

China monthly data outlook

Growth hinges on a fiscal push

China is entering a fragile stabilization phase: production is firming, but the recovery remains narrow. August PMIs improved as output and orders rose, yet weaker steel production, home and auto sales, construction and credit show that momentum remains concentrated in high-tech and export manufacturing. Sustaining growth will require fiscal policy to broaden domestic absorption, in our view.

Domestic demand remains the binding constraint. July retail sales fell 0.3% m/m sa, fixed-asset investment contracted 12.8% oya and loan growth slowed to 5.1% oya. Services consumption and high-tech investment continue to outperform, but cannot offset the property drag, fading subsidies and weak private returns.

August activity should improve only modestly. Industrial production will remain supported by high-tech manufacturing and exports, while retail sales and investment stay soft. Export momentum could ease as tariff pressures and geopolitical risks offset favorable technology prices. Renewed Middle East conflict and Brent near US\$95/bbl add a stagflationary squeeze through higher costs and weaker real incomes, hurting China's export demand.

We expect 3Q growth around 3.6% q/q saar, followed by a firmer 4Q, leaving 2026 growth near 4.5%. This assumes exports and public investment continue to absorb output while private demand repairs gradually, yet a delayed fiscal execution could weaken growth and push part of the policy impulse into early 2027.

Inflation should rise modestly in August, with CPI around 0.8% oya and PPI around 3.6% oya, but the impulse is cost-driven rather than demand-led. Subdued core inflation and weak output prices point to margin compression. We expect full-year CPI around 0.8% and PPI to moderate; the main risk is a less favorable mix of higher import costs and weaker final demand.

Risks are increasingly interconnected. Housing weakness and income uncertainty limit domestic shock absorption. Renewed US tariff tensions and Operation Economic Outcast threaten exports, compliance costs and settlement channels; higher sovereign yields tighten global funding; and demand for Chinese electronics and machinery could suffer should the global manufacturing drive lose steam.

Policy should prioritize fiscal execution. Authorities should accelerate project approvals, deploy bond and policy-bank funding, draw down fiscal deposits, and focus spending on infrastructure, urban renewal and project completion. Targeted support may be needed to cushion the oil shock. If activity weakens and the fiscal multiplier declines further, additional stimulus may be required. Monetary policy should maintain ample liquidity and targeted credit. A modest rate cut remains possible if activity disappoints, but would be more signal than stimulus. Growth could remain near target if fiscal delivery and exports hold; a durable recovery requires stronger household demand, housing confidence and private returns.

Forecasts of major economic indicators

Trade

- **Exports:** We expect China's exports to ease mildly (-0.3% m/m sa) in August, or rise 20.5%oya. Export volume growth may moderate, as two typhoons delayed shipments into September. Our [high-frequency tracking](#) showed a decline in August departure shipping volume. Nevertheless, external demand may hold up well, as both the NBS and RatingDog PMIs showed an expansion in export orders. Meanwhile, export prices likely remained elevated as the global tech inflation continued. Favorable tech pricing and product upgrades should continue to support China's nominal export growth.
- **Imports:** We expect China's imports to stay relatively flat compared to July, or rise 26.4%oya. Growth composition likely remained heavily price-led, as elevated tech, energy and metal prices continued to inflate import values. Both sets of PMIs recorded improved production and quantity of purchases in August, pointing to increased import demand, though severe weather may have delayed some shipments. Meanwhile, broader domestic demand likely stayed weak, suggesting relatively subdued import volumes outside the tech and export-processing sectors.

Domestic activity

- **Industrial production:** August IP should continue to be underpinned by high-tech manufacturing and export resilience, despite the weather- and oil-related disruptions remaining in place. The output component strengthened in both NBS and RatingDog PMI, pointing to a recovery in industrial activity after July's softness. We expect IP to grow 0.4% m/m sa or 4.7%oya.
- **Retail sales:** The new orders PMI points to a mild repair to domestic demand in August amid summer tourism, although autos and household appliances should continue to drag on fading trade-in subsidy boost. We expect retail sales to grow 0.1% m/m sa or 1.0%oya.
- **Fixed asset investment:** Local government bond issuance picked up in August, potentially narrowing the contraction in infrastructure FAI. However, the construction PMI fell at a faster pace, showing that the housing downturn and potential disruptions from summer rainfall and heat should keep overall FAI at a subdued level. We expect the FAI to decline 9.8%oya in August.

Prices

- **CPI:** We expect CPI to edge up 0.1% m/m sa or 0.8%oya in August, driven by increases in vegetable and pork prices. Stronger oil prices likely lifted fuel-related components, while core inflation probably remained subdued amid weak household demand.
- **PPI:** We expect PPI to tick up 0.1% m/m sa or 3.6%oya, supported by higher oil, coal, and metal prices, as reflected in the uptick in the PMI input price indices. While these factors should continue to lift upstream producer prices, evidence of a broad-based recovery in consumer demand-sensitive sectors remains limited.

Monetary

- **Credit:** We expect new loan creation to pick up to 408bn yuan in August, with loan growth unchanged at 5.1%oya, showing normal seasonality and continued softness in medium- to long-term loan demand. Government bond issuance picked up mildly to 1,203bn yuan in August from 1,154bn yuan in July, providing a marginal lift to TSF. We expect TSF flows to rise to 2,268bn yuan, with TSF growth holding at 7.4%oya.

Recent policy measures (Aug)

6-Aug	Reports emerged that a small number of local tax authorities have begun taxing certain Hong Kong insurance-related income on mainland residents, though such cases do not yet appear to be widespread.
10-Aug	Beijing further eased housing policies by lowering the social security contribution requirement for non-local residents purchasing homes within the Fifth Ring Road to one year. Authorities also expanded housing support measures by allowing multiple mortgage policy benefits to be stacked, raising the maximum housing provident fund loan quota to RMB 3.4mn.
10-Aug	Eight major polysilicon producers jointly issued an anti-"involution" pledge, committing not to sell below cost and to promote more orderly competition in the photovoltaic industry. Market participants expect the initiative, together with regulatory oversight, to support polysilicon prices.
13-Aug	The PBOC released its 2Q Monetary Policy Implementation Report, which strikes a modestly more dovish tone than the 1Q report. Key messages include a further refinement of the short-term rate operational framework, reduced emphasis on price reflation, a more cautious assessment of external risks, and no sign of increased concern over RMB appreciation.
19-Aug	State Council released revised Housing Provident Fund Regulations. The amendments expand eligible uses of provident fund balances to include home renovation and property-management expenses, simplify withdrawal procedures through nationwide recognition of contribution records, strengthen penalties for fraudulent withdrawals and loans, and extend voluntary participation to flexible workers.
19-Aug	The MOC and eight other agencies issued guidelines to stimulate consumption in county-level economies. The measures support the renovation of existing commercial facilities, including department stores and aging shopping malls, and accelerate upgrades to township commercial centers, agricultural markets, and rural retail networks.
19-Aug	Several cities, including Xi'an, Chongqing, and Changchun, expanded automobile consumption subsidy programs to cover used-car purchases for the first time, with subsidies of up to RMB 4,000 per vehicle. The move reflects broader efforts to stimulate auto consumption.
19-Aug	The NFRA expanded insurance funds' participation in the Southbound ETF Connect scheme, allowing mainland insurers to invest in eligible Hong Kong-listed ETFs.
21-Aug	Shanghai unveiled a new package of housing measures. The policy expands the scope of housing provident fund withdrawals, increases withdrawal frequency and limits for home purchases, and lowers the minimum down-payment ratio for first-home commercial mortgages to 15%, while maintaining differentiated second-home down-payment requirements of 25% within the Outer Ring Road and 15% outside the Outer Ring Road (including all of Baoshan and Jiading districts).
21-Aug	The MOC responded to US 100% tariffs on drones, stating that China's drone exports to the U.S. are primarily used for civilian purposes, and urging Washington to revoke the tariffs immediately.
21-Aug	The National Immigration Administration announced that citizens of Kyrgyzstan and Vietnam are now eligible for China's 240-hour visa-free transit policy and Hainan's 30-day visa-free entry policy, expanding the coverage of the two programs to 57 and 61 countries, respectively.
24-Aug	Vice Minister of Finance Liao Min said China expanded its consumer loan interest-subsidy program from 1 August, extending eligibility to credit-card installment loans for purchases such as automobiles and home renovations and raising the maximum subsidy per borrower from RMB 3,000 to RMB 5,000. Authorities also expanded the SME loan subsidy program to cover newly issued working-capital loans, aiming to better support private investment and household consumption.
25-Aug	The Central Government Housing Provident Fund Center raised the maximum loan quota for first-home purchases to RMB 3.4mn. The policy also expanded provident fund withdrawal scenarios, and launched "mortgage-transfer" services for existing-home transactions.
26-Aug	Ahead of the resumption of China's battery consumption tax on 1 September, several battery manufacturers announced price increases to pass higher tax costs through the supply chain.
28-Aug	The MOHURD and several other ministries announced three property-related policies, suggesting a coordinated move from a high level. The MOHURD called for a phase-out (but not elimination) of the pre-sales system. CSRC published a notice that relaxes financing channels for developers, while PBOC published another one that relaxes mortgage tenors but tightens management of pre-sales proceeds.
31-Aug	The NDRC held a national investment work conference, calling for stronger efforts to stabilize investment growth and accelerate the implementation of major projects under the 15th Five-Year Plan. The meeting emphasized advancing construction of the "Six Networks," developing a new pipeline of key infrastructure projects, and launching more major projects open to private-sector participation.
4-Sep	Ten government agencies jointly released the 15th Five-Year Plan for SME Development. The plan will launch the second phase of the National SME Development Fund to support early-stage, small, long-term, and hard-tech investments, while promoting innovation in emerging industries such as new energy and robotics, as well as future industries including quantum technology and brain-computer interfaces.

The author(s) of this research report may not be licensed to carry on regulated activities in your jurisdiction and, if not licensed, do not hold themselves out as being able to do so.

Exchange-Traded Funds (ETFs): J.P. Morgan Securities LLC ("JPMS") acts as authorized participant for substantially all U.S.-listed ETFs. To the extent that any ETFs are mentioned in this report, JPMS may earn commissions and transaction-based compensation in connection with the distribution of those ETF shares and may earn fees for performing other trade-related services, such as securities lending to short sellers of the ETF shares. JPMS may also perform services for the ETFs themselves, including acting as a broker or dealer to the ETFs. In addition, affiliates of JPMS may perform services for the ETFs, including trust, custodial, administration, lending, index calculation and/or maintenance and other services.

Changes to Interbank Offered Rates (IBORs) and other benchmark rates: Certain interest rate benchmarks are, or may in the future become, subject to ongoing international, national and other regulatory guidance, reform and proposals for reform. For more information, please consult: https://www.jpmorgan.com/global/disclosures/interbank_offered_rates

Private Bank Clients: Where you are receiving research as a client of the private banking businesses offered by JPMorgan Chase & Co. and its subsidiaries ("J.P. Morgan Private Bank"), research is provided to you by J.P. Morgan Private Bank and not by any other division of J.P. Morgan, including, but not limited to, the J.P. Morgan Corporate and Investment Bank and its Global Research division.

Legal entity responsible for the production and distribution of research: The legal entity identified below the name of the Reg AC Research Analyst who authored this material is the legal entity responsible for the production of this research. Where multiple Reg AC Research Analysts authored this material with different legal entities identified below their names, these legal entities are jointly responsible for the production of this research. Where more than one legal entity is listed under an analyst's name, the first legal entity is responsible for the production unless stated otherwise. Research Analysts from various J.P. Morgan affiliates may have contributed to the production of this material but may not be licensed to carry out regulated activities in your jurisdiction (and do not hold themselves out as being able to do so). Unless otherwise stated below in the legal entity disclosures, this material has been distributed by the legal entity responsible for production, or where more than one legal entity is listed under the analyst's name, the first legal entity will be responsible for distribution. If you have any queries, please contact the relevant Research Analyst in your jurisdiction or the entity in your jurisdiction that has distributed this research material.

This material must not be acted on or relied on by persons who are not UK relevant persons. Any investment or investment activity to which this material relates is only available to UK relevant persons and will be engaged in only with UK relevant persons. A description of J.P. Morgan EMEA's policy for prevention and avoidance of conflicts of interest related to the production of Research can be found at the following link: [J.P. Morgan EMEA - Research Independence Policy](#).

U.S.: J.P. Morgan Securities LLC ("JPMS") is a member of the NYSE, FINRA, SIPC, and the NFA. JPMorgan Chase Bank, N.A. is a member of the FDIC. Material published by non-U.S. affiliates is distributed in the U.S. by JPMS who accepts responsibility for its content.

General: Additional information is available upon request. The information in this material has been obtained from sources believed to be reliable. While all reasonable care has been taken to ensure that the facts stated in this material are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) make no representations or warranties whatsoever to the completeness or accuracy of the material provided, except with respect to any disclosures relative to J.P. Morgan and the Research Analyst's involvement with the issuer that is the subject of the material. Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. There may be certain discrepancies with data and/or limited content in this material as a result of calculations, adjustments, translations to different languages, and/or local regulatory restrictions, as applicable. These discrepancies should not impact the overall investment analysis, views and/or recommendations of the subject company(ies) that may be discussed in the material. Artificial intelligence tools may have been used in the preparation of this material, including assisting in data analysis, pattern recognition, and content drafting for research material. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in

any way responsible for the contents hereof, apart from the liabilities and that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan's current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.

Confidentiality and Security Notice: This transmission may contain information that is privileged, confidential, legally privileged, and/or exempt from disclosure under applicable law.
