Curb your enthusiasm

- With labor market concerns easing and the Fed moving back to a neutral bias, this should keep yields rangebound over the near term, though we believe risks skew toward pricing more Fed tightening over the medium term...
- ...We also see risks to longer-term yields, as Chair Warsh's comments on balance sheet and the Fed's inflation target both leave risks to higher inflation expectations and term premium over the medium term...
- ...Combining these views, we think the near-term environment favors positive carry steepeners: maintain 2s/10s curve steepeners
- Treasury left "at least" in forward guidance, but changed the statement from evaluating "potential future increases to nominal coupon and FRN auction sizes" to "potential future changes"...
- ...Taken at face value, this shift would indicate there are two-sided risks to Treasury auction sizing over the medium term, which we find curious given broad funding gaps in FY27 and beyond, as well as TBAC's belief that current projections could warrant increases in coupon issuance in FY27...
- ...We think Treasury is somewhat uncomfortable with the recent rise in Treasury yields, and this subtle guidance shift is aimed at opening up ambiguity in this distribution to reduce bearish pressure
- We now expect Treasury to maintain its forward guidance into 2027 and to maintain current auction sizes through August 2027 (versus February 2027 previously)
- P-STRIPS outstanding rose by \$5.9bn in July, dispersed more along the curve than in prior months. This came in line with the 3-month average, and we continue to expect LDI demand for Treasuries will continue at a more muted pace this year

Market views

Yields reversed course this week, supported by positive geopolitical news and dovish developments on both the macroeconomic and debt management fronts. Reports of renewed negotiations between the US and Iran drove oil lower and provided a tailwind for Treasuries early in the week, before Treasury's quarterly refunding announcement took center stage on Wednesday. Treasury made an unexpected tweak to the forward guidance: replacing "potential future *increases* to nominal coupon and FRN auction sizes," with "*changes*." Taken at face value, this seems to imply a more two-sided distribution of risks to future changes in coupon auction sizes (see "August refunding preview" below). Separately, the July employment report pointed to a slowing in the labor market momentum we saw earlier this year, dampening concerns that the economy may be overheating as the labor market shows no signs of contributing to inflationary pressures (see [US: School's out for summer](#), Michael Feroli, 8/7/26). A combination of these developments has reduced pressure on the Fed to hike over the very near term, and indeed money markets are not pricing a full 25bp hike until the December meeting (**Figure 1**). On the week, 2-, 5-, 10-, and 30-year yields fell 9bp, 10bp, 9bp, and 6bp, respectively.

This year's repricing in Fed policy expectations has been driven in large part by a shift in risk bias. The Fed's dual mandate has been in tension for most of the last two years, with the labor market showing signs of slack and inflation above target. However, amid this tension, the more proximate concern has been over the weakness in labor markets, with the risks of a more significant loosening looming large for policy makers and economists. As the pace of job growth picked up in 1H26 and the unemployment rate began to decline, those concerns eased and allowed the Fed to move back to a neutral bias.

If anything, the concerns have shifted in the opposite direction in recent months as market participants have begun to consider the risks of an overheating labor market, and whether that would drive the Fed to hike. Although the unemployment rate has continued to decline, and is below the Fed's longer 4.2% NAIRU estimate from the SEP, it has not been accompanied by a commensurate increase in wage pressures: **Figure 2** shows that average hourly earnings have continued to moderate, approaching levels observed just prior to the pandemic. Overall, this reinforces our forecast that the Fed has no urgency to raise rates over the near term. **This ought to help keep yields rangebound over the near term, as 1y1y OIS (as a representation of terminal Fed policy expectations) has been trading in a 3.90-4.20% range for the last 3 months (Figure 3).**

Nevertheless, over the medium term, we believe risks skew toward pricing more Fed tightening, as the debate over whether the current stance of monetary policy is restrictive has not been settled. Furthermore, we draw from similar historical periods, mainly 1999-2000, when the Fed raised rates by 100bp after a mid-cycle adjustment (see [US Treasury Market Daily](#), 6/25/26). We also see risks to longer-term yields, as Chair Warsh's comments on balance sheet and the Fed's inflation target both leave risks to higher inflation expectations and term premium over the medium term.

Combining these views, we think the near-term environment favors positive carry steepeners. Along the curve, even with the decline off the highs, the front end of the Treasury curve offers superior risk-adjusted carry, both outright and relative to the Treasury curve (**Figure 4**). Meanwhile, the intermediate sector remains somewhat rich along the curve: **Figure 5** shows 10-year yields and the 2s/30s curve explain more than 72% of the variation of the 2s/10s/30s butterfly over the last year, and the 10-year sector appears about 2bp rich on this basis. **In aggregate, we continue to hold 2s/10s steepeners to express this view.**

Figure 4: The front end offers superior risk-adjusted carry, both outright and along the curve...

Source: J.P. Morgan

The main risks to this trade stem from the near-term data flow: the July CPI data will be released next week and we forecast core CPI rose 0.22% over the month, which should take the series from 2.6% to 2.5% oya (see *Economics*). We do not think this will be enough to materially change Fed policy expectations, as OIS forwards continue to price a 45% probability of a 25bp hike at the September FOMC meeting. Meanwhile, duration positioning leans somewhat long: **Figure 6** shows our Treasury Client Survey Index has drifted higher in recent months, and is now about a standard deviation above its trailing 1-year average, indicating our client franchise has used the backup in yields to extend duration modestly. This bears watching, as our steepener position behaves like a low-beta long duration position, and any unwind of these trades could flatten the curve. However, we would note that it has traditionally taken a divergence of 1.5 to 2 standard deviations to produce a systematic trading signal (see [Survey says: Using the Treasury Client Survey to predict rates moves](#), 7/21/23).

August refunding review

As expected, Treasury left nominal coupon and FRN auction sizes unchanged, in line with both our and market expectations. Meanwhile, Treasury did tweak its forward guidance, but not in the direction anyone expected. Treasury maintained guidance that it “anticipates maintaining nominal coupon and FRN auction sizes for at least the next several quarters,” which was a risk that we had flagged since midyear. However, there was a subtle change: in prior quarters, Treasury had communicated, “Looking ahead, Treasury continues to evaluate potential future increases to nominal coupon and FRN auction sizes,” **but in this week’s policy announcement “increases” was replaced with “changes.”** Taken at face value, this shift would indicate there are two-sided risks to Treasury auction sizing over the medium term.

This small change is curious: our baseline continues to show a funding gap that opens in FY27, only to grow significantly in FY28 and beyond (Figure 7). Both the Office of Debt Management and the TBAC concur with this finding: in the minutes of the TBAC meeting, Director Pietrangeli noted, “While current issuance sizes are adequate to cover expected borrowing needs for the remainder of FY2026, the median primary dealer forecast for privately-held net marketable borrowing implies a \$1.45 trillion funding shortfall in FY2027-28 based on current coupon auction sizes and privately-held bill supply.” Furthermore, the TBAC report to the Secretary indicates this as well, as Chair Granet and Vice Chair Schiller wrote, “The Committee continues to believe that current projections could warrant increases in coupon issuance in FY27. Given the projected funding gaps in FY27 and FY28, members recommended that Treasury consider updating its forward-guidance language to preserve flexibility heading into FY27.”

This change in language could represent a desire to maintain flexibility given structural changes in demand for Treasuries in recent years, and given output from TBAC’s Optimal Debt Model. Indeed, at the November 2025 refunding, a TBAC member refreshed this model, finding that higher debt levels, larger deficits, and higher term premium have structurally increased both the cost and volatility of deficits and debt service. The member also concluded that Treasury’s current issuance mix is well-positioned to balance a low cost of debt with low volatility in a productivity boom. However, especially in adverse scenarios, and to some extent in the baseline scenario, increasing belly issuance at the expense of both bond and

T-bill issuance lowers volatility at a negligible cost increase.¹ On the other hand, adhering strictly to this model would require cutting bill sizes in addition to long end sizes, and as it stands, maintaining the guidance suggests Treasury is content to let the T-bill share of debt outstanding to increase further into 2027.

Figure 7: A sizeable funding gap begins to emerge in FY27 and opens further in FY28 and beyond, primarily driven by an increase in maturities

US Treasury net coupon borrowing capacity under unchanged auction schedule versus total funding needs; \$bn

Source: US Treasury, J.P. Morgan

Given this backdrop, we think the Treasury is somewhat uncomfortable with the recent rise in Treasury yields, and this subtle guidance shift is aimed at opening up ambiguity in this distribution to take the bearish pressure off Treasury yields. Treasury's debt management strategy is to fund the federal government at the lowest cost over time in a regular and predictable fashion, and we think today's actions indicate that it is leaning more heavily on the former tenet rather than the latter. Secretary Bessent has made it clear that he aims to lower long-term yields, and while yields had declined earlier this year amid expectations of easier Fed policy, 1y1y OIS rates have risen more than 100bp over the last 6 months, pushing the rest of the term structure higher. Chair Warsh's press conference last week did not help the cause, as his ambiguity over the Fed's inflation target risks higher inflation expectations and nominal yields (see [US Treasury Market Daily](#), 7/29/26).

We believe this sensitivity is also observable via Treasury's coordinated JPY intervention with the MoF last week. The weakening Japanese Yen largely reflects market expectations that the BoJ is behind the curve in normalizing policy rates, which has helped twist the JGB curve steeper, driving long-end JGB yields to multi-decade highs. The effort to stabilize the Yen should therefore also stabilize long-end JGB yields. We think this matters for Treasury yields, as sharply rising JGB yields have helped partially steepen the Treasury curve over the last few months (see [Treasuries](#), *US Fixed Income Markets Weekly*, 7/10/26).

In recognition of this dynamic, we think it is becoming more challenging to have a firm view on when Treasury will remove this forward guidance to pave the way for larger coupon auction sizes. Thus, the risk we have been flagging for months has become our base case: we expect Treasury to maintain this forward guidance into 2027 and expect Treasury to maintain current auction sizes through August 2027 (versus February 2027 previously). At that point, we expect Treasury to begin a multi-quarter series of increases, focused in the 2- to 10-year sector of the curve.

Accounting for a later start to coupon auction size increases, as well as the updated TGA guidance from the financing estimates on Monday, **we now project \$2.054tn in net privately-held borrowing in 2026 and \$2.191tn in 2027, translating to a net change in privately-held T-bills outstanding of \$332bn and \$791bn in CY26 and CY27, respectively, net of Fed purchases and buybacks (Figure 8).** A later start to coupon auction size increases will naturally increase reliance on T-bill issuance next year. We now see the T-bill share of total debt outstanding reaching 24% by YE27 and 25% by YE28 (**Figure 9**).

Figure 8: We now forecast a \$332bn and \$791bn increase in privately-held T-bills outstanding in CY26 and CY27, respectively...

Away from the debt management announcement, Treasury made no changes to its auction cycle for the 7-year note, though the minutes of the TBAC meeting indicate there are no concerns about this shift. At this point the decision lies in Treasury's hands and is merely administrative, which could come at the November refunding.

Separately, there were two charge questions, both reflecting updates on Treasury market structure. **The first charge related to the transparency of secondary market transactions, building on a November 2022 charge on the same topic.** Transparency efforts have ramped up over the past few years, leading to the dissemination of daily Treasury trading volumes and transaction level data in on-the-run securities. The presenting member highlighted the potential benefits and drawbacks of a range of additional transparency options, including expanding aggregate and transaction-level data for T-bills, near and deep off-the-run securities, and TIPS. The presenter suggested that there may be merits to enhanced dissemination for T-bills, and potentially also for securities that are the CTD into futures contracts, but the less-liquid nature of TIPS and off-the-run securities, alongside the concentration of such trades around specific market events, increase the risks of expanding transparency in those products. We tend to agree that the differentiation in liquidity characteristics across various segments of the market enhances the need for differing approaches in each product, though we see the benefits to greater transparency in T-bills and near off-the-run Treasuries which turnover with a higher frequency than more deeply off-the-run securities.

The second charge discussed developments in the intraday repo market. The presenter concluded that intraday repo could offer an avenue to deploy idle cash balances, while also

being attractive to banks, as under current regulations, intraday repo is generally not captured in end-of-day balance sheet, liquidity, or risk-exposure metrics. As the presenter notes, the size of this market is currently small, though the potential ceiling for such demand could be larger, on the order of ~\$385bn potentially migrating to intraday repo if the market scales, while other estimates imply potential demand in the ~\$100–200bn range.

STRIPS update

Figure 10: P-STRIPS outstanding rose \$5.9bn in July, in line with the 3-month moving average...

Monthly change in P-STRIPS outstanding with prior 3-month moving average; \$bn

Source: US Treasury, J.P. Morgan

Figure 11: ...and demand was less concentrated in the tip of the curve than in past months

Monthly change in P-STRIPS outstanding by sector in July 2026 vs. prior 3-month average; \$bn

Source: US Treasury, J.P. Morgan

Treasury released the MSPD for July this week, showing P-STRIPS outstanding rose \$5.9bn over the month (**Figure 10**). After some swings in activity over the prior few months, stripping activity in July came in line with the prior 3-month average, and was generally less concentrated in the tip of the curve than in prior months, with only \$4.7bn stripped in the 28- to 30-year sector, whereas \$2.6bn was stripped in the 26- to 28-year sector (**Figure 11**). The most stripped security in July was the current 30-year bond (May-56s) at \$4.3bn, followed by the Aug-48s and Nov-53s, both at \$1.2bn, reflecting the more dispersed nature of the activity (**Figure 12**). We would read this dispersion along the curve as indicative of more idiosyncratic flows, rather than representing a change in broader demand trends for the product. Looking ahead, we continue to expect stripping demand from the LDI community to remain broadly in line with the pace observed in 2025, and likely slower than the pace observed in 2023-2024, consistent with an LDI community that is both well-funded and well-hedged (see [Treasuries: 2026 Mid-Year Outlook](#), 6/12/26).

Figure 12: The current 30-year bond (May-56s) was the most stripped bond in July, followed by the Aug-48s and the Nov-53s

J.P.Morgan

Analyst Certification: The Research Analyst(s) denoted by an “AC” on the cover of this report certifies (or, where multiple Research Analysts are primarily responsible for this report, the Research Analyst denoted by an “AC” on the cover or within the document individually certifies, with respect to each security or issuer that the Research Analyst covers in this research) that: (1) all of the views expressed in this report accurately reflect the Research Analyst’s personal views about any and all of the subject securities or issuers; and (2) no part of any of the Research Analyst’s compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the Research Analyst(s) in this report. For all Korea-based Research Analysts listed on the front cover, if applicable, they also certify, as per KOFIA requirements, that the Research Analyst’s analysis was made in good faith and that the views reflect the Research Analyst’s own opinion, without undue influence or intervention.

All authors named within this report are Research Analysts who produce independent research unless otherwise specified. In Europe, Sector Specialists (Sales and Trading) may be shown on this report as contacts but are not authors of the report or part of the Research Department.

Important Disclosures

Company-Specific Disclosures: Important disclosures, including price charts and credit opinion history tables (if applicable), are available for compendium reports and all J.P. Morgan–covered companies, and certain non-covered companies, by visiting <https://www.jpmm.com/research/disclosures>, calling 1-800-477-0406, or e-mailing research.disclosure.inquiries@jpmorgan.com with your request.

History of Investment Recommendations:

A history of J.P. Morgan investment recommendations disseminated during the preceding 12 months can be accessed on the Research & Commentary page of <http://www.jpmorganmarkets.com> where you can also search by analyst name, sector or financial instrument.

Analysts' Compensation: The research analysts responsible for the preparation of this report receive compensation based upon various factors, including the quality and accuracy of research, client feedback, competitive factors, and overall firm revenues.

Other Disclosures

J.P. Morgan is a marketing name for investment banking businesses of JPMorgan Chase & Co. and its subsidiaries and affiliates worldwide.

UK MIFID FICC research unbundling exemption: UK clients should refer to [UK MIFID Research Unbundling exemption](#) for details of J.P. Morgan’s implementation of the FICC research exemption and guidance on relevant FICC research categorisation.

Any long form nomenclature for references to China; Hong Kong; Taiwan; and Macau within this research material are Mainland China; Hong Kong SAR (China); Taiwan (China); and Macau SAR (China).

J.P. Morgan Research may, from time to time, write on issuers or securities targeted by economic or financial sanctions imposed or administered by the governmental authorities of the U.S., EU, UK or other relevant jurisdictions (Sanctioned Securities). Nothing in this report is intended to be read or construed as encouraging, facilitating, promoting or otherwise approving investment or dealing in such Sanctioned Securities. Clients should be aware of their own legal and compliance obligations when making investment decisions.

Any digital or crypto assets discussed in this research report are subject to a rapidly changing regulatory landscape. For relevant regulatory advisories on crypto assets, including bitcoin and ether, please see <https://www.jpmorgan.com/disclosures/cryptoasset-disclosure>.

The author(s) of this research report may not be licensed to carry on regulated activities in your jurisdiction and, if not licensed, do not hold themselves out as being able to do so.

Exchange-Traded Funds (ETFs): J.P. Morgan Securities LLC (“JPMS”) acts as authorized participant for substantially all U.S.-listed ETFs. To the extent that any ETFs are mentioned in this report, JPMS may earn commissions and transaction-based compensation in connection with the distribution of those ETF shares and may earn fees for performing other trade-related services, such as securities lending to short sellers of the ETF shares. JPMS may also perform services for the ETFs themselves, including acting as a broker or dealer to the ETFs. In addition, affiliates of JPMS may perform services for the ETFs, including trust, custodial, administration, lending, index calculation and/or maintenance and other services.

Options and Futures related research: If the information contained herein regards options- or futures-related research, such information is available only to persons who have received the proper options or futures risk disclosure documents. Please contact your J.P. Morgan Representative or visit <https://www.theocc.com/components/docs/riskstoc.pdf> for a copy of the Option Clearing Corporation's Characteristics and Risks of Standardized Options or https://www.finra.org/sites/default/files/2020-08/Security_Futures_Risk_Disclosure_Statement_2020.pdf for a copy of the Security Futures Risk Disclosure Statement.

Changes to Interbank Offered Rates (IBORs) and other benchmark rates: Certain interest rate benchmarks are, or may in the future become, subject to ongoing international, national and other regulatory guidance, reform and proposals for reform. For more information, please consult: https://www.jpmorgan.com/global/disclosures/interbank_offered_rates

J.P.Morgan

Private Bank Clients: Where you are receiving research as a client of the private banking businesses offered by JPMorgan Chase & Co. and its subsidiaries ("J.P. Morgan Private Bank"), research is provided to you by J.P. Morgan Private Bank and not by any other division of J.P. Morgan, including, but not limited to, the J.P. Morgan Corporate and Investment Bank and its Global Research division.

Legal entity responsible for the production and distribution of research: The legal entity identified below the name of the Reg AC Research Analyst who authored this material is the legal entity responsible for the production of this research. Where multiple Reg AC Research Analysts authored this material with different legal entities identified below their names, these legal entities are jointly responsible for the production of this research. Where more than one legal entity is listed under an analyst's name, the first legal entity is responsible for the production unless stated otherwise. Research Analysts from various J.P. Morgan affiliates may have contributed to the production of this material but may not be licensed to carry out regulated activities in your jurisdiction (and do not hold themselves out as being able to do so). Unless otherwise stated below in the legal entity disclosures, this material has been distributed by the legal entity responsible for production, or where more than one legal entity is listed under the analyst's name, the first legal entity will be responsible for distribution. If you have any queries, please contact the relevant Research Analyst in your jurisdiction or the entity in your jurisdiction that has distributed this research material.

Legal Entities Disclosures and Country-/Region-Specific Disclosures:

Argentina: JPMorgan Chase Bank N.A Sucursal Buenos Aires is regulated by Banco Central de la República Argentina ("BCRA"- Central Bank of Argentina) and Comisión Nacional de Valores ("CNV"- Argentinian Securities Commission - ALYC y AN Integral N°51).

Australia: J.P. Morgan Securities Australia Limited ("JPMSAL") (ABN 61 003 245 234/AFS Licence No: 238066) is regulated by the Australian Securities and Investments Commission and is a Market Participant of ASX Limited, a Clearing and Settlement Participant of ASX Clear Pty Limited and a Clearing Participant of ASX Clear (Futures) Pty Limited. This material is issued and distributed in Australia by or on behalf of JPMSAL only to "wholesale clients" (as defined in section 761G of the Corporations Act 2001). A list of all financial products covered can be found by visiting <https://www.jpmm.com/research/disclosures>. J.P. Morgan seeks to cover companies of relevance to the domestic and international investor base across all Global Industry Classification Standard (GICS) sectors, as well as across a range of market capitalisation sizes. If applicable, in the course of conducting public side due diligence on the subject company(ies), the Research Analyst team may at times perform such diligence through corporate engagements such as site visits, discussions with company representatives, management presentations, etc. Research issued by JPMSAL has been prepared in accordance with J.P. Morgan Australia's Research Independence Policy which can be found at the following link: [J.P. Morgan Australia - Research Independence Policy](#).

Brazil: Banco J.P. Morgan S.A. is regulated by the Comissão de Valores Mobiliários (CVM) and by the Central Bank of Brazil. Ombudsman J.P. Morgan: 0800-7700847 / 0800-7700810 (For Hearing Impaired) / ouvidoria.jp.morgan@jpmchase.com.

Canada: J.P. Morgan Securities Canada Inc. is a registered investment dealer, regulated by the Canadian Investment Regulatory Organization and the Ontario Securities Commission and is the participating member on Canadian exchanges. This material is distributed in Canada by or on behalf of J.P.Morgan Securities Canada Inc.

Chile: Inversiones J.P. Morgan Limitada is an unregulated entity incorporated in Chile.

China: J.P. Morgan Securities (China) Company Limited has been approved by CSRC to conduct the securities investment consultancy business.

Colombia: Banco J.P. Morgan Colombia S.A. is supervised by the Superintendencia Financiera de Colombia (SFC). Any reference in this material to products or services offered abroad by entities other than the Bank in Colombia is included exclusively for descriptive purposes. Such references do not constitute, and should not be construed as, promotional activity or the provision of financial products or services within Colombian territory, as defined under applicable Colombian regulation.

Dubai International Financial Centre (DIFC): JPMorgan Chase Bank, N.A., Dubai Branch is regulated by the Dubai Financial Services Authority (DFSA) and its registered address is Dubai International Financial Centre - The Gate, West Wing, Level 3 and 9 PO Box 506551, Dubai, UAE. This material has been distributed by JP Morgan Chase Bank, N.A., Dubai Branch to persons regarded as professional clients or market counterparties as defined under the DFSA rules.

European Economic Area (EEA): Unless specified to the contrary, research is distributed in the EEA by J.P. Morgan SE ("JPM SE"), which is authorised as a credit institution by the Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, BaFin) and jointly supervised by the BaFin, the German Central Bank (Deutsche Bundesbank) and the European Central Bank (ECB). JPM SE is a company headquartered in Frankfurt with registered address at TaunusTurm, Taunustor 1, Frankfurt am Main, 60310, Germany. The material has been distributed in the EEA to persons regarded as professional investors (or equivalent) pursuant to Art. 4 para. 1 no. 10 and Annex II of MiFID II and its respective implementation in their home jurisdictions ("EEA professional investors"). This material must not be acted on or relied on by persons who are not EEA professional investors. Any investment or investment activity to which this material relates is only available to EEA relevant persons and will be engaged in only with EEA relevant persons.

Hong Kong: J.P. Morgan Securities (Asia Pacific) Limited (CE number AAJ321) is regulated by the Hong Kong Monetary Authority and the Securities and Futures Commission in Hong Kong, and J.P. Morgan Broking (Hong Kong) Limited (CE number AAB027) is regulated by the Securities and Futures Commission in Hong Kong. JP Morgan Chase Bank, N.A., Hong Kong Branch (CE Number AAL996) is regulated by the Hong Kong Monetary Authority and the Securities and Futures Commission, is organized under the laws of the United States with limited liability. Where the distribution of this material is a regulated activity in Hong Kong, the material is distributed in Hong Kong by or through J.P. Morgan Securities (Asia Pacific) Limited and/or J.P. Morgan Broking (Hong Kong) Limited.

U.S.: J.P. Morgan Securities LLC ("JPMS") is a member of the NYSE, FINRA, SIPC, and the NFA. JPMorgan Chase Bank, N.A. is a member of the FDIC. Material published by non-U.S. affiliates is distributed in the U.S. by JPMS who accepts responsibility for its content.

General: Additional information is available upon request. The information in this material has been obtained from sources believed to be reliable. While all reasonable care has been taken to ensure that the facts stated in this material are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) make no representations or warranties whatsoever to the completeness or accuracy of the material provided, except with respect to any disclosures relative to J.P. Morgan and the Research Analyst's involvement with the issuer that is the subject of the material. Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. There may be certain discrepancies with data and/or limited content in this material as a result of calculations, adjustments, translations to different languages, and/or local regulatory restrictions, as applicable. These discrepancies should not impact the overall investment analysis, views and/or recommendations of the subject company(ies) that may be discussed in the material. Artificial intelligence tools may have been used in the preparation of this material, including assisting in data analysis, pattern recognition, and content drafting for research material. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and responsibilities that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan's current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.
