Foreign Exchange Forecasts

August 2026

CITI'S TAKE

We flip bearish USD and raise our EURUSD forecast to 1.1750 as hawkish Fed premium is priced out, relative data surprises favor Europe, and uncertainty around US midterm elections in November enters our forecasting window. We leave our medium-term EURUSD forecast unchanged for now (1.14) as AI capex spend is projected to persist, which we think will be the main driver of relative capital flows, growth expectations, and real rates over this horizon in favor of USD.

Please see Appendix for detailed FX forecast tables.

Please also join us for our FX forecast webinar on Tuesday August 25 at 9 AM ET – [click here](#) to access the calendar invite on Citi Velocity.

Macro Overview

We lower our tactical (0–3 month) USD forecast, from 102.12 to 98.34 (raising our EURUSD forecast from 1.13 to 1.1750). We had turned more neutral on the USD in recent months, while still seeing the asymmetry skewed towards USD strength given the Fed reaction function (that is, strong US data could see more hawkish repricing of the Fed curve, while weak data would only slowly remove some of the hiking bias given the Fed's reaction function).

However, we also noted that asymmetry had a shelf life, especially if the July CPI data (released August 12) did not surprise, which it didn't. Alongside a weaker labor market report and weaker PPI data, this cements the end of the asymmetry in our view.

We have also been flagging increasing USD risks into the autumn, and we expect these will become more material in the coming months:

- **Missing inflation shocks:** Citi's Inflation Surprise Index has started to roll over and turned negative – historically a peak for yields in recent years (Figure 4). In general, inflation misses have been common globally despite initial concerns on first and second order effects from the conflict (Figure 5). Second round effects could still come, but much like with tariffs, the pass-through effect may be sufficiently spread out so as to not have a big month-on-month impact on data. We also flag the methodological changes to PCE which should lower core PCE YoY by 20–30bps.

Figure 4. US inflation surprises have started to fall, suggesting front-end yields should do the same

Source: Citi Research, Bloomberg

Figure 5. Inflation misses have been typical globally as forecasters overestimated conflict impact

© 2026 Citigroup Inc. No redistribution without Citigroup's written permission.
Source: Citi Research, Bloomberg

- **Fed hawkishness priced out:** In addition to the above, we expect one of the Fed task force conclusions will be to use a broader set of inflation data rather than core PCE. The combination of a more averaged inflation rate, and one in which methodological changes will include a lower core PCE anyway, should see the disinflationary trend persist (Figure 6). We also think the subset of voters concerned around AI inflation will remain small enough to avoid hikes. And in general, hawkish Fedspeak may have peaked (Figure 7). This should allow markets to further remove the hiking bias for Fed pricing this year. We note that Citi US Economics remains of the view that rate cuts could be seen this year,

though we currently do not bake this into our forecasting models, which instead reflect a Fed on hold.

Figure 6. Core PCE has been an exception; using an average of inflation indicators should see a more dovish Fed

Source: Citi Research, Haver Analytics

Figure 7. Fedspeak hawkishness could be peaking

© 2026 Citigroup Inc. No redistribution without Citigroup's written permission.

Source: Citi Research, Bloomberg

- **Better EU data and ECB hike:** We expect the ECB to hike 25bps in September, in line with Citi Economics view and market pricing (currently +24bps priced for September 10 meeting). The ECB remains concerned primarily with oil prices; the persistence of conflict flare-ups and the Strait still largely being closed to traffic should keep a hawkish bias from ECB officials. EU data has recently been surprising as well (versus misses in the US; Figure 8). We also note German fiscal spending continues to expand (Figure 9), which should help boost growth.

Source: Citi Research, Haver Analytics

- **Midterm uncertainty:** As we noted in our July Forecasts, the US midterm elections in November may have mixed implications for USD. We think the likely outcome is a divided government, which should reduce term premium/fiscal risks but also yields – and these factors may offset. Still, given increased

uncertainty around US politics and tail risks around possibility of election disputes, market participants may still avoid long USD exposure through the event. However, we see this as a less important driver relative to data, Fed reaction function, or EU/ECB outlook (i.e., if the other factors run their course or are no longer USD negative, we would not keep a USD negative view on midterm elections alone).

The newest development is the recent announcement by US Treasury to double the size of its buybacks through November. This adds another bearish element to the USD through two channels: (1) it pushes US yields down ([US Rates Strategy - Getting long 20y after today's buyback announcement](#)), and (2) it creates concerns around financial repression (which is currency negative).

While the above factors should weigh on the USD in the coming months, we see a limit to how much the USD can realistically sell off. If we assume no Fed action this year, an ECB hike, and a \$75 Brent oil, we land on a EURUSD fair value of around 1.17-1.1720, with overshoot potential towards 1.1750 after factoring in the current mis-valuation (Figure 10). EURUSD has struggled to sustain above 1.18 over the past year's range (Figure 11), and we think that will continue to be the case (with major resistance still at the 200-month moving average, currently 1.1850).

Source: Citi Research, Bloomberg

However, there are two significant risks to the view.

First is the Iran conflict. The normalized oil price has created too much complacency on risks, in our view. We do not view spot oil as the only gauge – or even the most meaningful – as demand destruction (mainly China strategic reserve buying on pause), existing inventories and Hormuz workarounds have managed to keep spot oil prices in check. A clearer sign of stress, though, remains in crack spreads as inventories for products are smaller and have been harder to maintain given refinery issues. The US midterm elections in November could be a flash point: possible scenarios include the Iranian leadership trying to boost energy prices ahead of the election, while post-election, the US administration may be less hesitant towards actions or policies that risk creating energy price volatility. Our stronger 0-3m NOK forecast reflects this risk.

Second is the AI trade. While it has seen some volatility over the summer, we remain of the view that the capex cycle will continue and the IG credit market will be able to absorb issuance (though with some concessions; [The High-Grade Beat - The path forward for hyperscalers](#)). This has been an important growth driver, and looks likely to continue. More broadly, [AI adoption](#) and capabilities continue to accelerate, which should start having a more positive impact on productivity.

Longer-term USD view unchanged

We maintain our 6-12 month EURUSD forecast unchanged at 1.14. Long-term FX forecasting is never easy, and even harder when uncertainty remains high. For now, we focus on where relative growth expectations and real rates could settle over a longer horizon. While the AI capex expansion continues (and fuels expectations for productivity gains vis-à-vis Europe), we expect the US to remain a destination for capital and a source for growth. At the same time, the benefits of increased fiscal spending from the EU is more likely priced in. And while we see another ECB hike this year, the market is pricing almost two additional hikes. We do not see those materializing absent another energy shock, though EUR would still face cross-currents via lower terms of trade and real rates, despite a more sensitive ECB.

G10 FX Overviews

USD

DXF Forecasts: 0-3m 98.34, 6-12m 100.22

- **0-3m:** USD weakness should persist in the coming months as inflation risks should dissipate, allowing the market to take out hikes from the Fed curve. This process should be USD negative. Additionally, EUR data continues to see upside surprises, and German fiscal impulse could start having a more positive impact on EU growth. The recent Treasury announcement to increase buybacks could put further downside pressure on US yields in the short term.
- **6-12m:** Ultimately, we remain of the belief that relative growth is a key driver for FX. Despite headwinds through year-end, we still see growth prospects for the US as better than for G10 broadly, which should still support the USD. However, the Fed is unlikely to hike, which would realistically limit how much the USD could rally from here.

Figure 12. Broader inflation indicators (beyond Core PCE which will have its own dovish revision) are less hawkish

Source: Citi Research, Haver Analytics

Figure 13. Relative data surprises have been USD negative relative to EUR

© 2026 Citigroup Inc. No redistribution without Citigroup's written permission.
Source: Citi Research

EUR

EURUSD Forecasts: 0-3m 1.175, 6-12m 1.140

- **0-3m:** EUR should benefit going into the next ECB meeting as we expect a hike, though this is largely priced. Recent data beats could have momentum, especially if German fiscal spending starts having a more positive impact on EU growth. At the same time, we expect no action from the Fed this year; as markets unwind priced Fed hikes, the USD should weaken. Uncertainty around US midterm elections could also support EUR if investors avoid the USD into elections.
- **6-12m:** The long-term EUR view remains driven by still low growth, which will limit how much the ECB can really hike. Current market pricing is close to three hikes, versus the one we expect. At some point, should the market begin to reprice less hawkishly, it should weigh on the EUR. Sequentially, though, this is likely to take more time than for the Fed, so it is not a short-term negative. But it should keep EUR gains contained to the coming months rather than persisting through next year.

JPY

USDJPY Forecasts: 0-3m 158, 6-12m 153

- **0-3m:** The main cause of the yen's depreciation this year is yen-selling hedges by domestic and foreign investors, stemming from [the historic rise in Japanese stock prices](#). If the bullish stock market trend does not change, the depreciation pressure on the JPY would likely continue. Even so, if USDJPY exceeds 160, the probability of another yen-buying intervention would likely increase again. We had thought that the yen-buying intervention in this phase would amount to 30 trillion yen, but the utilization of the FIMA facility has now made it possible for the intervention to be larger.
- **6-12m:** In the long term, we believe [the recent coordinated intervention by the U.S. and Japan](#) will likely be a turning point from a weaker JPY to a stronger JPY. Also, the monetary policy gap between the Fed and the BoJ is likely to shrink further, while we expect the Japanese central bank to continue the policy normalization and the Fed to resume the rate cuts at the end of the day later this year. JGB yields have already reached the level where Japanese long-term investors would want to invest in domestic bonds more aggressively. For overseas investors too, [JGBs should be becoming increasingly attractive assets](#), especially in the case of unhedged investments, due to the combination of the late yield escalation and the prolonged JPY depreciation.

CHF

EURCHF Forecasts: 0-3m 0.93, 6-12m 0.92

USDCHF Forecasts: 0-3m 0.79, 6-12m 0.80

- **0-3m:** In previous updates we had held a bearish CHF bias on central bank divergence and bearish gold fundamentals. This made CHF an attractive funder for FX carry expressions and short positions had been built by leveraged investors. But the US Treasury's recent announcement to increase buybacks has sparked a squeeze in such positions. Moreover, with US real yields potentially topping out, gold demand picking back up, and a hawkish ECB well priced, we flip bullish CHF (and modestly bearish EURCHF) after hitting prior targets and with a notable shift in backdrop. Indeed, we would expect CHF undervaluation to correct closer to what gold-buying from central banks (proxied below) would imply.
- **6-12m:** We are more neutral CHF over the medium-term as many of the original themes informing our bullish 6-12m forecast – the Fed pivoting less hawkish, real yields peaking, and gold fundamentals improving – are now playing out. And while the market will likely continue pricing SNB hikes on a rolling basis, we don't envision any hawkish pivot from the SNB, absent a sharp rebound in imported goods inflation. On the other hand, however, the market will begin trading French election dynamics over this horizon, particularly amid budget negotiations later this year; our rates strategists remain bearish OATs and we flag that CHF has typically benefited from such risk premium vs EUR.

GBP

EURGBP Forecasts: 0-3m 0.86, 6-12m 0.86

GBPUSD Forecasts: 0-3m 1.36, 6-12m 1.33

- **0-3m:** We raise our EURGBP forecast as the Labour Party Conference (Sep 27-30) and Autumn budget (Oct 28) come into view. Per our rates strategists, while the new Chancellor looks set to maintain a buffer vs the 'stability rule', this doesn't preclude higher borrowing via the 'investment rule'. Gilts and GBP will remain sensitive to such developments and we continue to see a more hawkish ECB than BoE over coming months. We expect a modest grind higher in GBPUSD per our bearish USD bias.
- **6-12m:** Citi Economics expects the BoE to remain on hold into 2027 before eventually pivoting to cuts, although the market will only gradually price out any hawkish premium. If so, this leaves fiscal developments and foreign demand for gilts as the primary drivers for GBP ahead. Big picture, Citi Economics thinks fiscal risks stay elevated, and official data suggests foreign inflows into gilts could be peaking. For EURGBP, though, the market will simultaneously battle cross-currents amid French election risks, which should limit EURGBP's upside over H1 2027.

CAD

USDCAD Forecasts: 0-3m 1.38, 6-12m 1.41

- **0-3m:** We have long seen CAD as an underperformer on renewed tariff risks and limited scope for BoC hawkishness. Indeed, USDCAD has traded above 1.42 in recent forecast iterations and in line with our bias. While these factors remain in place, however, we think (i) rate differentials could begin moving in favor of Canada as hawkish Fed premium is priced out, (ii) greater clarity should emerge on tariffs as negotiations continue. We thus lower our USDCAD forecast to 1.38 to reflect our more bearish USD bias. Elevated oil prices amid any US/Iran re-escalation would be an additional CAD tailwind, though we'd also expect USD downside to be capped in that scenario if cross-asset vol picks back up.
- **6-12m:** We maintain a mild bullish bias in our USDCAD medium-term forecast. AI capex investment and tariff headwinds should keep relative growth and real rates in favor of the US over a longer horizon, particularly if the BoC pivots back towards cuts per Citi Economics. A related development to monitor is CAD real money flows, which have been a loose proxy for FX hedging activity. These inflows have continued to support CAD, and have accelerated, despite selling from the leveraged segment.

Figure 22. Despite leveraged selling, CAD has been supported by real money inflows

Antipodeans

AUDUSD Forecasts: 0–3m 0.72, 6–12m 0.70

NZDUSD Forecasts: 0–3m 0.60, 6–12m 0.59

AUDNZD Forecasts: 0–3m 1.20, 6–12m 1.18

- **0–3m:** We raise our AUD & NZD forecasts as a backdrop of higher commodities prices, dovish Fed repricing, and the US Treasury's efforts to contain longer-term yields serve as tailwinds. On a relative value basis, AUDNZD traded towards 1.19, in line with expectations; we now adjust our forecast closer to spot as risk of hawkish RBA repricing increases, per Citi Economics, and to reflect relative ToT from US/Iran re-escalation risk.
- **6–12m:** We leave our medium-term AUD & NZD forecasts unchanged as AI capex trends should persist as tailwinds for USD. We also maintain our bearish AUDNZD bias over this horizon as the RBNZ maintains its hawkish bias, the RBA pivots more neutral, and net migration into NZ continues as the labor market recovers. Moreover, our economists see downside risks to China growth, where AUD remains more vulnerable in our view, although we watch for any acceleration of fiscal support into 2027. One upside risk for AUD is if AU superannuation funds increase their FX hedging (USD-selling flow) as they raise allocations to US equities.

Scandies

EURSEK Forecasts: 0-3m 10.99, 6-12m 10.88

EURNOK Forecasts: 0-3m 10.75, 6-12m 11.10

NOKSEK Forecasts: 0-3m 1.02, 6-12m 0.98

- **0-3m:** Similar to our view for the Antipodeans, we forecast Scandies upside vs USD (and EUR) against a backdrop of higher commodities prices, dovish Fed repricing, and the US Treasury's efforts to contain longer-term yields. On a relative value basis, we expect NOK to outperform SEK amid US/Iran re-escalation risk and scope for hawkish Norges Bank repricing; we thus raise our near-term forecast to 1.02 after hitting our previous target of 1.01. One potential headwind for SEK is whether Swedish investment funds rotate out of local/European equities and back into US equities, as these equity flows have tended to track EURSEK mis-valuations.
- **6-12m:** We maintain our view of marginal EURSEK downside over the medium-term on Sweden growth rebounding and structural tailwinds around the global tech investment cycle and defense investment. While Citi Economics expects Riksbank to remain on hold, peak hawkishness from Norges Bank and ECB should be in the rearview mirror, which could support SEK's rate differentials at the margin. Citi Commodities also expects oil to continue its move lower into 2027 on supply/demand fundamentals, and we continue to pencil in a modest EURNOK rebound.

Select EMFX Overviews

CNY

Yuanliu Hu, Xiangrong Yu, Rohit Garg

USDCNY Forecasts: 0-3m 6.75, 6-12m 6.70

Economic indicators slowed across the board in July. It could be partly attributable to extreme weather events, and the weak momentum likely has extended into August. Despite continued resilience of the AI-driven new economy, we see downside risks to our GDP forecasts at 4.5%YoY for 26Q3E and 4.6%YoY for 2026E. Incremental support, if not major stimulus, could be underway, but supply constraints from the weather events could damp the policy impact in the near term. The focus is likely to remain on fiscal policies with few signs of an outright LPR cut from the PBoC this month. Policymakers could be in action with an acceleration in bond issuance, marginal housing easing in Beijing, and the activation of a Rmb800bn policy-financing tool.

- Upside risks: (i) Stronger-than-expected domestic recovery, (ii) larger-than-expected fiscal and property stimulus, (iii) US-Iran deal
- Downside risks: (i) Later-than-expected policy reactions, (ii) disruptions in the Strait of Hormuz last much longer, (iii) trade disputes escalate

KRW

Jin-Wook Kim, Rohit Garg

USDKRW Forecasts: 0-3m 1,410, 6-12m 1,410

Capital outflow pressure from foreign equity investors has moderated. In August, capital outflow pressure from foreign equity investors moderated to -US\$0.9bn from August 1 to August 14 (July: -US\$6.2bn; June: -US\$30.5bn; May: -US\$27.9bn). However, Korean retail investors' purchase of foreign securities re-

accelerated, to US\$3.1bn over August 1-14 (July: US\$6.7bn; June-March average: US\$0.7bn; January-February average: US\$5.5bn).

Overall, we assess that USDKRW could remain rangebound between 1,400 and 1,440, [with risks skewed towards a weaker KRW if KOSPI rebound gains traction](#). FX market stabilization measures, and the Korean private sector's activities (strong exports, USD funding, active conversion, and FX hedging) could further stabilize USDKRW levels in the near term. However, capital outflow pressure from foreign equity investors could re-accelerate if the KOSPI potentially rebounds.

SGD

Wei Zheng Kit, Rohit Garg, Gordon Goh

USDSGD Forecasts: 0-3m 1.28, 6-12m 1.27

Despite downside surprises in 2Q26 core outturns, we believe MAS's decision to steepen "very slightly" today implies a greater weight on upside surprise in the positive output gap and the expected persistence of >2% core inflation prints, consistent with its broadly defined price stability mandate and historical reaction functions. While we think the hawkish tone of today's statement shouldn't necessarily be construed as forward guidance, the statement didn't close the door to tightening. With the current 1.25% p.a. slope likely deemed mildly restrictive, and MTI's raised 2026 GDP forecast range of 4.5-5.5% likely already having incorporated MAS's Jul expectations for a significantly wider positive output gap amid possibly higher potential growth assumptions, this sets a higher bar for upside surprises, with MAS's Jul point core CPI forecasts also close to Citi's. We maintain our call for MAS to stay on hold in Oct for now, but note that 2Q26 wages, broadening growth and improving Jul PMI keep the risk of further steepening alive, and we keep an eye on incoming hard data for Jul-Aug to gauge likelihood of an October move.

INR

Samiran Chakraborty, Baqar Zaidi, Rohit Garg

USDINR Forecasts: 0-3m 96, 6-12m 98

Given the “encouraging response”, the RBI has decided to end its FCNR(B) concessional swap scheme by 31-Aug, earlier than the originally planned date of 30-Sep. Banks have already mobilized \$52.3bn under FCNR(B) deposits by 13-Aug, and we expect this to reach \$70bn by end-August. Following the RBI's announcement, we have revised our FY27 BoP surplus forecast down by \$7bn to \$53bn. Beyond August, BoP should again trend close to neutral levels, with the surplus/deficit dependent on oil prices and FDI/FPI inflows. While we discuss the possible motivations for the [early termination of the FCNR\(B\) concessional swap scheme here](#), it would be impossible to judge the primary motivation of the RBI without explicit clarification. *However, it seems that using the scheme to engineer a sharp appreciation of INR to reduce undervaluation was not one of its main objectives.* The RBI likely has the ammunition to lower currency volatility, however.

The critical thing to observe, in our view, will be how hedging and speculative behavior in the market is altered. There could be two possibilities. The low-volatility environment may reduce importer hedging and increase inflows with a better carry-to-vol ratio for the INR. On the other hand, there is a risk that the market perceives the best of the BoP scenario to be behind us, leading to another bout of speculative build-up. Our initial view was that the RBI would nudge USDINR towards 94 or below because of the strong inflows under this scheme. However, the early termination of the scheme likely implies that 95 becomes a floor for USDINR in the near term, with the pair moving to 96.0 in the next 0-3 months on our forecast. At the same time, a stronger reserve position for the RBI should ensure that any depreciation bias is limited despite a flattish BoP, with USDINR inching towards 98 no earlier than 1H-2027, in our view.

Figure 30. SGD: After peaking in 3Q26, we expect core to rise again in 1Q27 on base effects, staying >2% into 2Q27

PLN

Arkadiusz Trzciolek, Piotr Kalisz

EURPLN Forecasts: 0-3m 4.33, 6-12m 4.30

The dovish stance presented by the Governor at the July policy meeting, which hinted at the possibility of rate cuts later in 2026 (after summer holidays) faced pushback given the developments in the commodities market. The re-ignition of

the Middle East conflict, which led to increase in oil prices, was not creating a positive environment for EM currencies. We believe that the inflation outlook (with headline CPI going above 3.5% by year-end) could prevent the policymakers from cutting rates. The increase in fuel prices led to re-introduction of government price caps at fuel stations, which could prove further detrimental to the fiscal situation, where the general government deficit is already running close to 7% of GDP. Among risk factors that could bring some rebound in the zloty exchange rates are the FX flows coming into Poland, as the Ministry of Finance is holding record-high liquidity funds denominated in foreign currency and there are large transfers coming from the EU scheduled later this year.

HUF

Arkadiusz Trzciolek, Piotr Kalisz

EURHUF Forecasts: 0-3m 360, 6-12m 355

We continue to be optimistic on HUF outlook, despite some weakening since mid-June following the deterioration of risk sentiment. The rate cut cycle is likely to last at least until early 2027, in our view. We do not think, however, that the NBH easing would be a major drag for the forint. Real rates in Hungary are strongly positive, given the well below target CPI currently, as well as accounting for year-ahead forecasts. Additionally, the growth outlook has improved over the past couple of months, as GDP growth is likely to increase by close to 2% in 2026. Economic growth is likely to improve further next year, once the inflow of EU funds becomes more visible. We anticipate that Hungary should be able to regain access to RRF grants, cohesion funds, and SAFE loans. Although Hungary is not meeting any of the Maastricht convergence criteria, we think that in the long term the HUF rate may be further supported by the euro adoption plans.

CZK

Martin Motl

EURCZK Forecasts: 0-3m 24.20, 6-12m 24.30

The koruna is supported by favorable domestic fundamentals and a positive interest-rate differential versus the euro area, reflecting the more restrictive stance of Czech monetary policy. We expect the CNB to keep rates unchanged at 3.75% for an extended period. However, the main upside risk to rates is the continued persistence of elevated core inflation, reflecting brisk wage growth and housing-related costs, while a further rise in oil and gas prices and their pass-through to broader inflation also remains a source of uncertainty. Higher energy prices could strengthen expectations of further rate hikes, while also weakening growth and the trade balance. We therefore see limited scope for further koruna appreciation in the near term. Over a six- to twelve-month horizon, we expect the koruna to weaken modestly towards 24.30 EUR/CZK. Over the longer term, however, we continue to expect a gradual appreciation of the koruna towards 24.10 EUR/CZK. This view is supported by the Czech economy's expected growth outperformance relative to the euro area and a persistently positive interest-rate differential.

ZAR

Gina Schoeman

USDZAR Forecasts: 0–3m 16.05, 6–12m 16.10

Fiscal and monetary policy is dovetailing to provide lower country risk premium to support the currency. This is helped further by more political stability to ensure structural reforms strengthen GDP growth.

MXN

Julio Ruiz

USDMXN Forecasts: 0–3m 17.00, 6–12m 17.30

August's [monetary policy decision](#) came with a mildly hawkish undertone. We interpret the tone as reinforcing the case for keeping rates unchanged going forward, rather than signaling consideration of rate hikes, the odds of which we believe remain low given recent core inflation dynamics, subpar economic growth, and a resilient currency. We believe generalized weakness in the USD will likely continue to support MXN despite soft activity, a challenging fiscal outlook, and a delayed USMCA review agreement.

BRL

Leonardo Porto, Paulo Lopes, Thais Ortega

USDBRL Forecasts: 0–3m 5.20, 6–12m 5.35

Commodities prices remain elevated and have capped BRL downside, which is hovering around USD/BRL 5.20 as the official campaign period started. In the near term (0–3M), we expect the BRL to hover around this level at USD/BRL 5.2 (from

5.1). Looking ahead, the risks on the external front remain related to future developments of geopolitical tensions and a stronger USD, while on the domestic front it relates to the presidential race picking up speed. We continue to expect moderate depreciation of the FX with the USD/BRL forecast unchanged at 5.35 in the 12M horizon.

CLP

Esteban Tamayo

USDCLP Forecasts: 0-3m 920, 6-12m 900

This remains primarily a copper story. While BCCh is firmly in a holding pattern and carry has become a less important driver than in previous cycles, copper prices remain supportive and mining activity has begun to recover from earlier weakness. The government's pro-investment agenda and efforts to improve permitting and investment certainty should also support medium-term mining investment and external accounts. We believe this combination provides a favorable backdrop for the peso and should limit depreciation pressure despite still-moderate domestic growth and lingering fiscal concerns. We therefore expect USDCLP to remain close to current levels over the next 0-3 months. Further out, we continue to see gradual CLP appreciation. Copper should remain a supportive anchor for export revenues and balance-of-payments dynamics, while a slow improvement in investment conditions could help attract additional flows into the mining sector. At the same time, BCCh's high bar for easing reduces the risk of renewed deterioration in rate differentials. The resulting appreciation path is likely to be gradual rather than abrupt, but we continue to expect a stronger peso over time, supporting our 6-12 month forecast of 900.

This version is much closer to the August macro backdrop in the daily thread and avoids relying on an election narrative that has already passed.

COP

Esteban Tamayo

USDCOP Forecasts: 0-3m 3,120, 6-12m 3,140

COP remains supported by one of the most attractive carry profiles in EM, with Banrep maintaining a restrictive stance and inflation persistence keeping further tightening risks on the table. The new administration has also moved quickly to emphasize fiscal consolidation and policy credibility, helping support investor sentiment despite the fiscal uncertainty introduced by the recent earthquake. While reconstruction needs and broader fiscal pressures should become increasingly relevant over time, we do not expect them to translate into significant currency weakness. A wider goods deficit and still-large primary income outflows are likely to weigh on the current account, but these pressures are increasingly offset by structural improvement elsewhere. In particular, Colombia's services balance is moving into surplus territory, providing a growing source of external support, alongside stable secondary income flows. As a result, external accounts appear more resilient than in previous cycles, which, in our view, should COP strength toward 3,120 in the near term and only modest depreciation to 3,140 over the 6-12 month horizon as fiscal challenges should gradually re-enter focus.

Appendix A-1

ANALYST CERTIFICATION

The research analysts primarily responsible for the preparation and content of this research report are either (i) designated by "AC" in the author block or (ii) listed in bold alongside content which is attributable to that analyst. If multiple AC analysts are designated in the author block, each analyst is certifying with respect to the entire research report other than (a) content attributable to another AC certifying analyst listed in bold alongside the content and (b) views expressed solely with respect to a specific issuer which are attributable to another AC certifying analyst identified in the price charts or rating history tables for that issuer shown below. Each of these analysts certify, with respect to the sections of the report for which they are responsible: (1) that the views expressed therein accurately reflect their personal views about each issuer and security referenced and were prepared in an independent manner, including with respect to Citigroup Global Markets Inc. and its affiliates; and (2) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in this report.

IMPORTANT DISCLOSURES

Iran is subject to certain comprehensive sanctions imposed by the United States of America. Citi's research report only considers permissible activity not subject to such sanctions.

Within the past 12 months, Citigroup Global Markets Inc. or its affiliates has acted as manager or co-manager of an offering of securities of Brazil, Canada, Colombia, European Union, France, Germany, Hong Kong, Hungary, Israel, Mexico, Philippines, Poland, South Korea, Sweden, Turkey, United Kingdom of Great Britain and Northern Ireland (Government).

Citigroup Global Markets Inc. or its affiliates has received compensation for investment banking services provided within the past 12 months from Australia, Commonwealth of (Government), Brazil, Canada, Chile, China, Colombia, Czech Republic, European Union, France, Germany, Hong Kong, Hungary, India, Indonesia, Israel, Japan, Malaysia, Mexico, New Zealand, Norway, Philippines, Poland, Singapore, South Korea, Sweden, Switzerland, Taiwan, Thailand, Turkey, United Kingdom of Great Britain and Northern Ireland (Government), United States, Vietnam.

Citigroup Global Markets Inc. or its affiliates expects to receive or intends to seek, within the next three months, compensation for investment banking services from Brazil, China, Colombia, European Union, France, Germany, Hungary, India, Indonesia, Japan, Mexico, New Zealand, Norway, Poland, Singapore, South Korea, Turkey, United Kingdom of Great Britain and Northern Ireland (Government), Vietnam.

Citigroup Global Markets Inc. or its affiliates received compensation for products and services other than investment banking services from Australia, Commonwealth of (Government), Brazil, Canada, Chile, China, Colombia, Czech Republic, European Union, France, Germany, Hong Kong, Hungary, India, Indonesia, Israel, Japan, Malaysia, Mexico, New Zealand, Norway, Philippines, Poland, Singapore, South Korea, Sweden, Switzerland, Taiwan, Thailand, Turkey, United Kingdom of Great Britain and Northern Ireland (Government), United States, Vietnam in the past 12 months.

Citigroup Global Markets Inc. or its affiliates currently has, or had within the past 12 months, the following as investment banking client(s): Australia, Commonwealth of (Government), Brazil, Canada, Chile, China, Colombia, Czech Republic, European Union, France, Germany, Hong Kong, Hungary, India, Indonesia, Israel, Japan, Malaysia, Mexico, New Zealand, Norway, Philippines, Poland, Singapore, South Korea, Sweden, Switzerland, Taiwan, Thailand, Turkey, United Kingdom of Great Britain and Northern Ireland (Government), United States, Vietnam.

Citigroup Global Markets Inc. or its affiliates currently has, or had within the past 12 months, the following as clients, and the services provided were non-investment-banking, securities-related: Australia, Commonwealth of (Government), Brazil, Canada, Chile, China, Colombia, Czech Republic, European Union, France, Germany, Hong Kong, Hungary, India, Indonesia, Israel, Japan, Malaysia, Mexico, New Zealand, Norway, Philippines, Poland, Singapore, South Korea, Sweden, Switzerland, Taiwan, Thailand, Turkey, United Kingdom of Great Britain and Northern Ireland (Government), United States, Vietnam.

Citigroup Global Markets Inc. or its affiliates currently has, or had within the past 12 months, the following as clients, and the services provided were non-investment-banking, non-securities-related: Australia, Commonwealth of (Government), Brazil, Canada, Chile, China, Colombia, Czech Republic, European Union, France, Germany, Hong Kong, Hungary, India, Indonesia, Israel, Japan, Malaysia, Mexico, New Zealand, Norway, Philippines, Poland, Singapore, South Korea, Sweden, Switzerland, Taiwan, Thailand, Turkey, United Kingdom of Great Britain and Northern Ireland (Government), United States, Vietnam.

Citigroup Global Markets Inc. and/or its affiliates has a significant financial interest in relation to Australia, Commonwealth of (Government), Brazil, Canada, Chile, China, Colombia, Czech Republic, European Union, France, Germany, Hong Kong, Hungary, India, Indonesia, Israel, Japan, Malaysia, Mexico, New Zealand, Norway, Philippines, Poland, Singapore, South

Korea, Sweden, Switzerland, Taiwan, Thailand, Turkey, United Kingdom of Great Britain and Northern Ireland (Government), United States. (For an explanation of the determination of significant financial interest, please refer to the policy for managing conflicts of interest which can be found at www.citiVelocity.com.)

Analysts' compensation is determined by Citi Research management and Citigroup's senior management and is based upon activities and services intended to benefit the investor clients of Citigroup Global Markets Inc. and its affiliates (the "Firm"). Compensation is not linked to specific transactions or recommendations. Like all Firm employees, analysts receive compensation that is impacted by overall Firm profitability which includes investment banking, sales and trading, and principal trading revenues. One factor in equity research analyst compensation is arranging corporate access events between institutional clients and the management teams of covered companies. Typically, company management is more likely to participate when the analyst has a positive view of the company.

For financial instruments recommended in the Product in which the Firm is not a market maker, the Firm is a liquidity provider in such financial instruments (and any underlying instruments) and may act as principal in connection with transactions in such instruments. The Firm is a regular issuer of traded financial instruments linked to securities that may have been recommended in the Product. The Firm regularly trades in the securities of the issuer(s) discussed in the Product. The Firm may engage in securities transactions in a manner inconsistent with the Product and, with respect to securities covered by the Product, will buy or sell from customers on a principal basis.

Unless stated otherwise neither the Research Analyst nor any member of their team has viewed the material operations of the Companies for which an investment view has been provided within the past 12 months.

For important disclosures (including copies of historical disclosures) regarding the companies that are the subject of this Citi Research product ("the Product"), please contact Citi Research, 388 Greenwich Street, 6th Floor, New York, NY, 10013, Attention: Legal/Compliance [E6WYB6412478]. In addition, the same important disclosures, with the exception of the Valuation and Risk assessments and historical disclosures, are contained on the Firm's disclosure website at https://www.citivelocity.com/cvr/eppublic/citi_research_disclosures. Valuation and Risk assessments can be found in the text of the most recent research note/report regarding the subject company. Pursuant to the Market Abuse Regulation a history of all Citi Research recommendations published during the preceding 12-month period can be accessed via Citi Velocity (<https://www.citivelocity.com/cv2>) or your standard distribution portal. Historical disclosures (for up to the past three years) will be provided upon request.

RESEARCH ANALYST AFFILIATIONS / NON-US RESEARCH ANALYST DISCLOSURES

The legal entities employing the authors of this report are listed below (and their regulators are listed further herein). Non-US research analysts who have prepared this report (i.e., all research analysts listed below other than those identified as employed by Citigroup Global Markets Inc.) are not registered/qualified as research analysts with FINRA. Such research analysts may not be associated persons of the member organization (but are employed by an affiliate of the member organization) and therefore may not be subject to the FINRA Rule 2241 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

Citigroup Global Markets Inc.	Brian Levine; Daniel Tobon; Esteban Tamayo
Citibank Korea Inc.	Jin-Wook Kim
Citigroup Global Markets Asia Limited	Yuanliu Hu; Xiangrong Yu
Citigroup Global Markets (Proprietary) Limited	Gina Schoeman
Citigroup Global Markets Singapore Pte. Ltd.	Gordon Goh; Rohit Garg; Wei Zheng Kit
Citibank Europe plc Czech Republic	Martin Motl
Citigroup Global Markets India Private Limited	Baqar M Zaidi, CFA; Samiran Chakraborty
Citigroup Global Markets Japan Inc.	Osamu Takashima

Citi-Info S. de R.L. de C.V.	Julio Cesar Ruiz
Bank Handlowy w Warszawie	Arkadiusz Trzciolek; Piotr Kalisz, CFA

OTHER DISCLOSURES

Any price(s) of instruments mentioned in recommendations are as of the prior day's market close on the primary market for the instrument, unless otherwise stated.

The completion and first dissemination of any recommendations made within this research report are as of the Eastern date-time displayed at the top of the Product. If the Product references views of other analysts then please refer to the price chart or rating history table for the date/time of completion and first dissemination with respect to that view.

European regulations require that where a recommendation differs from any of the author's previous recommendations concerning the same financial instrument or issuer that has been published during the preceding 12-month period that the change(s) and the date of that previous recommendation are indicated. Please refer to the trade history in the published research or contact the research analyst.

Citi Research has implemented policies for identifying, considering and managing potential conflicts of interest arising as a result of publication or distribution of investment research. A description of these policies can be found at https://www.citivelocity.com/cvr/eppublic/citi_research_disclosures.

The proportion of all Citi Research research recommendations that were the equivalent to "Buy", "Hold", "Sell" at the end of each quarter over the prior 12 months (with the % of these that had received investment firm services from Citi in the prior 12 months shown in brackets) is as follows; Q1 2026 Buy 33%(63%), Hold 44%(52%), Sell 23%(46%), RV 0.5%(89%); Q4 2025 Buy 33%

(63%), Hold 44% (50%), Sell 23% (46%), RV 0.4% (91%); Q3 2025 Buy 33% (61%), Hold 44% (52%), Sell 23% (50%), RV 0.4% (80%); Q2 2025 Buy 33%(63%), Hold 44% (51%), Sell 23% (49%), RV 0.4% (86%). For the purposes of disclosing recommendations other than for equity (whose definitions can be found in the corresponding disclosure sections), "Buy" means a positive directional trade idea; "Sell" means a negative directional trade idea; and "Relative Value" means any trade idea which does not have a clear direction to the investment strategy.

European regulations require a 5 year price history when past performance of a security is referenced. CitiVelocity's Charting Tool (https://www.citivelocity.com/cv2/#go/CHARTING_3_Equities) provides the facility to create customisable price charts including a five year option. This tool can be found in the Data & Analytics section under any of the asset class menus in CitiVelocity (<https://www.citivelocity.com/>). For further information contact CitiVelocity support (https://www.citivelocity.com/cv2/go/CLIENT_SUPPORT). The source for all referenced prices, unless otherwise stated, is DataCentral, which sources price information from LSEG Data & Analytics. Past performance is not a guarantee or reliable indicator of future results. Forecasts are not a guarantee or reliable indicator of future performance.

Investors should always consider the investment objectives, risks, and charges and expenses of an ETF carefully before investing. The applicable prospectus and key investor information document (as applicable) for an ETF should contain this and other information about such ETF. It is important to read carefully any such prospectus before investing. Clients may obtain prospectuses and key investor information documents for ETFs from the applicable distributor or authorized participant, the exchange upon which an ETF is listed and/or from the applicable website of the applicable ETF issuer. The value of the investments and any accruing income may fall or rise. Any past performance, prediction or forecast is not indicative of future or likely performance. Any information on ETFs contained herein is provided strictly for illustrative purposes and should not be deemed an offer to sell or a solicitation of an offer to purchase units of any ETF either explicitly or implicitly. The opinions expressed are those of the authors and do not necessarily reflect the views of ETF issuers, any of their agents or their affiliates. Citigroup Global Markets India Private Limited and/or its affiliates may have, from time to time, actual or beneficial ownership of 1% or more in the debt securities of the subject issuer.

Please be advised that pursuant to Executive Order 13959 as amended (the "Order"), U.S. persons are prohibited from investing in securities of any company determined by the United States Government to be the subject of the Order. This research is not intended to be used or relied upon in any way that could result in a violation of the Order. Investors are encouraged to rely upon their own legal counsel for advice on compliance with the Order and other economic sanctions programs administered and enforced by the Office of Foreign Assets Control of the U.S. Treasury Department.

This communication is directed at persons who are "Eligible Clients" as such term is defined in the Israeli Regulation of Investment Advice, Investment Marketing and Investment Portfolio Management law, 1995 (the "Advisory Law"). Within Israel, this communication is not intended for retail clients and Citi will not make such products or transactions available to retail clients or to non-Eligible Clients. The presenter is not licensed as investment advisor or investment marketer by the Israeli Securities Authority ("ISA") and this communication does not constitute investment or marketing advice. The information contained herein may relate to matters that are not regulated by the ISA. Any securities which are the subject of this communication may not be offered or sold to any Israeli person except pursuant to a security offering exemption according to the Israeli Securities Law, 1968 and the public offering rules provided thereunder.

Citi Research broadly and simultaneously disseminates its research content to the Firm's institutional and retail clients via the Firm's proprietary electronic distribution platforms (e.g., Citi Velocity and various Global Wealth platforms). As a convenience, certain, but not all, research content may be distributed through third party aggregators. Clients may receive published research reports by email, on a discretionary basis, and only after such research content has been broadly disseminated. Certain research is made available only to institutional investors to satisfy regulatory requirements. The level and types of services provided by Citi Research analysts to clients may vary depending on various factors such as the client's individual preferences as to the frequency and manner of receiving communications from analysts, the client's risk profile and investment focus and perspective (e.g. market-wide, sector specific, long term, short-term etc.), the size and scope of the overall client relationship with the Firm and legal and regulatory constraints.

Pursuant to Comissão de Valores Mobiliários Resolução 20 and ASIC Regulatory Guide 264, Citi is required to disclose whether a Citi related company or business has a commercial relationship with the subject company. Considering that Citi operates multiple businesses in more than 100 countries around the world, it is likely that Citi has a commercial relationship with the subject company.

Securities recommended, offered, or sold by the Firm: (i) are not insured by the Federal Deposit Insurance Corporation; (ii) are not deposits or other obligations of any insured depository institution (including Citibank); and (iii) are subject to investment risks, including the possible loss of the principal amount invested. The Product is for informational purposes only and is not intended as an offer or solicitation for the purchase or sale of a security. Any decision to purchase securities mentioned in the Product must take into account existing public information on such security or any registered prospectus. Although information has been obtained from and is based upon sources that the Firm believes to be reliable, we do not guarantee its accuracy and it may be incomplete and condensed. Note, however, that the Firm has taken all reasonable steps to determine the accuracy and completeness of the disclosures made in the Important Disclosures section of the Product. The Firm's research department has received assistance from the subject company(ies) referred to in this Product including, but not limited to, discussions with management of the subject company(ies). Firm policy prohibits research analysts from sending draft research to subject companies. However, it should be presumed that the author of the Product has had discussions with the subject company to ensure factual accuracy prior to publication. Statements and views concerning ESG (environmental, social, governance) factors are typically based upon public statements made by the affected company or other public news,

which the author may not have independently verified. ESG factors are one consideration that investors may choose to examine when making investment decisions. All opinions, projections and estimates constitute the judgment of the author as of the date of the Product and these, plus any other information contained in the Product, are subject to change without notice. Prices and availability of financial instruments also are subject to change without notice. Notwithstanding other departments within the Firm advising the companies discussed in this Product, information obtained in such role is not used in the preparation of the Product. Although Citi Research does not set a predetermined frequency for publication, if the Product is a fundamental equity or credit research report, it is the intention of Citi Research to provide research coverage of the covered issuers, including in response to news affecting the issuer. For non-fundamental research reports, Citi Research may not provide regular updates to the views, recommendations and facts included in the reports. Notwithstanding that Citi Research maintains coverage on, makes recommendations concerning or discusses issuers, Citi Research may be periodically restricted from referencing certain issuers due to legal or policy reasons. Where a component of a published trade idea is subject to a restriction, the trade idea will be removed from any list of open trade ideas included in the Product. Upon the lifting of the restriction, the trade idea will either be re-instated in the open trade ideas list if the analyst continues to support it or it will be officially closed. Citi Research may provide different research products and services to different classes of customers (for example, based upon long-term or short-term investment horizons) that may lead to differing conclusions or recommendations that could impact the price of a security contrary to the recommendations in the alternative research product, provided that each is consistent with the rating system for each respective product.

Investing in non-U.S. securities, including ADRs, may entail certain risks. The securities of non-U.S. issuers may not be registered with, nor be subject to the reporting requirements of the U.S. Securities and Exchange Commission. There may be limited information available on foreign securities. Foreign companies are generally not subject to uniform audit and reporting standards, practices and requirements comparable to those in the U.S. Securities of some foreign companies may be less liquid and their prices more volatile than securities of comparable U.S. companies. In addition, exchange rate movements may have an adverse effect on the value of an investment in a foreign stock and its corresponding dividend payment for U.S. investors. Net dividends to ADR investors are estimated, using withholding tax rates conventions, deemed accurate, but investors are urged to consult their tax advisor for exact dividend computations. Investors who have received the Product from the Firm may be prohibited in certain states or other jurisdictions from purchasing securities mentioned in the Product from the Firm. Please ask your Financial Consultant for additional details. Citigroup Global Markets Inc. takes responsibility for the Product in the United States. Any orders by US investors resulting from the information contained in the Product may be placed only through Citigroup Global Markets Inc.

Unless specified to the contrary, within EU Member States, the Product is made available by Citigroup Global Markets Europe AG ("CGME"), which is regulated by the European Central Bank and the German Federal Financial Supervisory Authority (Bundesanstalt für tungsaufsicht-BaFin).

The Product is not to be construed as providing investment services in any jurisdiction where the provision of such services would not be permitted.

Subject to the nature and contents of the Product, the investments described therein are subject to fluctuations in price and/or value and investors may get back less than originally invested. Certain high-volatility investments can be subject to sudden and large falls in value that could equal or exceed the amount invested. The yield and average life of CMOs (collateralized mortgage obligations) referenced in this Product will fluctuate depending on the actual rate at which mortgage holders prepay the mortgages underlying the CMO and changes in current interest rates. Any government agency backing of the CMO applies only to the face value of the CMO and not to any premium paid. Certain investments contained in the Product may have tax implications for private customers whereby levels and basis of taxation may be subject to change. If in doubt, investors should seek advice from a tax adviser. The Product does not purport to identify the nature of the specific market or other risks associated with a particular transaction. Advice in the Product is general and should not be construed as personal advice given it has been prepared without taking account of the objectives, financial situation or needs of any particular investor. Accordingly, investors should, before acting on the advice, consider the appropriateness of the advice, having regard to their objectives, financial situation and needs. Prior to acquiring any financial product, it is the client's responsibility to obtain the relevant offer document for the product and consider it before making a decision as to whether to purchase the product.

Card Insights. Where this report references Card Insights data, Card Insights consists of selected data from a subset of Citi's proprietary credit card transactions. Such data has undergone rigorous security protocols to keep all customer information confidential and secure; the data is highly aggregated and anonymized so that all unique customer identifiable information is removed from the data prior to receipt by the report's author or distribution to external parties. This data should be considered in the context of other economic indicators and publicly available information. Further, the selected data represents only a subset of Citi's proprietary credit card transactions due to the selection methodology or other limitations and should not be considered as indicative or predictive of the past or future financial performance of Citi or its credit card business.

Citi Research product may source data from dataCentral. dataCentral is a Citi Research proprietary database, which includes the Firm's estimates, data from company reports and feeds from LSEG Data & Analytics. The source for all referenced prices, unless otherwise stated, is DataCentral. Past performance is not a guarantee or reliable indicator of future results. Forecasts are not a guarantee or reliable indicator of future performance. The printed and printable version of the research report may not include all the information (e.g. certain financial summary information and comparable company data) that is linked to the online version available on the Firm's proprietary electronic distribution platforms.
