent “for-longer” narrative in the intermediate sectors. We stay neutral with a bias to fade cheap valuations and a cross-market preference for German vs. US duration, although we [take profit](#)

Tech catches another bid as markets grapple with a higher for longer rate regime

Source: Bloomberg Finance L.P.

on our outright long 10Y Bund vs. UST and replace exposure via options (long Dec26 Bund calls vs. Dec26 Treasury calls).

- The enduring “higher-for-longer” rates narrative remains supportive of the dollar, and we continue to hold a bullish USD outlook, as it remains a high-yielding currency across DM, alongside a pro-carry stance favouring EM high yielders.
- In credit, rates volatility has been the negative factor impacting performance, but with a muted impact on the level of spreads. We remain constructive on credit as an asset class; we revised our US HY year-end spread target tighter to 315bp from 350bp.

Table 1: Core recommendations by asset class

Equities	Country: OW Eurozone, N Japan, UK. OW EM vs DM ex US. Sector: OW Technology, Comm Services, Utilities; Neutral Industrials, Cons. Staples, Cons. Discretionary, Financials, Health Care; UW Energy, Materials, Real Estate.
Bonds	DM Duration: In the US, hold 10s/20s/30s belly-cheapening butterflies. In Euro rates, take profit on long 10Y Germany vs. US and 2s/10s conditional bull steepeners via 3M receivers. Buy Dec26 Bund calls vs. Treasury, hold Dec26/Dec28 conditional bull flatteners and 10s/30s bull steepener, and short 3Mx30Y gamma. In the UK, stay long 3Mx10Y GBP gamma vs EUR gamma. In Scandinavia, pay Mar27 NOK FRA versus Euribor. In Japan, hold 2s/10s JGB curve steepeners. In AUS/NZ, receive AUD 3Yx2Y IRS, and hold NZD 2s/10s IRS steepeners. EM Duration: MW; OW Hungary, Colombia, Mexico, Paraguay while UW Thailand, Peru and Chile.
Credit	US HG: OW: Banks (US & Yankee), Finance Cos, Healthcare; UW: Autos, Consumer, Media, Retail. Euro HG: OW EUR IG vs EUR HY, OW 5y vs. sub-3y & over-7y, OW EUR IG vs. GBP IG, OW Corporate Hybrids vs Bank T2. EM: MW sovereigns and corporates.
Currencies	DM: Re-enter long NOK/SEK, take profit on short CAD/MXN. Stay long GBP vs. CHF & SEK. Stay long USD vs. DM low yielders (SEK, CAD), stay short CHF vs. AUD, NOK, USD, HUF basket and short SEK/JPY. EM: OW; OW CNH, COP, CZK, HUF, MXN, PYG and TRY while UW RSD and THB.
Commodities	Long: Gold, Copper, Aluminum, Silver, and Platinum. Short: Zinc.

Source: J.P. Morgan. New recommendations in bold.

The September flash PMIs highlight the strength of the macro backdrop, with gains across regions reinforcing the bull case for global growth. The US stands out as the clear outperformer, with the [composite PMI increasing to 58.4 from 56.0](#) in August. This marks its highest level since July 2021, driven by a robust Services print of 58.7 and a firm Manufacturing reading of 56.7, collectively consistent with 4% GDP growth in 3Q and representing upside risk to our current 3.5% forecast. The [Euro area composite also improved to 53.1](#), pointing to 1.7%ar growth, while the UK modestly declined to 51.7, a reminder that the recovery remains uneven at the margin. In aggregate, the [DM composite PMI climbed to 55.7](#), its highest level since 2021, consistent with a 2.6%ar expansion in DM GDP.

Stronger growth and firm energy prices have pushed terminal rate pricing higher across DM central banks, with the [Norges Bank](#) becoming the latest central bank to join the DM hiking cycle. Markets are now pricing +90bp, +96bp, +107bp and +95bp of additional hikes in the US, Euro area, UK and Japan, respectively, by December 2027, versus our monetary policy forecast of 1 more hike for the Fed (Dec-26), 2 more hikes for the ECB (Dec-26, Mar-27) and BoE (Nov-26, Feb-27) while we expect the BoJ to hike four more times (Dec-26, Apr-27, Jul-27 and Dec-27). While we are currently forecasting fewer hikes than the market, we recognize that sustained growth and price pressures provide [upside risk to our monetary policy forecasts](#).

Typically, higher terminal rates are associated with a flatter money-market curve. However, in the rates moves seen over the past week and, more broadly, since the beginning of the conflict, the bulk of the move occurred in the 1Yx1Y and 2Yx1Y parts of G4 rate curves (Figure 1) rather than in the 1Y sector. The underperformance in these forwards typically suggests a longer lasting cycle, but the underperformance in these buckets, as the peak is priced higher, also potentially suggests a positioning wash out from investors fading the feasibility and durability of this hiking cycle. This is also evident when looking at 1Y spot and forward curve showing that the peak in rates is not only higher but has also been sustained for longer in its recent repricing (Figure 2).

Similarly, a 5-year regression of the US money market curves highlights that the 2Yx1Y – 1Y SOFR spread appears too steep relative to the current level of short-end rates (Figure 3). This is also evident in the EUR and GBP curves, with the residuals of the 2Yx1Y – 1Y spread relative to its 1Y yield (in ESTR and SONIA, respectively) over the past 5 years, showing a similar pattern (Figure 4). This dynamic may reflect genuine market expectations of rates staying higher-for-longer given strong growth and the persistence of inflationary pressures, amid patient central banks. However, it could also be more the result of liquidation of received positions by investors who believe any DM cycle would be limited in size and short in time. Our [US Treasury Client Survey](#) showcases that real money investors remain long duration in the belly of the curve, suggesting potential risk of positions clean up in the recent move. Consequently, investors should be mindful when reading firm medium-term policy expectations in current prices as they can be skewed by positioning dynamics.

Figure 1: The bulk of the moves higher occurred in the 1Yx1Y and 2Yx1Y parts of the curve...

OIS Rate	Last	Chg over the past week; bp	Chg since beginning of the conflict; bp
USD 1Y	4.59%	12	117
USD 1Yx1Y	4.95%	26	196
USD 2Yx1Y	4.82%	26	174
USD 3Yx1Y	4.71%	23	145
EUR 1Y	3.15%	8	116
EUR 1Yx1Y	3.58%	21	159

Meanwhile, equity markets are stuck in a fundamentals vacuum, and we expect them to stay there until the October earnings season. In the absence of incremental fundamental catalysts, the market is being priced off discount rates and risk premia, leaving equities unusually susceptible to macro and geopolitical headlines. For equities, everything other than earnings is doing modest damage to sentiment: rates are higher, central banks are leaning hawkish, terminal expectations have been pushed up, oil is firm again, and geopolitical flare-ups continue without a sustained path to resolution. At this juncture, we find equity investors' sentiment quite cautious.

Rates are the cleanest drag. Higher long-end yields have reintroduced duration sensitivity and raised the hurdle for broad beta to compound, with the US 10Y yields pushing to around ~5.20%, and strong activity data keeping the "higher-for-longer" framing in play. Oil is a close second, not just directionally, but also via the inflation

channel, that keeps this rates regime alive, even when there are intermittent dips in diplomacy and supply optics. Geopolitics remain the volatility engine because headlines matter mainly through their feedback loop into energy and rates rather than through near-term earnings visibility. The offset is that October earnings should be a tech and AI checkpoint. If the delivery is strong, it could re-anchor leadership and keep the AI trade supported.

The AI policy narrative is turning incrementally more supportive of momentum into the Trump–Xi meeting, with the race framed explicitly through a US–China competitiveness lens. Trump has dismissed calls to slow the AI race, positioning leadership as the priority and arguing against anything that would hand the advantage to China. The practical message is light-touch oversight, with existing legal tools and DOJ monitoring as the backstop rather than a new regulatory regime that slows the cycle. This reinforces the market’s base case that policy is more likely to shape the perimeter than cap the pace, which is supportive for the AI complex and the capex-led growth narrative.

Our equity market pecking order remains led by the US, and it is still fundamentally a view on US tech. The US sits at the forefront of the AI investment cycle through hyperscaler capex, the Mag-7 earnings engine, and the depth of the ecosystem that is monetising the next leg of AI adoption. Beyond the US, our preference is Asia tech, with Korea and Taiwan as the picks-and-shovels expression of the AI trade and a cleaner beta to Nasdaq through semis and hardware exposure. This is also consistent with our [earlier PCA analysis](#) which we have refreshed below (Figure 5). We used the select MSCI EM country index 1M rolling total returns of China, Korea, Taiwan, India, South Africa, Brazil and Mexico and then look for market variables that are correlated with the first factor (PC1), which typically explains a larger proportion of the underlying variance. As noted in our prior publication, the explained variance ratio of the PCA’s first factor of EM equity returns is 46% and is correlated with the 1M rolling NASDAQ total returns.

Figure 5: The first factor is correlated with NASDAQ total returns

PCA 1 of select 1M rolling MSCI EM equity total returns in USD (China, Korea, Taiwan, India, South Africa, Brazil and Mexico) vs. 1M rolling NASDAQ total returns; Jan2025 - 2026 YTD

Outside the core AI complex, Japan sits next on our list. While Japan is not a substitute for US AI leadership, it is a leveraged beneficiary of the cycle through upstream enablers and second-order adoption. It has deep exposure to precision manufacturing, automation, sensors, robotics, and factory capex, which are the physical layer that scales AI into real productivity. If AI is moving from software excitement to real-world deployment, Japan is one of the few equity markets with credible breadth in the equipment and automation stack that enables that transition. Europe sits lower in our pecking order, but it remains a preferred market on an absolute basis. We see the macro and earnings backdrop as more positive for 2H26, but the constraint is index composition. The equity index is structurally underweight the AI winners, which leaves it more reliant on broad beta and cyclical momentum for outperformance in a regime where AI-linked leadership continues to dominate. Additionally, the larger negative beta to energy requires a decline in oil and gas prices for a more constructive outlook.

As we enter the eighth month of the US/Iran conflict, and, consequently, the eighth month of the disruption of normal traffic through the Strait of Hormuz, [US diesel prices have reached record highs](#) (\$6.50+/gal national average since September 19th) and [reopened conversations about a potential export ban](#) to help boost US supply and cap prices. Similar policies have already been implemented in Russia (outright ban on diesel, gasoline and jet fuel exports) and China (significant export quota cuts on refined petroleum products).

On paper, [restricting US diesel exports looks attractive](#): the US consumes ~3.6 mbd but exports ~1.3–1.6 mbd; keeping some barrels in the US could quickly rebuild inventories and lower wholesale prices and crack spreads. The problem is logistics: exports are concentrated on the Gulf Coast (81% of total August 2026 exports), and pipeline capacity cannot move enough diesel to the import-dependent East Coast. Waterborne transfers are constrained by the Jones Act and are operating under a temporary waiver that expires November 15th. Even with better logistics, roughly 1.1 mbd would still need

an outlet. Initially, that would be inventory building: at 1.1 mbd, stocks could return to the five-year average in ~two weeks; a 30-day restriction could add ~30 million barrels, lifting inventories to ~140 million barrels, likely pushing Gulf Coast prices/cracks down and spilling over to the East Coast (Table 2).

An export ban might ease diesel prices domestically, but only until inventories recover. After that, extra barrels would depress prices and crack spreads, make storage uneconomic, squeeze refinery margins, and force refineries to cut crude runs, thus reversing some of the initial relief. More importantly, repeated or even one-off export restrictions could make refiners doubt future access to global markets. Since US refining is sized and invested for exports, that uncertainty could deter long-term upgrades and expansion, gradually shrinking domestic refining capacity and shifting profits and activity abroad, ultimately weakening the strategic system that helps protect US consumers. Outside the US, countries reliant on imported US diesel would need to replace those barrels by sourcing supply elsewhere. Given tighter alternative availability and available trade routes, they would likely pay a higher marginal price for replacement volumes.

Table 2: Potential effects of a US diesel export ban on domestic diesel inventories and price

	Current	Forecast				Historical data		
	26-Sep	In 15 days	In 30 days	In 45 days	In 60 days	25-Sep	5 year avg (2021-2025)	Covid peak (Aug'20)

Source: Government agencies and J.P. Morgan Global Economics. Details on request. Note: For some emerging economies seasonally adjusted GDP data are estimated by J.P. Morgan. Bold denotes changes from last edition of Global Data Watch, with arrows showing the direction of changes. Underline indicates beginning of J.P. Morgan forecasts. Unless noted, concurrent nominal GDP weights calculated with current FX rates are used in computing our global and regional aggregates. Regional CPI aggregates exclude Argentina and Ecuador. Source: J.P. Morgan. Any long-form nomenclature for references to China; Hong Kong; and Taiwan within this research material is Mainland China; Hong Kong SAR (China) and Taiwan (China).

Analyst Certification: The Research Analyst(s) denoted by an “AC” on the cover of this report certifies (or, where multiple Research Analysts are primarily responsible for this report, the Research Analyst denoted by an “AC” on the cover or within the document individually certifies, with respect to each security or issuer that the Research Analyst covers in this research) that: (1) all of the views expressed in this report accurately reflect the Research Analyst’s personal views about any and all of the subject securities or issuers; and (2) no part of any of the Research Analyst’s compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the Research Analyst(s) in this report. For all Korea-based Research Analysts listed on the front cover, if applicable, they also certify, as per KOFIA requirements, that the Research Analyst’s analysis was made in good faith and that the views reflect the Research Analyst’s own opinion, without undue influence or intervention.

All authors named within this report are Research Analysts who produce independent research unless otherwise specified. In Europe, Sector Specialists (Sales and Trading) may be shown on this report as contacts but are not authors of the report or part of the Research Department.

Important Disclosures

An analyst listed on the front cover has personal holdings in digital or crypto assets.

Company-Specific Disclosures: J.P. Morgan does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. Important disclosures, including price charts and credit opinion history tables (if applicable), are available for compendium reports and all J.P. Morgan–covered companies, and certain non-covered companies, by visiting <https://www.jpmm.com/research/disclosures>, calling 1-800-477-0406, or e-mailing research.disclosure.inquiries@jpmorgan.com with your request.

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock’s expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts’ coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst’s coverage universe can be found on J.P. Morgan’s Research website, <https://www.jpmorganmarkets.com>.

J.P. Morgan Equity Research Ratings Distribution, as of July 04, 2026

	Overweight (buy)	Neutral (hold)	Underweight (sell)
J.P. Morgan Global Equity Research Coverage*	53%	36%	12%
IB clients**	83%	80%	73%
JPMS Equity Research Coverage*	51%	37%	12%
IB clients**	95%	92%	87%

*Please note that the percentages may not add to 100% because of rounding.

**Percentage of subject companies within each of the "buy," "hold" and "sell" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.

For purposes of FINRA ratings distribution rules only, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. Please note that stocks with an NR designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at <http://www.jpmorganmarkets.com>, contact the primary analyst or your J.P. Morgan representative, or email research.disclosure.inquiries@jpmorgan.com. For material information about the proprietary models used, please see the Summary of Financials in company-specific research reports and the Company Tearsheets, which are available to download on the company pages of our client website, <http://www.jpmorganmarkets.com>. This report also sets out within it the material underlying assumptions used.

History of Investment Recommendations:

A history of J.P. Morgan investment recommendations disseminated during the preceding 12 months can be accessed on the Research &

Commentary page of <http://www.jpmorganmarkets.com> where you can also search by analyst name, sector or financial instrument.

Analysts' Compensation: The research analysts responsible for the preparation of this report receive compensation based upon various factors, including the quality and accuracy of research, client feedback, competitive factors, and overall firm revenues.

Registration of non-US Analysts: Unless otherwise noted, the non-US analysts listed on the front of this report are employees of non-US affiliates of J.P. Morgan Securities LLC, may not be registered as research analysts under FINRA rules, may not be associated persons of J.P. Morgan Securities LLC, and may not be subject to FINRA Rule 2241 or 2242 restrictions on communications with covered companies, public appearances, and trading securities held by a research analyst account.

Other Disclosures

J.P. Morgan is a marketing name for investment banking businesses of JPMorgan Chase & Co. and its subsidiaries and affiliates worldwide.

UK MIFID FICC research unbundling exemption: UK clients should refer to [UK MIFID Research Unbundling exemption](#) for details of J.P. Morgan's implementation of the FICC research exemption and guidance on relevant FICC research categorisation.

All research material made available to clients are simultaneously available on our client website, J.P. Morgan Markets, unless specifically permitted by relevant laws. Not all research content is redistributed, e-mailed or made available to third-party aggregators. For all research material available on a particular stock, please contact your sales representative.

Any long form nomenclature for references to China; Hong Kong; Taiwan; and Macau within this research material are Mainland China; Hong Kong SAR (China); Taiwan (China); and Macau SAR (China).

J.P. Morgan Research may, from time to time, write on issuers or securities targeted by economic or financial sanctions imposed or administered by the governmental authorities of the U.S., EU, UK or other relevant jurisdictions (Sanctioned Securities). Nothing in this report is intended to be read or construed as encouraging, facilitating, promoting or otherwise approving investment or dealing in such Sanctioned Securities. Clients should be aware of their own legal and compliance obligations when making investment decisions.

Digital assets, which may also be referred to as virtual or crypto assets or crypto currencies (e.g. bitcoin), discussed in this research report are subject to a rapidly changing regulatory landscape. The application of relevant laws in respect of such assets may be unsettled, and the legality of any digital asset investment may be unclear. Prior to making any investment decision regarding any digital asset, investors should seek their own legal advice and be aware of any legal considerations regarding the purchase, holding or selling of such an investment. For relevant regulatory advisories on digital assets, including bitcoin and ethereum, please see <https://www.jpmorgan.com/disclosures/cryptoasset-disclosure>.

The author(s) of this research report may not be licensed to carry on regulated activities in your jurisdiction and, if not licensed, do not hold themselves out as being able to do so.

Exchange-Traded Funds (ETFs): J.P. Morgan Securities LLC ("JPMS") acts as authorized participant for substantially all U.S.-listed ETFs. To the extent that any ETFs are mentioned in this report, JPMS may earn commissions and transaction-based compensation in connection with the distribution of those ETF shares and may earn fees for performing other trade-related services, such as securities lending to short sellers of the ETF shares. JPMS may also perform services for the ETFs themselves, including acting as a broker or dealer to the ETFs. In addition, affiliates of JPMS may perform services for the ETFs, including trust, custodial, administration, lending, index calculation and/or maintenance and other services.

Options and Futures related research: If the information contained herein regards options- or futures-related research, such information is available only to persons who have received the proper options or futures risk disclosure documents. Please contact your J.P. Morgan Representative or visit <https://www.theocc.com/components/docs/riskstoc.pdf> for a copy of the Option Clearing Corporation's Characteristics and Risks of Standardized Options or https://www.finra.org/sites/default/files/2020-08/Security_Futures_Risk_Disclosure_Statement_2020.pdf for a copy of the Security Futures Risk Disclosure Statement.

Changes to Interbank Offered Rates (IBORs) and other benchmark rates: Certain interest rate benchmarks are, or may in the future become, subject to ongoing international, national and other regulatory guidance, reform and proposals for reform. For more information, please consult: https://www.jpmorgan.com/global/disclosures/interbank_offered_rates

Private Bank Clients: Where you are receiving research as a client of the private banking businesses offered by JPMorgan Chase & Co. and its subsidiaries ("J.P. Morgan Private Bank"), research is provided to you by J.P. Morgan Private Bank and not by any other division of J.P. Morgan, including, but not limited to, the J.P. Morgan Corporate and Investment Bank and its Global Research division.

Legal entity responsible for the production and distribution of research: The legal entity identified below the name of the Reg AC Research Analyst who authored this material is the legal entity responsible for the production of this research. Where multiple Reg AC Research Analysts authored this material with different legal entities identified below their names, these legal entities are jointly responsible for the production of this research. Where more than one legal entity is listed under an analyst's name, the first legal entity is responsible for the production unless stated otherwise. Research Analysts from various J.P. Morgan affiliates may have contributed to the production of this material but may not be

licensed to carry out regulated activities in your jurisdiction (and do not hold themselves out as being able to do so). Unless otherwise stated below in the legal entity disclosures, this material has been distributed by the legal entity responsible for production, or where more than one legal entity is listed under the analyst's name, the first legal entity will be responsible for distribution. If you have any queries, please contact the relevant Research Analyst in your jurisdiction or the entity in your jurisdiction that has distributed this research material.

Material relating to equity securities is issued and distributed in Taiwan by J.P. Morgan Securities (Taiwan) Limited, subject to the license scope and the applicable laws and the regulations in Taiwan. **To the extent that J.P. Morgan Securities (Taiwan) Limited produces research materials on securities not listed on the Taiwan Stock Exchange or Taipei Exchange ("Non-Taiwan Listed Securities"), these materials shall not constitute securities recommendations for the purpose of applicable Taiwan regulations, and, for the avoidance of doubt, J.P. Morgan Securities (Taiwan) Limited does not act as broker for Non-Taiwan Listed Securities.** According to Paragraph 2, Article 7-1 of Operational Regulations Governing Securities Firms Recommending Trades in Securities to Customers (as amended or supplemented) and/or other applicable laws or regulations, please note that the recipient of this material is not permitted to engage in any activities in connection with the material that may give rise to conflicts of interests, unless otherwise disclosed in the "Important Disclosures" in this material.

Thailand: This material is issued and distributed in Thailand by JPMorgan Securities (Thailand) Ltd., which is a member of the Stock Exchange of Thailand and is regulated by the Ministry of Finance and the Securities and Exchange Commission. The registered address is 548 One City Center Building, 50th Floor, Ploenchit Road, Lumpini, Pathum Wan, Bangkok 10330.

UK: Research is produced in the UK by J.P. Morgan Securities plc ("JPMS plc") which is a member of the London Stock Exchange and is authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority or J.P. Morgan Markets Limited ("JPML Ltd") which is authorised and regulated by the Financial Conduct Authority. Unless specified to the contrary, this material is distributed in the UK by JPMS plc and is directed in the UK only to: (a) persons having professional experience in matters relating to investments falling within article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) (Order) 2005 ("the FPO"); (b) persons outlined in article 49 of the FPO (high net worth companies, unincorporated associations or partnerships, the trustees of high value trusts, etc.); or (c) any persons to whom this communication may otherwise lawfully be made; all such persons being referred to as "UK relevant persons". This material must not be acted on or relied on by persons who are not UK relevant persons. Any investment or investment activity to which this material relates is only available to UK relevant persons and will be engaged in only with UK relevant persons.

A description of J.P. Morgan EMEA's policy for prevention and avoidance of conflicts of interest related to the production of Research can be found at the following link: [J.P. Morgan EMEA - Research Independence Policy](#).

U.S.: J.P. Morgan Securities LLC ("JPMS") is a member of the NYSE, FINRA, SIPC, and the NFA. JPMorgan Chase Bank, N.A. is a member of the FDIC. Material published by non-U.S. affiliates is distributed in the U.S. by JPMS who accepts responsibility for its content.

General: Additional information is available upon request. The information in this material has been obtained from sources believed to be reliable. While all reasonable care has been taken to ensure that the facts stated in this material are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) make no representations or warranties whatsoever to the completeness or accuracy of the material provided, except with respect to any disclosures relative to J.P. Morgan and the Research Analyst's involvement with the issuer that is the subject of the material. Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. There may be certain discrepancies with data and/or limited content in this material as a result of calculations, adjustments, translations to different languages, and/or local regulatory restrictions, as applicable. These discrepancies should not impact the overall investment analysis, views and/or recommendations of the subject company(ies) that may be discussed in the material. Artificial intelligence tools may have been used in the preparation of this material, including assisting in data analysis, pattern recognition, and content drafting for research material. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and responsibilities that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan's current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.
