

OIL ANALYST

Ongoing Disruptions, More Adaptation: Nudging Up Our Price Forecast

- We raise our Brent/WTI price forecasts by \$5 to \$85/80 for Dec2026 and to \$80/75 for 2027, reflecting our new assumption that Mideast shipping disruptions continue into 2027.
- The price upgrade is modest despite the assumption that shipping disruptions continue for two reasons:
 - OECD commercial land inventories—a key price driver—have so far barely drawn since the war began, reflecting a smaller-than-expected deficit amid market adaptation, and the concentration of stocks draws in OECD SPR, on water, and in China.
 - We assume Mideast supply adaptation continues, with production gradually recovering by 2027H2 as (dark) flows edge up further and pipelines come online in late 2027.
- Low visible global oil stocks and OECD SPR levels do not necessarily imply an imminent crude price spike, assuming Middle East supply continues to recover, for three reasons:
 - **History.** When visible global stocks hit their all time low in November 2024 (in a sample starting in 2017), Brent was \$76. Today, OECD commercial stocks measured in days of demand—a better price predictor—remain 16% above their 2003 average (the all time low).
 - **Not running out.** We estimate that global landed oil stocks have declined from 9.1 billion barrels before the war to 8.6 billion barrels today, still well above minimum operational storage level estimates.
 - **China.** Price-sensitive Chinese crude imports are likely to moderate price upside.
- Risks to our price forecast remain significantly tilted to the upside on net, especially near-term.
 - **Price upside scenario:** Brent might exceed \$120/bbl if 2027 average Gulf output remains 4mb/d below pre-war levels, versus 0.5mb/d below in our base case. Intensified Hormuz and Red Sea shipping attacks are the most likely trigger of price upside.
 - **Price downside scenario:** Brent might decline into the \$60s in 2027 if 2027 average Gulf output rises 1mb/d above pre-war levels.

Ongoing Disruptions, More Adaptation: Nudging Up Our Price Forecast

We raise our Brent/WTI price forecasts by \$5 to \$85/80 for Dec2026 and to \$80/75 for 2027 ([Exhibit 1](#)), now assuming that Mideast shipping disruptions continue into 2027.

Markets are increasingly pricing a prolonged Mideast conflict. Brent spot futures have risen to \$97, and the options-implied probability of Brent above \$100 in March 2027 has risen from around 6% a month ago to about 25% now ([Exhibit 2](#), left). 2027Q2 Persian Gulf-to-China crude tanker rates now price shipping disruptions lasting into then ([Exhibit 2](#), right).

Exhibit 1: We Upgrade Our Brent/WTI Forecasts by \$5 to \$85/80 for Dec2026 and to \$80/75 for 2027 as We Now Assume a Prolonged Mideast Conflict

Source: ICE, Goldman Sachs Global Investment Research

Exhibit 2: Oil and Shipping Markets Increasingly Price a Prolonged Conflict

Source: ICE, Refinitiv Eikon, Goldman Sachs Global Investment Research

Modest Price Upgrade Despite Assumption Shipping Disruptions Continue

The price upgrade is modest despite our new assumption that shipping disruptions continue because OECD commercial oil inventories have so far barely drawn since the war began, and because we assume Mideast supply adaptation continues.

Reason 1: Resilient OECD Commercial Stocks

OECD commercial land inventories—a key predictor of crude prices—have barely drawn so far since the war began ([Exhibit 3](#)), leaving our end-August OECD commercial oil stocks counter 119mb above our July balance estimate. The limited OECD commercial draw reflects a smaller-than-expected deficit amid market adaptation, and an unusually large concentration of global draws in OECD SPR, on water, and in China.

Exhibit 3: OECD Commercial Inventories—a Key Predictor of Prices—Have Barely Drawn Since the War Began

Source: IEA, Kpler, DOE, Euroilstocks, ARA PJK, Haver, Refinitiv Eikon, Goldman Sachs Global Investment Research

Deficit narrows. We estimate that the global oil market deficit has narrowed from about 7mb/d in March 2026 to 1mb/d in 2026Q3, as Gulf output partially recovered on higher pipeline use and dark flows, Asia demand remained weak, and ex Gulf output grew ([Exhibit 4](#)). Our 2026Q3 1mb/d deficit is 5.4mb/d smaller than the 6.4mb/d Q3 drop in Persian Gulf output vs. its 2025 average, reflecting a 1) 1.2mb/d surplus in 2025, 2) 2.7mb/d weaker demand (vs. 2025), and 3) 1.4mb/d stronger ex Gulf production (vs. 2025). The Americas drive the strength in ex Gulf liquids production with 2026Q3 combined output from the US, Canada, Brazil, Venezuela, Argentina, and Guyana on track to be 2.3mb/d above its 2025 average with the largest contributions from the US (1mb/d) and Brazil (0.7mb/d).

Exhibit 4: We Estimate That the Global Market Deficit Narrowed From About 7mb/d in March 2026 to 1mb/d in 2026Q3 as Gulf Output Partially Recovered, Demand Remained Weak, and ex-Gulf Output Grew

Source: Goldman Sachs Global Investment Research

Concentrated draws. Global visible oil stocks have declined by 543mb since the war began, or 504mb (2.7mb/d) after adjusting for likely upward revisions ([Exhibit 5](#), left panel, red diamond) as dark-crossing ships eventually turn on their transponders. Of that 543mb draw, only 26mb has come from OECD commercial storage—the most price-relevant category for near-term Brent—while nearly 200mb each has come from OECD SPR and on oil on water, and 80mb from China.

Exhibit 5: An Unusually Large Share of the Global Oil Stock Draws Since March Has Occurred in OECD SPR, on Water, and China

Source: IEA, Kpler, DOE, Euroilstocks, ARA PJK, PAJ, Haver, Goldman Sachs Global Investment Research

Because our OECD commercial stocks counter remains resilient, our \$79 Brent fair value estimate ([Exhibit 12](#), right panel) is still \$18 below market pricing, which embeds a risk

premium for future draws and high disruption risk.

Reason 2: We Assume Mideast Supply Recovery Continues

We assume Mideast supply adaptation continues, with output recovering as dark flows rise, new pipeline capacity comes online in late 2027, and the UAE and Saudi Arabia eventually deploy some spare capacity.

Gulf liquids output has already improved from 14.3mb/d below Feb26 levels in April to 8.0mb/d below in July. We assume output gradually returns to pre-war levels by 2027H2, then overshoots as the UAE, now outside OPEC, and Saudi Arabia use some spare capacity to help rebuild inventories ([Exhibit 6](#)).

Exhibit 6: We Assume Mideast Supply Adaptation Continues with Production Gradually Recovering

We define Persian Gulf production as the sum of crude from Iran, Iraq, Saudi Arabia and Kuwait, total liquids from UAE and Qatar, and OPEC natural gas liquids.

Source: OPEC Secondary Sources, Goldman Sachs Global Investment Research

We view gradual further increases in Gulf Exports as a reasonable base case for two reasons.

First, exports have already trended higher, suggesting producers and specialized shippers are adapting to a risky shipping environment, including with rising dark flows ([Exhibit 7](#)), given strong economic and national incentives.

Second, additional resources—especially pipelines, tanker fleet expansion, and potentially additional ship protection—could support further export gains. We estimate 3.8mb/d of new effective pipeline capacity addition by end-2027, driven by the UAE's West-East pipeline expansion (+1.8mb/d) and Saudi Arabia's Yanbu port expansion (+2.0mb/d) ([Exhibit 8](#)).

To be clear, the intensity and geographical breadth of tanker attacks—a highly uncertain variable—will remain a key driver of whether Gulf oil exports recover and how quickly.

Exhibit 7: Estimated Gulf Oil Exports—Including Predicted Upward Revisions from Dark Flows—Have Recovered to About 2/3 of Pre-War Levels

Oil includes crude, refined products, and LPG. For Kpler flows as currently reported and assuming no revisions, Persian Gulf exports are defined as the sum of flows through the Strait of Hormuz, Yanbu, Fujairah, Gulf of Oman, and Botas Ceyhan. For revisions, crude balance, and Kpler products exports, Persian Gulf exports are defined as the sum of exports from Saudi Arabia, UAE, Iran, Iraq, Qatar, and Kuwait.

Source: OPEC Secondary Sources, IEA, Kpler, PetroLogistics, Goldman Sachs Global Investment Research

Exhibit 8: We Estimate Pipeline Capacity Bypassing Hormuz Will Grow by 3.8mb/d in 2027

We measure current effective pipeline capacity (latest 14 day average) as the sum of flows from the ports of Yanbu (via East–West pipeline), Fujairah (via ADCOP pipeline), and Botas Ceyhan (via Kirkuk–Ceyhan pipeline). We assume 100% of oil currently being exported from Botas Ceyhan is Iraqi. The seven considered Persian Gulf countries are Saudi Arabia, Kuwait, Iraq, Qatar, Bahrain, the UAE, and Iran. The 3.8mb/d capacity addition by end-2027 is from construction of the new West–East pipeline in the UAE (+1.8mb/d) and expansion of Yanbu port in Saudi Arabia (+2.0mb/d). The 3.5mb/d capacity addition by end-2028 is from expansion of the East–West pipeline in Saudi Arabia (+1.5mb/d), construction of the Kirkuk–Baniyas pipeline in Iraq (+0.7mb/d), and construction of the Basra–Haditha pipeline in Iraq and extensions to Baniyas and Ceyhan (+1.3mb/d).

Source: Goldman Sachs Global Investment Research

Low Global and SPR Oil Stocks Don't Imply Crude Prices Have to Jump Imminently

Visible global oil stocks ([Exhibit 10](#), left) and OECD SPR levels ([Exhibit 9](#)) are low by historical standards. Even so, they do not necessarily imply a crude price spike if Middle East supply continues to recover, for three reasons: history, our [view](#) that we aren't running out of oil in the near-term, and China's price-sensitive imports.

Exhibit 9: OECD SPR Inventories Have Fallen to Low Levels

Source: IEA, Kpler, Goldman Sachs Global Investment Research

Reason 1: History

The historical relationship between prices and global visible oil stocks is weak. In fact, when visible global stocks hit their all time low in November 2024 (in a sample starting in February 2017), Brent was \$76 ([Exhibit 10](#), left).¹ The latest OECD commercial stocks measured in days of demand—which predict oil prices better than global stocks—remain 16% above their 2003 average all-time low. In 2003, Brent front-to-back 1M/36M timespreads traded around a relatively high but not extreme 20% (and Brent spot prices around \$30 ([Exhibit 10](#), right)).²

¹ To be clear, late 2024 was a different environment from today with high OPEC spare capacity and limited supply disruptions.

² OECD commercial landed stocks were structurally lower before the US shale boom. The structural increase in OECD commercial stocks can be explained by a shift from storage on water (given long-haul voyages from the Middle East) to landed crude storage in the US (and short-haul voyages).

Exhibit 10: When Visible Global Stocks Reached Their All Time Low in November 2024 (in a Sample Starting in 2017), Brent was \$76; Today, OECD Commercial Stocks as Days of Demand Remain 16% Above the 2003 Average

We estimate days of global demand by dividing the GS global visible stocks counter by GS balances world oil demand. We estimate days of OECD demand by dividing OECD commercial stocks from the IEA by OECD oil demand.

Source: IEA, Kpler, DOE, Euroilstocks, ARA PJK, PAJ, Haver, Goldman Sachs Global Investment Research

Reason 2: Not Running Out

We estimate that global landed oil stocks have declined from 9.06 billion barrels before the war to 8.69 billion barrels today, still well above the estimated minimum operational landed storage level of 4.20 billion barrels (Exhibit 11). We use the upper bound of the 30–40 days of global demand range for the operational minimum storage estimate because the global oil operational minimum exceeds the sum of country-product operational minima, given regional/product mismatches and potential export restrictions,

Exhibit 11: We Estimate That Global Landed Oil Stocks Have Declined From 9.1 Billion Barrels Before the War to 8.6 Billion Barrels Now, Which Remains Well Above the Minimum Operational Landed Storage Level Estimated at 4.2 Billion Barrels

We have earlier estimated the operational minimum level for global landed storage at 30–40 days of demand (see “Oil Analyst: Running Out of Oil? A Large But Still Mostly Local Products Risk”, Yulia Grigsby and team, May 4, 2026). We use the upper bound of this estimate and 2025 average global demand to estimate an operational minimum of global stocks in mb.

Source: Goldman Sachs Global Investment Research

Reason 3: China Crude Imports Will Likely Remain Price-Sensitive

Price-sensitive Chinese crude net imports, still down about 30% year-over-year, will likely moderate price upside in an escalation scenario and cushion price downside in a de-escalation scenario ([Exhibit 12](#), left). We estimate Brent fair value would be \$10–15 higher if China had kept its imports stable in March–August 2026, triggering more significant OECD commercial draws ([Exhibit 12](#), right).

Exhibit 12: Chinese Crude Net Imports Remain Down About 30% Year-Over-Year; We Estimate Brent Fair Value Would Be \$10-15 Higher if China Had Kept Imports Stable in March-August 2026

Current GS estimate of fair value of Brent 36M is \$76/bbl. Latest predicted Brent 1M/36M timespreads are 4% (using latest balance demand) and 12% (using pre-war balance demand).

Source: Kpler, ICE, Goldman Sachs Global Investment Research

We expect China's crude imports to stay low if prices remain high because the two drivers—lower crude demand and crude draws—look largely sustainable in coming quarters. The 3.3mb/d drop in July 2026 net imports versus the 2025 average reflects a 2mb/d decline in refinery runs and a 1.3mb/d swing from stockpiling in 2025 to draws since May ([Exhibit 13, left](#)).

China crude demand should remain price-sensitive because investment in electric personal cars, electric taxis, electric trucks, public transportation, and coal-based petrochemical plants has increased flexibility to switch away from oil without much pressure on economic activity.

China crude stock changes should also remain price-sensitive because China visible crude stocks remain high—above 1.1 billion barrels—and even higher when invisible stocks are included ([Exhibit 13, right](#)).

Exhibit 13: Weaker Price-Sensitive Crude Demand Is the Main Driver of the Drop in China Crude Imports While Chinese Crude Stocks Remain Relatively High

RHS: To calculate China visible crude inventories in days of demand, we divide by refinery runs (equal to demand for crude) from China National Bureau of Statistics. We nowcast the missing August 2026 refinery runs data point by taking the July 2026 data point and applying the month-over-month percent change in the analogous Kpler data series.

Source: Kpler, China National Bureau of Statistics, PetroLogistics, IEA, Goldman Sachs Global Investment Research

Net Upside Price Risks and Recommendations

Risks to our price forecast remain significantly tilted to the upside on net, especially near-term.

Key upside price risks include more intense and geographically broader shipping disruptions, and damage to crude production or export infrastructure, which could weaken output in the Mideast or elsewhere for longer. We see the risk of larger or more persistent supply disruptions as especially high in and around Hormuz, the Red Sea and the Black Sea ([Exhibit 14](#)).

The main downside price risks are a faster Mideast output recovery and stickier demand losses. Our base case assumes 0.7mb/d of demand scarring in 2027, or 12% of the 6mb/d 2026Q2 loss versus a no war scenario.

Exhibit 14: Oil Flows via the Red Sea and From Russia Have Recently Fallen as Supply Disruptions Broaden

Source: Kpler, Goldman Sachs Global Investment Research

We illustrate the significant net upside price risks with two Gulf output and Brent scenarios ([Exhibit 15](#)):

- **Price upside scenario:** Brent might exceed \$120/bbl if 2027 average Gulf output remains 4mb/d below pre-war levels, versus 0.5mb/d below in our base case. We view more intense shipping attacks in Hormuz and the Red Sea as the most likely driver of this lower-output, higher-price scenario.
- **Price downside scenario:** Brent might decline into the \$60s in 2027 if 2027 average Gulf output rises 1mb/d above pre-war levels.

We still recommend hedging geopolitical risk through deferred Mar27-Dec27 European diesel timespreads, which would rise over 100% if persistent Russia or Mideast refinery outages keep the nearby 9-month spread near current levels.

Disclosure Appendix

Reg AC

We, Daan Struyven, Yulia Zhestkova Grigsby, Alexandra Paulus and Filippo Cuscito, hereby certify that all of the views expressed in this report accurately reflect our personal views, which have not been influenced by considerations of the firm's business or client relationships.

Unless otherwise stated, the individuals listed on the cover page of this report are analysts in Goldman Sachs' Global Investment Research division.

Contributing Authors: Daan Struyven Goldman Sachs & Co. LLC, Yulia Zhestkova Grigsby Goldman Sachs & Co. LLC, Alexandra Paulus Goldman Sachs & Co. LLC, Filippo Cuscito Goldman Sachs International.

Unless otherwise stated, the individuals listed in the Contributing Authors disclosure of this report are analysts in Goldman Sachs' Global Investment Research division.

Disclosures

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; registered market maker. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with a subject company, public appearances and trading in securities covered by the analysts.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of Global Investment Research of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Brazil:** Disclosure information in relation to CVM Resolution n. 20 is available at <https://www.gs.com/worldwide/brazil/area/gir/index.html>. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Resolution n. 20, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** This information is being provided to you for information purposes only and is not, and under no circumstances should be construed as, an advertisement, offering or solicitation by Goldman Sachs & Co. LLC for purchasers of securities in Canada to trade in any Canadian security. Goldman Sachs & Co. LLC is not registered as a dealer in any jurisdiction in Canada under applicable Canadian securities laws and generally is not permitted to trade in Canadian securities and may be prohibited from selling certain securities and products in certain jurisdictions in Canada. If you wish to trade in any Canadian securities or other products in Canada please contact Goldman Sachs Canada Inc., an affiliate of The Goldman Sachs Group Inc., or another registered Canadian dealer. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 10th Floor, Ascent-Worli, Sudam Kalu Ahire Marg, Worli, Mumbai-400 025, India, Corporate Identity Number 60634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. Registration granted by SEBI and certification from NISM in no way guarantee performance of the intermediary or provide any assurance of returns to investors. Goldman Sachs (India) Securities Private Limited compliance officer and investor grievance contact details, a copy of the annual compliance audit report and other relevant information and disclosures can be found at this link: <https://www.goldmansachs.com/worldwide/india/research-analyst>. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have

been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union and United Kingdom: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council (including as that Delegated Regulation is implemented into United Kingdom domestic law and regulation following the United Kingdom's departure from the European Union and the European Economic Area) with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at <https://www.gs.com/disclosures/europeanpolicy.html> which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan Type II Financial Instruments Firms Association, and Investment Management Association of Japan. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

LLC; in Hong Kong by Goldman Sachs (Asia) L.L.C.; in India by Goldman Sachs (India) Securities Private Ltd.; in Japan by Goldman Sachs Japan Co., Ltd.; in the Republic of Korea by Goldman Sachs (Asia) L.L.C., Seoul Branch; in New Zealand by Goldman Sachs New Zealand Limited; in Russia by OOO Goldman Sachs; in Singapore by Goldman Sachs (Singapore) Pte. (Company Number: 198602165W); and in the United States of America by Goldman Sachs & Co. LLC. Goldman Sachs International has approved this research in connection with its distribution in the United Kingdom.

Goldman Sachs International ("GSI"), authorised by the Prudential Regulation Authority ("PRA") and regulated by the Financial Conduct Authority ("FCA") and the PRA, has approved this research in connection with its distribution in the United Kingdom.

European Economic Area: Goldman Sachs Bank Europe SE ("GSBE") is a credit institution incorporated in Germany and, within the Single Supervisory Mechanism, subject to direct prudential supervision by the European Central Bank and in other respects supervised by German Federal Financial Supervisory Authority (Bundesanstalt für tungsaufsicht, BaFin) and Deutsche Bundesbank and disseminates research within the European Economic Area.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, make a market or act as liquidity provider in, and buy or sell, any securities, derivatives, or other financial instruments referred to in this research (including any financial instruments issued by the companies referred to herein), unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is focused on investment themes across markets, industries and sectors. It does not attempt to distinguish between the prospects or performance of, or provide analysis of, individual companies within any industry or sector we describe.

Any trading recommendation in this research relating to an equity or credit security or securities within an industry or sector is reflective of the investment theme being discussed and is not a recommendation of any such security in isolation.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your

individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
