

EM Corporate Weekly Monitor

Living with 5% rates, adjusting CEMBI spread tighter to 160bp

- Rates continued the relentless upward trend with most of the UST curve now above 5%, but CEMBI spreads partially absorbed the rate move to outperform other credit indices. Robust economic data coupled with unease over inflation, higher oil prices, and the debt trajectory are contributing to the bear flattening of the UST curve, with the 2-year yield having gone up by 70bp+ and 10-year by almost 50bp since mid-August. With most of the UST curve over 5% except for the front end, the low rate environment that has prevailed for close to two decades looks to have firmly transitioned to a normalized level consistent with the pre-crisis levels. The question is whether rates have reached a near-term peak or will rise further in which case the extent and speed would affect market sentiment, credit market returns, and the direction of spreads.
- CEMBI spread is -2bp tighter so far this week, reaching another post-crisis tight of 151bp during the week before widening slightly to 153bp. The WTD return is -0.48%, but still held up better than other EM and US credit. Our baseline expectation remains for better resilience in EM corporates due to the shorter duration, higher breakevens, better fundamentals and lower external vulnerability (*Who's Afraid of Big Rising Rates?*).
- We revise our end-2026 CEMBI BD spread target tighter to 160bp from 180bp to reflect the higher rates, with the assumption that the macro backdrop of resilient growth remains in place and keeps corporate fundamentals intact. Our US rate strategy team increased UST yield forecasts last week (*note*) after the Fed rate hike, and now expect 7-year and 10-year UST to end the year at 5.00% and 5.05% respectively. Our CEMBI full-year 2026 return expectation falls to +3.1% from +3.8% previously, implying +1.9% additional return for the rest of the year.
- On the technical side, EM hard currency bond fund flows turned negative in recent weeks, but new issuance has also been contained.
- J.P. Morgan hosted its 2026 Emerging and Frontier Markets Opportunities Conference in London on 15-17 September. Please see [here](#) for the main takeaways and summary of panel discussions
- According to our *September EM Client Survey*, positioning in EM corporates stabilized with a marginal +0.01 m/m increase in the score to -0.61. A modest addition by dedicated (+0.02 m/m to -0.52) investors was offset by reductions by crossover (-0.03 m/m to -2.46) and trading (-0.06 m/m to -0.54) accounts.
- Potential catalysts: Macro – Euro area Consumer conf., US Consumer conf., US JOLTS, Kazakhstan GDP (9/29), China PMI Mfg., Czech Rep. GDP, US ADP Employment, US GDP, Colombia rates (9/30), US Employment (10/2).

Market Strategy

Rates continued the relentless upward trend with most of the UST curve now above 5%, but CEMBI spreads partially absorbed the rate move to outperform other credit indices. Robust economic data coupled with unease over inflation, higher oil prices, and the debt trajectory are contributing to the bear flattening of the UST curve, with the 2-year yield having gone up by 70bp+ and 10-year by almost 50bp since mid-August. With most of the UST curve over 5% except for the front end, the low rate environment that has prevailed for close to two decades looks to have firmly transitioned to a normalized level consistent with the pre-crisis levels. The question is whether rates have reached a near-term peak or will rise further, in which case the extent and speed would affect market sentiment, credit market returns, and the direction of spreads.

CEMBI spread is -2bp tighter so far this week, reaching another post-crisis tight of 151bp during the week before widening slightly to 153bp. The WTD return is -0.48% which would be the weakest since March this year, but this is still only about half of the negative return compared to EMBIG Div. (-2bp to 170bp, -0.94%) and GBI-EM GD (-0.94%). Moreover, CEMBI BD IG (-3bp to 93bp, -0.55%) and HY (-3bp to 274bp, -0.38%) also held up better than US HG (unchanged 89bp, -1.05%) and US HY (+8bp to 312bp, -0.74%) though we will need to be mindful of the potential repercussions from a more widespread risk aversion on spread products in case the increase in rates negatively affects sentiment more broadly. This is despite our baseline expectation for better resilience in EM corporates due to the shorter duration, higher breakevens, better fundamentals and lower external vulnerability ([Who's Afraid of Big Rising Rates?](#)).

Figure 2: ... with CEMBI spread at tightest since 2007

CEMBI BD long-term spread and yield

Source: J.P. Morgan.

We revise our end-2026 CEMBI BD spread target tighter to 160bp from 180bp to reflect the higher rates, with the assumption that the macro backdrop of resilient growth remains in place and keeps corporate fundamentals intact. Our US rate strategy team increased UST yield forecasts last week ([note](#)) after the Fed rate hike, and now expect 7-year and 10-year UST to end the year at 5.00% and 5.05% respectively. This is 45bp higher than the assumptions we used for our spread and return forecasts previously, leading us to factor in some partial spread offset and lower our spread target to our positive case scenario of 160bp. Due to the larger magnitude of UST rate revision, our CEMBI full-year 2026 return expectation falls to +3.1% from +3.8% previously. With the YTD return at +1.2%, this implies +1.9% additional return for the

rest of the year. We also reset our positive case scenario lower to 120bp to 130bp area, which would bring spreads back to the all time tightness recorded in 2007 and lift returns to the mid-4% area. A negative case of spreads widening to the high 200bp spectrum would drag down returns to about -1.5% to -2.0%. If the spread widening is driven by growth slowdown fears, there would be some offset from falling rates, which could keep returns in a positive territory.

Figure 3: UST yield forecasts revised higher, with 7-year increased by +45bp

Source: J.P. Morgan

Our tighter spread assumption is driven solely by CEMBI HY where we revise the spread target to 290bp from 350bp while we leave CEMBI IG unchanged at 95bp. CEMBI HY has outperformed meaningfully YTD with +4.0% return versus -0.7% for IG, and we recently revised down our default forecast to 3.1% from 4.3% ([note](#)). Moreover, we expect a benign default rate of around 3% to be maintained as we look forward into next year, which should enable spreads to be stable at compressed levels. Our full-year 2026 return forecast for CEMBI HY is almost unchanged at +5.7% as the spread revision offsets the change in rate assumption. For CEMBI IG, the return expectation is cut to +1.4% from +2.6% previously.

Figure 5: Maintain IG spread target at 95bp, return forecast down to +1.4%

On the technical side, EM hard currency bond fund flows turned negative in recent weeks, but new issuance has also been contained. We had expected a very active September, and while the \$44bn MTD pace with one week left suggests that the monthly tally will exceed the \$48bn average for the month, it is likely to fall short of the \$66bn from September 2025. Despite the high level of anticipation for a surge in supply, issuer appetite looks to have been tempered by the continued rise in rates, making them take a wait and see approach. At the same time, bond returns are getting eroded, and fund flows have come under pressure.

Figure 7: September issuance tempered by rate volatility

EM corporate weekly supply

Source: J.P. Morgan., BondRadar

EM fixed income fund flows were negative for the second consecutive week with outflows of -\$424mn over the past two weeks ([note](#)). The outflows were led by hard currency funds at -\$936mn whereas local currency funds posted inflows of +\$511mn. So far this year, EM fixed income funds have received \$34.7bn in inflows, exceeding full-year 2025 (\$30.9bn). This is fairly evenly split between hard currency (\$15.1bn) and local currency (\$19.6bn). Most of the inflows are into retail funds (\$30.0bn) whereas strategic (\$4.6bn) looks to be lagging, but there is room for strategic inflows to see meaningful increase given the data is not captured on a high-frequency basis.

Despite the overall inflow into EM fixed income funds, EM corporate dedicated retail funds remain at a small outflow YTD. Our view has been that EM corporate funds have a meaningful strategic allocation, and that looking at retail funds tends to understate the flows. Nevertheless, the weakness in retail fund flows shows that one aspect of demand sentiment is still muted. We think allocations to EM corporates within global bond and EM funds are still active, and local investors continue to support bonds from their regions, especially in Asia and the Middle East. As a result, EM corporate new issuances have benefited from favorable technicals, and we expect our upwardly revised supply forecast ([note](#)) to be digested without major issues.

Figure 8: EM bond funds getting solid inflows this year ...

Cumulative EM bond fund flows (retail + strategic), USD billion

Figure 9: ... but corporate dedicated flows lackluster

EM corporate focused retail fund flows, USD billion

Source: (both) J.P. Morgan, EPFR Global, Bloomberg Finance L.P.

On the macro side, our economists [note](#) that renewed global pressure pushes up inflation broadly, and such strengthening of common inflation impulses supports a more synchronized monetary tightening cycle. They have revised 2026 headline CPI forecasts up by roughly 1%-pt on average, with revisions spanning nearly every economy that is tracked. A persistent energy shock is one of several sources raising global goods prices, as supply bottlenecks, firmer commodity prices, and strong demand should interact to deliver a sharp acceleration in core goods price inflation to a 2.5%ar pace. Services disinflation should end as strong demand raises pricing power and labor market tightening turns the tide on wages. PMI surveys indicate that technology, energy, and transport costs will also feed through to service prices.

Indeed, recent central bank developments continue the string of hawkish shifts, both from central bankers and in their forecasts ([note](#)). An unexpected hike from Norges Bank, hawkish forward guidance from the Riksbank, and a step towards a more flexible approach from Banxico comes against a global backdrop of an uplift in demand and strengthening common inflation impulses. Hence, our economists have upwardly adjusted their rate forecasts in both Norway and Sweden, taking rates beyond central bank projections.

Takeaways from the Emerging and Frontier Markets Opportunities Conference

J.P. Morgan hosted its 2026 Emerging and Frontier Markets Opportunities Conference in London on 15-17 September. The conference had close to 900 investor attendees, a 10% increase from last year, with 20 sovereign and 129 corporate issuers participating. We summarize the top takeaways from the panel discussions below. These sessions were held under Chatham House rules, and the views presented are those of the conference participants and do not necessarily coincide with J.P. Morgan's Global Research views. Please see [here](#) for more details regarding the global themes driving EM sovereigns, EM corporates and frontier markets, as well as takeaways from the regional panel discussions.

Macro uncertainty is met by expectations of near-term resilience on the back of stable fundamentals and supportive technicals, but conviction levels do not seem to be high. Despite clouds of worries around rates and the sustainability of AI investments, conference participants were overall constructive with comfort on fundamentals for both EM sovereigns and corporates with an attractive level of yields still seen as a reason to stay invested.

In sovereigns, we had record participation from government and central bank delegations, with well attended sessions on the outlook for ratings and the current state of the sovereign debt restructuring architecture. The overall tone for sovereigns was constructive despite the tight spread environment, but with investors searching for the next major catalyst. Frontier local markets remain the most compelling in many investors' eyes. This is because many countries have been helped by reform momentum (more flexible FX regimes and liberalisation) that supports local-currency debt's appeal during periods of shocks, but the opportunity set is increasingly constrained by currencies that have already rallied and bond yields that have already declined.

On the corporate side, strong earnings growth, stabilized defaults, and upward rating trajectory provide comfort on overall fundamentals, with investors trying to find opportunities amidst compressed spreads. The tight spreads in IG are keeping most dedicated investors focused more on HY segments, but asset allocators and crossover accounts continue to be involved given the steady performance and diversification from DM.

EM Client Survey - September 2026

According to our [September EM Client Survey](#), positioning in EM corporates stabilized with a marginal +0.01 m/m increase in the score to -0.61. A modest addition by dedicated (+0.02 m/m to -0.52) investors was offset by reductions by crossover (-0.03 m/m to -2.46) and trading (-0.06 m/m to -0.54) accounts. The rapid rise in rates over the past month is leading to some caution and is likely to keep positioning close to home, but credit spreads are so far holding up. However, continued negative returns from higher rates could lead to a negative turn in fund flows.

Stable positioning amidst higher rates

EM Corporate Exposure

Source: J.P. Morgan.

Mixed trend in country level allocations

Largest 1m chgs: Corp + Bank Av.

Source: J.P. Morgan.

There were not many outsized country level allocation shifts, but somewhat more activity in corporates than banks. The biggest additions among corporate segments were in South Africa (+0.3 m/m to -0.9), Argentina (+0.3 m/m to 0.9), and Turkey (+0.2 m/m to 0.2), with cuts concentrated in Latin America including Brazil (-0.2 m/m to 2.8) and Colombia (-0.2 m/m to 2.4). In banks, only Brazil (+0.2 m/m to -1.1), and Turkey (+0.2 m/m to -0.4) had meaningful moves.

Special questions: Brazil will hold general elections in October. Investors think FX will be the asset class experiencing the biggest moves as a result of the election. A majority expect to see post-election measures leading to some fiscal consolidation. Most surveyed investors currently allocate capital to frontier local markets, and a majority of these intend to increase their allocation.

The J.P. Morgan EM Client Survey is a unique monthly survey that captures positioning across 200+ EM fixed income and currency assets. We have run the survey on a monthly basis since 2001, and our current participant pool includes benchmarked EM investors, crossover players, and hedge funds. Only participants receive the full results, including custom reports comparing their exposures to the rest of the market. In addition to positioning, the survey also captures investor sentiment and views on topical themes using qualitative polling. Participants in the survey are sent a link typically around the third week of each month, with the survey period running from Monday to Wednesday and results published on Thursday. For timely and comprehensive access to the full EM Client Survey results, please contact your J.P. Morgan sales representative or email JPMorgan_EM_Client_Survey@jpmorgan.com to be onboarded as a participant.

CEMBI index month-end rebalancing will take place on September 30, 2026 ([link](#)).

Abu Dhabi Future Energy Co Pjsc (MASDAR) is expected to exit the CEMBI index suite at the September month-end rebalance as it is now owned by three Abu Dhabi state-owned entities: TAQA, ADNOC, and Mubadala Investment Company. The issuer is now classified as 100% government-owned quasi sovereign and is not eligible for the corporate indices. With \$2.75bn of indexed debt, MASDAR represents 15bps in the CEMBI Broad Diversified.

In the JACI index, a \$3bn double-tranche offering from the Republic of Pakistan (PKSTAN) is expected to enter the JACI with a combined weight of 34bps. As a result, the Index weight of Pakistan is expected to increase by 34bps to 1.15% in the JACI and by 48bps to 1.67% in the JACI Diversified, at the month-end rebalance. Additionally, NABFID's debut \$750mn issuance (National Bank for Financing Infrastructure and Development, USY6202CAX75) is expected to be added at the month-end JACI rebalance, with an estimated weight of 9bps in the JACI and 12bps in the JACI Diversified. Please see [here](#) for more information.

On the index analytics side, defaulted securities (trading flat by market convention) continue to contribute to index returns (NAV), but have been excluded in the aggregation of headline index analytics, such as yield, spread, duration, and related measures. The transition to the new headline analytics resulted in a one-time spread tightening of approximately 25bps for the EMBIG Div on September 4th, 2026. For more information, see the announcement [Enhancements to Bond Level Analytics for EM Credit Indices](#).

Launch of GBI-EM Edge: The GBI-EM Edge (EDGE) is the latest addition to the GBI-EM suite of indices tracking the performance of local-currency denominated government debt from frontier economies. The index tracks the performance of ~US \$328bn in debt across 425 instruments spanning 26 markets and 24 currencies and is characterized by markets with high nominal carry and gradually improving access for international investors. For additional information, see [Introducing GBI-EM Edge: Indexing Frontier Local-Currency Debt Markets](#).

Source: (both tables) J.P. Morgan. Relative performance versus relevant index or sub-index. Performance since entry date, based on COB CEMBI level pricing. Spread changes may be reflected by sector rebalancing (i.e., removals due to factors such as maturity or default and additions due to new issues).

We launched our CEMBI segment framework in September 2023 ([link](#)) to highlight conviction calls across segments based on CEMBI Broad Diversified. The framework reflects our individual single-name analyst views, coupled with a top-level overlay that is consistent with the Global EM corporate strategy view consisting of CEMBI eligible bonds. The framework considers J.P. Morgan's economic and sovereign views as well as technical and valuation considerations. These recommendations are short term in nature (no more than 12 months but usually between three and six months) and are introduced and closed out in CEMBI Segment Recommendations, EM Corporate Weekly Monitor, and EM Corporate Strategy Daily. The output of the framework is available in our [EM Corporate Weekly Monitor](#) as well as [EMOS](#). We measure performance for both ongoing and closed recommendations based on absolute and relative spread compression and spread return. Relative performance is measured against the relevant sub-index of the CEMBI index.

Segment Recommendations – Log (source: JPM)

Date	Description	Links
Past changes		
September 11, 2026	Added CEMBI Mongolia and CEMBI India Non-Bank Financials to OWs. Moved CEMBI Telecom to UW.	Link

September 9, 2026	Within Asia, downgraded Asia IG to UW by shifting CEMBI Asia Tech and Asia Internet/E-comm segments to UW. Additionally, took profits on UW India IG call, moving the segment to Neutral.	Link
June 25, 2026	Take profit on OWs in the oil & gas segments, including Argentina, Colombia, Oil & Gas HY (ex. Quasi), Latam O&G HY and BR Energy Services.	Link
June 5, 2026	Upgraded Colombia, Kazakhstan, Saudi Arabia, Oil & Gas HY (ex. Quasi), MX Real Estate and UAE HY segments to OW, while moving Thailand and TH Oil & Gas to Neutral from UW. Downgraded China IG space to UW, in addition to taking profits in Utilities, Asia Utils, ME Real Estate, India HY, TR Industrials, TR Transport and TR Utils by moving Neutral from OW.	Link
May 21, 2026	Downgraded CEMBI Metals & Mining (M&M) to N from OW	Link
April 17, 2026	Reestablished our CEMBI TR and Latin America Transport OWs.	Link
April 8, 2026	Moved CEMBI Middle East from UW to Neutral, and upgraded CEMBI Saudi Arabia, Qatar, Kuwait as well as CEMBI single-A and double-A rated segments from UW to Neutral. Moved Middle East real estate to OW.	Link
March 2, 2026	Downgraded CEMBI Transport HY (including Latam Transport and TR Transport) to N, upgraded Latam oil & gas to OW and CEMBI Asia and China IG Neutral.	Link
February 11, 2026	Added UWs in CEMBI Chile and MX Consumer and OWs in CEMBI TR Industrial segments	Link
January 29, 2026	Moved tactically Neutral high beta CEMBI oil UWs including HY oil & gas (ex quasis) and Africa oil & gas.	Link
November 25, 2025	Upgraded CEMBI BD BBB, CEMBI BD BB, Ukraine, Metals/Mining, Transport HY, Latam Transport and TR Transport to OW from N. Moved to N from OW on ME pipelines and downgraded CEMBI BD AA to UW from OW. Added UWs in Asia, Middle East, CEMBI BD A, China IG, Kuwait, Saudi Arabia, Qatar and Thailand. Lastly, upgraded EM Paper/Pkg, Latam Consumer, ME Fin Subs, ME Real Estate, BR Paper/Pkg and MX Metals/Mining to N from UW.	Link
October 9, 2025	Moved CEMBI Peru N from UW.	Link
September 26, 2025	Upgraded CEMBI AR to OW from Neutral.	Link
September 8, 2025	Moved CEMBI HY, CEMBI MidEast BBB, Kuwait and BR financials to N (from UW), added an OW in CEMBI India HY and downgraded India IG to UW (from N) and IN Infra to N (from OW).	Link
August 19, 2025	Downgraded CEMBI Oil & Gas HY (ex. Quasi) and Africa O&G to UW from Neutral.	Link
July 10, 2025	Took profits on CEMBI Asia Energy and CEMBI India (OW to N), moved Paper/Pkg, BR Paper/Pkg and MX Metals/Mining UW and re-introduced an UW in TH O&G.	Link
June 13, 2025	Downgraded Middle East real estate to UW from Neutral and upgraded Mexico utilities to OW from Neutral.	Link
June 5, 2025	Added an OW in Mexico sub debt financials and lowered CEMBI Kuwait to UW.	Link
May 30, 2025	Downgraded CEMBI Middle East BBB to UW from Neutral	Link
May 15, 2025	Added OW in CEMBI BD AA, India, Asia Energy and BR Energy Serv. Moved to UW on Peru, Latam Consumer and MidEast Fin Subs. Move to N Thai Oil & Gas from UW.	Link
May 12, 2025	Upgraded Metals & Mining, Africa M&M and BR M&M IG to N from UW.	Link
April 11, 2025	Moved to N on Nigeria ex. Dev Bks and Africa TMT from OW. Upgraded UAE, Kuwait, MidEast Utils, UAE Fins, Chile Consumer and Chile Utils to N.	Link
April 3, 2025	Moved CEMBI HY to UW from N and CEMBI Asia Gaming to N from OW	Link
March 21, 2025	Downgraded Indonesia Utils from OW to N	Link
March 6, 2025	Added UW in Africa metals/mining	Link
February 21, 2025	Downgraded from OW to N Latam Utils, Peru financials; Also downgraded from N to UW Chile consumer, Chile utilities.	Link
February 6, 2025	Added CEMBI Turkish Utilities to OW.	Link
November 25, 2024	Downgraded from OW to N CEMBI single-As, ME O&G, and KR fins, CEMBI Indo IG; Downgrade to UW from N CEMBI UAE, BR fins, and TH O&G; and switched out of ME utilities ex. pipelines (UW) into ME pipelines (OW). Also downgraded CEMBI M&M and BR M&M IG to UW.	Link
November 6, 2024	Moved CEMBI Industrial and CEMBI MX Industrial to Neutral from OW	Link
October 10, 2024	Downgraded Ukraine and Latam BB TMT to N.	Link
October 8, 2024	Upgraded Peru Financials to OW	Link
September 27, 2024	Upgraded CEMBI Asia gaming to OW	Link
September 13, 2024	We added CEMBI As to OW, upgraded Indo HY from UW to N, and added CEMBI Latam TMT BB OW	Link
September 6, 2024	Took down metals & mining to Neutral from OW.	Link
August 5, 2024	Took our TR, IL, Africa O&G, MO and MO gaming, ID Consum from OW to N, which took us closer to N across regions	Link

July 22, 2024	Closed out India O&G and Mexico consumer UWs and add OWs in industrials broadly, and MX industrials specifically. Removed CEMBI 10s30s flattener for steep curves.	Link
June 20, 2024	Removed both Brazil IG OW and Peru IG UW to Neutral	Link
May 31, 2024	Upgraded CEMBI TR and TR Fin Subs to OW.	Link
May 20, 2024	Moved Neutral CEMBI Uzbek financials from OW.	Link
May 15, 2024	Moved CEMBI TMT and CEMBI Chile back to Neutral from UW	Link
April 29, 2024	Upgraded CEMBI Egypt from UW to Neutral	Link
April 23, 2024	Downgraded CEMBI Thailand to N from OW and CEMBI Peru IG to UW, thereby moving CEMBI Peru N overall and upgraded CEMBI Brazil IG to OW	Link
April 4, 2024	Moved back OW CEMBI TR corps, upgraded CEMBI IL corps to OW from N, and tactically upgraded CEMBI M&M to OW, took down India HY and India Utilities to N from OW. Took PH UW to N and also broadened CEMBI Africa O&G OW to ME&A and moved GH to N from OW	Link
February 23, 2024	Downgraded ID HY to UW, moved Peru and Latam Utils to OW and removed BR Cons and Latam O&G quasi from UW	Link
January 22, 2024	We continue to rotate and trim selectively; lower KW to UW from N, ZA and Africa Industrials from OW to N. Offsetting this, we shifted OW NG, Africa TMT, and UZ fins.	Link
January 12, 2024	We neutralized a number of our segment OWs. In Asia, we turned MW Singapore and India financials. In CEEMEA, we turned MW Saudi corps and tactically trimmed Turkish corp OWs. In Latin America, we shifted MW Mexico financial subs and Peru financials, BR steel, and Latam BB TMT. We also reduced Latam Utilities OW (HY portion remained OW). Turned UW Chile corps and broadened UW in Brazil oil & gas to an UW in Latam oil & gas quasias. Lastly, neutralized Mexico TMT UW.	Link
November 21, 2023	We refresh our CEMBI segment recommendations for 2024 outlook with a number of shifts in regional, country and sector views	Link
November 20, 2023	We downgrade Colombia Independent E&P to Neutral from OW	Link
November 14, 2023	Upgrade Turkish corporates to OW	Link
October 13, 2023	Remaining N but reshuffling regional allocations – Middle East IG to N from OW, LatAm IG to N from UW	Link
October 3, 2023	Downgrade CEMBI Morocco Industrial to Neutral	Link
September 28, 2023	Downgrade CEMBI Africa IG TMT to Neutral	Link
September 19, 2023	New visualization of our CEMBI calls	Link

Primary Market Activity

See [EM Corporate Supply Technicals](#) for more details on supply trends.

EM corporate new issuance was moderate in the past two weeks (September 11-September 24) with \$13bn priced. The robust start to the month, which saw \$31bn priced in the first ten days, did not continue amidst rising oil prices and the sell-off in rates which kept primary market activity limited. By region, about two-thirds of the issuance was from Asia (\$8bn), driven by IG-rated names from Korea (\$5bn). Activity in other regions was limited to about \$1-2bn of new supply apiece. The share of IG-rated supply in the past two weeks (68%) ended slightly below the 72% YTD trend.

New issuance – use of proceeds

Disclosures

Analyst Certification: The Research Analyst(s) denoted by an “AC” on the cover of this report certifies (or, where multiple Research Analysts are primarily responsible for this report, the Research Analyst denoted by an “AC” on the cover or within the document individually certifies, with respect to each security or issuer that the Research Analyst covers in this research) that: (1) all of the views expressed in this report accurately reflect the Research Analyst’s personal views about any and all of the subject securities or issuers; and (2) no part of any of the Research Analyst’s compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the Research Analyst(s) in this report. For all Korea-based Research Analysts listed on the front cover, if applicable, they also certify, as per KOFIA requirements, that the Research Analyst’s analysis was made in good faith and that the views reflect the Research Analyst’s own opinion, without undue influence or intervention.

All authors named within this report are Research Analysts who produce independent research unless otherwise specified. In Europe, Sector Specialists (Sales and Trading) may be shown on this report as contacts but are not authors of the report or part of the Research Department.

Important Disclosures

Company-Specific Disclosures: J.P. Morgan does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. Important disclosures, including price charts and credit opinion history tables (if applicable), are available for compendium reports and all J.P. Morgan–covered companies, and certain non-covered companies, by visiting <https://www.jpmm.com/research/disclosures>, calling 1-800-477-0406, or e-mailing research.disclosure.inquiries@jpmorgan.com with your request.

History of Investment Recommendations:

A history of J.P. Morgan investment recommendations disseminated during the preceding 12 months can be accessed on the Research & Commentary page of <http://www.jpmorganmarkets.com> where you can also search by analyst name, sector or financial instrument.

Explanation of Credit Research Valuation Methodology, Ratings and Risk to Ratings:

J.P. Morgan uses a bond-level rating system that incorporates valuations (relative value) and our fundamental view on the security. Our fundamental credit view of an issuer is based on the company’s underlying credit trends, overall creditworthiness and our opinion on whether the issuer will be able to service its debt obligations when they become due and payable. We analyze, among other things, the company’s cash flow capacity and trends and standard credit ratios, such as gross and net leverage, interest coverage and liquidity ratios. We also analyze profitability, capitalization and asset quality, among other variables, when assessing financials. Analysts also rate the issuer, based on the rating of the benchmark or representative security. Unless we specify a different recommendation for the company’s individual securities, an issuer recommendation applies to all of the bonds at the same level of the issuer’s capital structure. We may also rate certain loans and preferred securities, as applicable. This report also sets out within it the material underlying assumptions used. We use the following ratings for bonds (issues), issuers, loans, and preferred securities: Overweight (over the next three months, the recommended risk position is expected to outperform the relevant index, sector, or benchmark); Neutral (over the next three months, the recommended risk position is expected to perform in line with the relevant index, sector, or benchmark); and Underweight (over the next three months, the recommended risk position is expected to underperform the relevant index, sector, or benchmark). For CDS, we use the following rating system: Long Risk (over the next three months, the credit return on the recommended position is expected to exceed the relevant index, sector or benchmark); Neutral (over the next three months, the credit return on the recommended position is expected to match the relevant index, sector or benchmark); and Short Risk (over the next three months, the credit return on the recommended position is expected to underperform the relevant index, sector or benchmark).

General

This material has been prepared by personnel in J.P. Morgan’s Global Index Research Group and is provided for informational purposes only. For further information regarding the Global Index Research Group products (“Indices”), please refer to: <https://www.jpmorgan.com/insights/research/index-research>. This material is for distribution to institutional and professional clients only and is not intended for retail customer use. It is provided on a confidential basis and may not be reproduced, redistributed or disseminated, in whole or in part, without the prior written consent of J.P. Morgan. Any unauthorized use is strictly prohibited.

Unless otherwise specifically stated, any views or opinions expressed herein are solely those of the individual author from which it originates and may differ from the views or opinions expressed by other areas of J.P. Morgan.

J.P. Morgan is a marketing name for the investment banking and markets businesses of JPMorgan Chase & Co. and its subsidiaries worldwide. Securities, markets and research activities are conducted through a combination of J.P. Morgan Securities LLC, J.P. Morgan Securities plc and the appropriately licensed subsidiaries of JPMorgan Chase & Co. in EMEA and Asia-Pacific. J.P. Morgan Global Index Research Group personnel may be employees of any of the foregoing entities.

The Indices are the exclusive property of J.P. Morgan Securities LLC as administrator of the Indices (the “Index Administrator”), and the Index Administrator retains all property rights therein. In such capacity, the Index Administrator does not sponsor, endorse or otherwise promote any security or financial product or transaction referencing any Indices.

The products and services referenced herein may not be suitable for all clients and are subject to change at any time without notice. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The information in this material has been obtained from sources believed to be reliable, but J.P. Morgan does not warrant its completeness or accuracy. Any modelling scenario analysis or other forward-looking information herein is intended to illustrate hypothetical results based on certain assumptions, information and/or financial data (not all of which will be specified herein). J.P. Morgan does not guarantee expressly or impliedly the accuracy or completeness of any information and/or financial data used. Further, the information and/or financial data used by J.P. Morgan may not be representative of all information and/or financial data available to J.P. Morgan. The information and/or financial data available herein may change at any time without notice to you. Actual events or conditions may differ materially from those assumed; therefore, actual results are not guaranteed. All market prices, data and other information (including that which may be derived from third party sources believed to be reliable) are not warranted as to completeness or accuracy and are subject to change without notice. J.P. Morgan disclaims any responsibility or liability to the fullest extent permitted by applicable law, whether in contract, tort (including, without limitation, negligence), equity or otherwise, for any loss or damage arising from any reliance on or the use of this material in any way. The information contained herein is as of the date and time referenced only, and J.P. Morgan does not undertake any obligation to update such information. Past performance (including backtesting) is not indicative of future returns, which will vary. J.P. Morgan and/or its affiliates and employees may hold positions (long or short), effect transactions or act as market maker in the financial instruments of any issuer data contained herein or act as underwriter, placement agent, advisor, or lender to such issuer.

Nothing in this material should be construed as investment, tax, legal, accounting, regulatory or other advice or as creating a fiduciary relationship. If you deem it necessary, you must seek independent professional advice to ascertain the investment, legal, tax, accounting, regulatory or other consequences before investing or transacting.

To the extent this material includes any data on issuers or securities targeted by economic or financial sanctions imposed or administered by the governmental authorities of the U.S., EU, UK or other relevant jurisdictions (Sanctioned Securities), nothing herein is intended to be read or construed as encouraging, facilitating, promoting or otherwise approving investment or dealing in such Sanctioned Securities. Clients should be aware of their own legal and compliance obligations when making investment decisions.

The author(s) of this material may not be licensed to carry on regulated activities in your jurisdiction and, if not licensed, do not hold themselves out as being able to do so. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.

Product names, company names and logos mentioned herein are trademarks or registered trademarks of their respective owners.

Any long form nomenclature for references to China; Hong Kong; Taiwan; and Macau within this material are Mainland China; Hong Kong SAR (China); Taiwan (China); and Macau SAR (China).

ESG Data Integrity: Where an index administered by the Index Administrator pursues environmental, social or governance (ESG) objectives, the Index Administrator is, wholly or in part, reliant on public sources of information and other third party sources. Further, the ability of the Index Administrator to verify such objectives may be limited by the integrity, quality, and detail of the data available in respect of the underlying constituents at the relevant point in time and the status and evolution of global laws, guidelines, regulations, and market practice in relation to the preparation, tracking and provision of such data. Therefore, such disclosures are made on a commercially reasonable efforts basis and are subject to change. In particular, new laws, guidelines or regulations may be introduced in relation to the methodology used to provide corporate ESG ratings which could impact the Index Administrator’s ESG index score and the relevant screenings and exclusions and cause them to change. ESG data may be inconsistent across providers. The Index Administrator’s ESG index score, relevant screenings and exclusions and related disclosures are also subject to change as a result of periodic reviews conducted by the Index Administrator in relation to the sources of ESG data. In calculating the index in line with the methodology articulated herein, the Index Administrator relies on the data provided by the ESG data providers. The Index Administrator does not independently source its own ESG data or exercise any discretion with respect to the substitution of third party ESG data. The integrity of the ESG data sourced from third parties is limited by the ability of those providers to source accurate data on the ESG performance of certain corporate structures, such as parent versus subsidiary, including SPVs, holding company versus operating company and the activities of any affiliated entities and derived structures. Further, ESG data pertaining to sovereign issuers is limited to the sourcing of ESG performance data at the level of the relevant country. The current data integrity landscape means it is not possible to screen all issuers for exclusion (e.g. issuers other than corporate and quasi-sovereign issuers). Issuers in respect of whom ESG data is limited may still be included in the index.

J.P. Morgan Credit Research Ratings Distribution, as of July 04, 2026

	Overweight (buy)	Neutral (hold)	Underweight (sell)
Global Credit Research Universe*	26%	58%	16%
IB clients**	84%	84%	89%

*Please note that the percentages may not add to 100% because of rounding.

**Percentage of subject companies within each of the "Overweight," "Neutral" and "Underweight" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.

For purposes of FINRA ratings distribution rules only, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. The Credit Research Rating Distribution is at the issuer level. Issuers with an NR or an NC designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.

Analysts' Compensation: The research analysts responsible for the preparation of this report receive compensation based upon various factors, including the quality and accuracy of research, client feedback, competitive factors, and overall firm revenues.

Registration of non-US Analysts: Unless otherwise noted, the non-US analysts listed on the front of this report are employees of non-US affiliates of J.P. Morgan Securities LLC, may not be registered as research analysts under FINRA rules, may not be associated persons of J.P. Morgan Securities LLC, and may not be subject to FINRA Rule 2241 or 2242 restrictions on communications with covered companies, public appearances, and trading securities held by a research analyst account.

Other Disclosures

J.P. Morgan is a marketing name for investment banking businesses of JPMorgan Chase & Co. and its subsidiaries and affiliates worldwide.

UK MIFID FICC research unbundling exemption: UK clients should refer to [UK MIFID Research Unbundling exemption](#) for details of J.P. Morgan's implementation of the FICC research exemption and guidance on relevant FICC research categorisation.

Any long form nomenclature for references to China; Hong Kong; Taiwan; and Macau within this research material are Mainland China; Hong Kong SAR (China); Taiwan (China); and Macau SAR (China).

J.P. Morgan Research may, from time to time, write on issuers or securities targeted by economic or financial sanctions imposed or administered by the governmental authorities of the U.S., EU, UK or other relevant jurisdictions (Sanctioned Securities). Nothing in this report is intended to be read or construed as encouraging, facilitating, promoting or otherwise approving investment or dealing in such Sanctioned Securities. Clients should be aware of their own legal and compliance obligations when making investment decisions.

Digital assets, which may also be referred to as virtual or crypto assets or crypto currencies (e.g. bitcoin), discussed in this research report are subject to a rapidly changing regulatory landscape. The application of relevant laws in respect of such assets may be unsettled, and the legality of any digital asset investment may be unclear. Prior to making any investment decision regarding any digital asset, investors should seek their

own legal advice and be aware of any legal considerations regarding the purchase, holding or selling of such an investment. For relevant regulatory advisories on digital assets, including bitcoin and ethereum, please see <https://www.jpmorgan.com/disclosures/cryptoasset-disclosure>.

The author(s) of this research report may not be licensed to carry on regulated activities in your jurisdiction and, if not licensed, do not hold themselves out as being able to do so.

Exchange-Traded Funds (ETFs): J.P. Morgan Securities LLC (“JPMS”) acts as authorized participant for substantially all U.S.-listed ETFs. To the extent that any ETFs are mentioned in this report, JPMS may earn commissions and transaction-based compensation in connection with the distribution of those ETF shares and may earn fees for performing other trade-related services, such as securities lending to short sellers of the ETF shares. JPMS may also perform services for the ETFs themselves, including acting as a broker or dealer to the ETFs. In addition, affiliates of JPMS may perform services for the ETFs, including trust, custodial, administration, lending, index calculation and/or maintenance and other services.

Options and Futures related research: If the information contained herein regards options- or futures-related research, such information is available only to persons who have received the proper options or futures risk disclosure documents. Please contact your J.P. Morgan Representative or visit <https://www.theocc.com/components/docs/riskstoc.pdf> for a copy of the Option Clearing Corporation's Characteristics and Risks of Standardized Options or https://www.finra.org/sites/default/files/2020-08/Security_Futures_Risk_Disclosure_Statement_2020.pdf for a copy of the Security Futures Risk Disclosure Statement.

Changes to Interbank Offered Rates (IBORs) and other benchmark rates: Certain interest rate benchmarks are, or may in the future become, subject to ongoing international, national and other regulatory guidance, reform and proposals for reform. For more information, please consult: https://www.jpmorgan.com/global/disclosures/interbank_offered_rates

Private Bank Clients: Where you are receiving research as a client of the private banking businesses offered by JPMorgan Chase & Co. and its subsidiaries (“J.P. Morgan Private Bank”), research is provided to you by J.P. Morgan Private Bank and not by any other division of J.P. Morgan, including, but not limited to, the J.P. Morgan Corporate and Investment Bank and its Global Research division.

Legal entity responsible for the production and distribution of research: The legal entity identified below the name of the Reg AC Research Analyst who authored this material is the legal entity responsible for the production of this research. Where multiple Reg AC Research Analysts authored this material with different legal entities identified below their names, these legal entities are jointly responsible for the production of this research. Where more than one legal entity is listed under an analyst's name, the first legal entity is responsible for the production unless stated otherwise. Research Analysts from various J.P. Morgan affiliates may have contributed to the production of this material but may not be licensed to carry out regulated activities in your jurisdiction (and do not hold themselves out as being able to do so). Unless otherwise stated below in the legal entity disclosures, this material has been distributed by the legal entity responsible for production, or where more than one legal entity is listed under the analyst's name, the first legal entity will be responsible for distribution. If you have any queries, please contact the relevant Research Analyst in your jurisdiction or the entity in your jurisdiction that has distributed this research material.

Morgan Securities plc (“JPMS plc”) which is a member of the London Stock Exchange and is authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority or J.P. Morgan Markets Limited (“JPMML Ltd”) which is authorised and regulated by the Financial Conduct Authority. Unless specified to the contrary, this material is distributed in the UK by JPMS plc and is directed in the UK only to: (a) persons having professional experience in matters relating to investments falling within article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) (Order) 2005 (“the FPO”); (b) persons outlined in article 49 of the FPO (high net worth companies, unincorporated associations or partnerships, the trustees of high value trusts, etc.); or (c) any persons to whom this communication may otherwise lawfully be made; all such persons being referred to as “UK relevant persons”. This material must not be acted on or relied on by persons who are not UK relevant persons. Any investment or investment activity to which this material relates is only available to UK relevant persons and will be engaged in only with UK relevant persons. A description of J.P. Morgan EMEA’s policy for prevention and avoidance of conflicts of interest related to the production of Research can be found at the following link: [J.P. Morgan EMEA - Research Independence Policy](#).

U.S.: J.P. Morgan Securities LLC (“JPMS”) is a member of the NYSE, FINRA, SIPC, and the NFA. JPMorgan Chase Bank, N.A. is a member of the FDIC. Material published by non-U.S. affiliates is distributed in the U.S. by JPMS who accepts responsibility for its content.

General: Additional information is available upon request. The information in this material has been obtained from sources believed to be reliable. While all reasonable care has been taken to ensure that the facts stated in this material are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) make no representations or warranties whatsoever to the completeness or accuracy of the material provided, except with respect to any disclosures relative to J.P. Morgan and the Research Analyst’s involvement with the issuer that is the subject of the material. Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. There may be certain discrepancies with data and/or limited content in this material as a result of calculations, adjustments, translations to different languages, and/or local regulatory restrictions, as applicable. These discrepancies should not impact the overall investment analysis, views and/or recommendations of the subject company(ies) that may be discussed in the material. Artificial intelligence tools may have been used in the preparation of this material, including assisting in data analysis, pattern recognition, and content drafting for research material. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and responsibilities that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan’s current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The

recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.

Confidentiality and Security Notice: This transmission may contain information that is privileged, confidential, legally privileged, and/or exempt from disclosure under applicable law. If you are not the intended recipient, you are hereby notified that any disclosure, copying, distribution, or use of the information contained herein (including any reliance thereon) is STRICTLY PROHIBITED. Although this transmission and any attachments are believed to be free of any virus or other defect that might affect any computer system into which it is received and opened, it is the responsibility of the recipient to ensure that it is virus free and no responsibility is accepted by JPMorgan Chase & Co., its subsidiaries and affiliates, as applicable, for any loss or damage arising in any way from its use. If you received this transmission in error, please immediately contact the sender and destroy the material in its entirety, whether in electronic or hard copy format.
